BUCKBEE'S NEW SWEET SPANISH ONION

THE WORLD BEATER ONION
THE LARGEST, SWEETEST, BEST ALL AROUND GLOBE SHAPED ONION EVER GROWN—LIGHT GOLDEN YELLOW COLOR—
SPLENDID YIELDER—GOOD SHIPPER—DISEASE RESISTANT.

We have seen seven specimen Buckbee's Sweet Spanish Onions set side by side on a yard stick and reach from end to end; these seven Onions weighed over sixteen pounds. The Onions are of a light golden yellow color—the flesh is a rich pure white—crisp, mild, finely grained and of exceptionally sweet flavor. Buckbee's Sweet Spanish has been bred for disease resistant properties and can be used in any way that any other Onion can be used, and when once tasted, the call will always be for more.

Send to H. W. Buckbee's Rockford Seed Farms—for genuine stock seed grown from originator's seed.
Pkt. about 500 seeds, 15c; 2 pkts. for 25c; ½ oz. 85c; oz. \$1.50; 2 ozs. \$2.75; ¼ lb. \$4.95, Postpaid.

BUCKBEE'S WONDER PLUME CELERY

BETTER THAN GOLDEN SELF BLANCHING—EASIER TO HANDLE
THAN EASY BLANCHING—DISEASE RESISTANT.

Buckbee's Wonder Plume Celery is the height of perfection in the Celery family—combining the cardinal features of its parentage; the earliness, attractive appearance, superior quality and delightful nutty flavor of the Golden Self Blanching—and—the splendid stocky, vigorous growth, of Easy Blanching—producing beautiful full hearts which blanch quickly to the center, of a rich golden yellow color. Buckbee's Wonder Plume is especially recommended as a disease resistant Celery, a wonderful cropper, and a most profitable variety to grow for the home garden, for market gardeners, and for long distance Celery Shippers. Send to H. W. Buckbee's Rockford Seed Farms—for genuine stock seed grown from originator's seed.
Pkt. 15c; 2 pkts. 25c; ½ oz. 55c; oz. 95c; 2 ozs. \$1.75; ¼ lb. \$3.25, Postpaid.

BUCKBEE'S NEW GEORGIA SWEET HEART WATER MELON

EARLY MATURING—UNIFORMLY LARGE SIZE—RICH SPARKLING SUGARY RED FLESH—
LONG KEEPER—BIG YIELDER—SPLENDID SHIPPER—DISEASE RESISTANT.

We have no hesitancy in presenting this distinct and valuable new Water Melon to our friends, as it will produce a greater percentage of splendid specimen Melons than any other variety, and the eating quality is unbeatable. The sparkling red flesh is very sweet and entirely free from stringiness. The size is uniformly large and the seeds are of light color. The rind is almost as tough as a Citron Melon and will not sunburn, which accounts for its long keeping and splendid shipping qualities; the Melons remaining in good condition a long time after picking. Buckbee's Georgia Sweet Heart will please you as an all around Melon and has been bred for disease resistance properties; the vines are vigorous, healthy and hold up well; producing wonderful Melons until late into the Summer, when most other sorts quit bearing. Send to H. W. Buckbee's Rockford Seed Farms—for genuine stock seed grown from originator's seed. Pkt. 10c; oz. 25c; 2 oz. 40c; ¼ lb. 75c; ½ lb. \$1.25; lb. \$2.00, Postpaid.

READ THESE FEW WORDS ABOUT RELIABLE SEEDS

From good seeds only can good crops be grown

Yet a great many contingencies may arise to prevent the best seeds from giving satisfaction, and for all these reasons we cannot, of course, guarantee or be responsible for a crop, as success is dependent upon natural causes, which are beyond human control. Therefore, we do not warrant in any way, express or implied, the contents, or the description, quality, productiveness, or any other matter of any seeds, bulbs, or plants sold by us, and we will not be in any way responsible for the crop. If the purchaser does not accept these goods on above terms, no sale is made thereof, and he must return them at once, and money will be refunded. Subject to above conditions we make this sale, at the moderate prices at which we sell our goods.

FAIR PLAY GUARANTEE

First—We guarantee that all seeds sold shall reach customers in good condition.

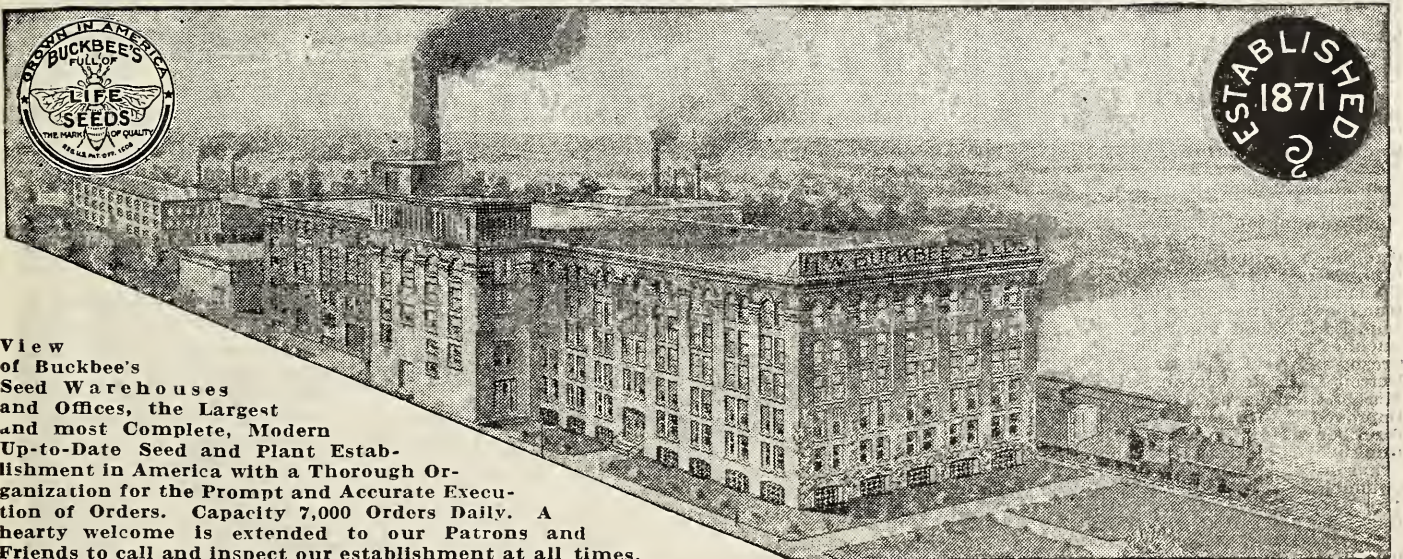

Second—We guarantee to hold ourselves responsible for the safe arrival of all remittances sent us by P. O. Order, Bank Draft, Express Order, or Registered Letter.

Third—We guarantee to deliver free of charge in the United States all garden and flower seeds listed in this catalogue, except those quoted at wholesale prices on pages 2 and 3, and Field Seeds, Grass Seeds, Potatoes and such other items that are plainly marked to be shipped by Express or Freight at purchaser's expense.

Fourth—We guarantee Buckbee's "Full of Life" Seeds to be just as represented—if they prove otherwise, notify us promptly upon receipt of seeds, sending us the numbered shipping tag which was on the shipment and we will refill the order free of charge, or refund the money paid us for same

Plant Shipments We always recommend having plants shipped by express when there is an express office near. We guarantee the safe arrival of all plants and roots by Express or Parcels Post to all points in the United States. Should anything be injured in transit, notify us immediately so we can adjust matters without delay. When plants or roots arrive in good condition our responsibility ceases, and should any complaint be made at a later date, we cannot replace them. We do not ship plants to Canada, Mexico or foreign countries owing to Custom House delays.

We do not employ agents to sell our seeds or plants.

Buckbee's World's Fair Lawn Grass.

Buckbee's Famous "Full of Life" Lawn Grass Seed

Produces a perfect and enduring lawn of luxuriant richness, with closely interwoven, firm, deep and elastic turf, is generally ready for mowing in six weeks from time of sowing and is composed of a thoroughly balanced combination of native and foreign fine-leaved, deep-rooting grasses of interweaving habit, that flourish under varied conditions, soils and climates, growing during different seasons of the year, so that a deep green, smooth and velvety sward free from clumps is maintained from snow to snow without burning brown in the hot months of summer. A lawn may be established either by "sodding" or "seeding." The latter is not only much less expensive but much more satisfactory, as better grasses can thus be obtained, and the quality and variety of the grasses have a great deal to do with appearance and the permanency of the lawn.

Shady Place Lawn Grass Seed

THE VERY BEST OBTAINABLE—CAREFULLY BLENDED—
YOU CAN HAVE A BEAUTIFUL LAWN WITH VERY
LITTLE WORK, BY USING OUR WELL
BALANCED MIXTURE

On nearly all lawns there are unsightly bare spots under the shade of trees, which have baffled all efforts to get into grass, but with this mixture there need be no further difficulty. It is a combination of fine dwarf-growing, evergreen varieties which in their wild or natural state are to be found growing in the woods or other sheltered and shaded spots. Ground that has been densely shaded by trees is frequently "sour" and if the drainage is defective it is apt to be covered with moss and coarse bog grasses. In such cases an application of slake lime, at the rate of one bushel to each thousand square feet, or 40 bushels to the acre, is an excellent corrective and sweetener, but the moss should be first removed.

Price, postpaid, ½ lb. 35c; 1 lb. 60c; 3 lbs. \$1.75. By express or freight, not prepaid, 5 lbs. \$2.75; 10 lbs. \$5.40; 15 lbs. \$7.95; 25 lbs. \$13.00.

Buckbee's "Full of Life" Asparagus Roots.

BRUSSELS SPROUTS

Brussels Sprouts are very largely grown in the South, as high as 250,000 barrels being shipped in a single season from Norfolk, Va. They are well worthy of extensive culture anywhere in this country. The plants resemble Cabbage in growth, but make small, compact, round heads at each leaf joint on the stalk. These heads are cut off when well formed and marketed in Strawberry Boxes holding one quart. The plants are quite hardy, are not injured but improved by hard frosts and are left in the garden or field during winter until wanted. These miniature Cabbages may be boiled like cabbages or cooked in cream like Cauliflower. They are the most delicious and delicately flavored variety of the Cabbage family.

BUCKBEE'S MATCHLESS—The finest strain of sprouts. The plants are of strong, vigorous growth, closely pointed and are covered the entire height with very large solid, tightly folded sprouts of exquisite quality. Buckbee's Matchless is an early variety; frost will find the sprouts fully developed and the stems thickly set. Pkt. 10c; oz. 28c; 2 oz. 50c; ¼ lb. 90c.

IMPROVED PARIS MARKET—On this variety the heads grow very closely arranged on a stalk 20 in. to 2 ft. in height. Quality is very fine. Pkt. 7c; oz. 22c; 2 oz. 35c; ¼ lb. 65c.

BUCKBEE'S IMPROVED BUSH LIMA

Superior Quality, Exquisite Flavor, Fine Color,
Good Shipper, Hardy Grower, Enormously
Productive, Matures Early, Excellent
Keeper.

This is the very "newest" in the Bush Lima Bean. It greatly excels all other Bush Limas in productiveness, being practically loaded down with pods continuously from early Summer till frost. It matures extremely early. Is suitable, therefore, for all sections North and South, and is a continuous bearer until frost. In size the Beans are what might be termed intermediate, not so large as the Burpee Bush Lima, but considerably larger than the Henderson's Bush Lima, making it, in our estimation, the finest size for all purposes. The bush is sturdy in habit and about 24 inches high, having good large leaves. It bears its fruit on long spikes in heavy clusters well out from the plant. There are several pods in each cluster, as many as ten having been counted. Each pod contains on an average of four Beans, though there are more containing five than three, so you see that it is a great improvement over the old-fashioned Bush Limas which oftentimes have only one or two in a pod. Considering the large number of pods on a bush, the yield is amazingly enormous. In quality the Bean is par excellence, unsurpassed, and color the very best, both before and after cooking. Valuable also as a shell bean for winter use.

It has become very popular and our sales of it are enormous, far exceeding those of any other Bush Lima variety. Send to BUCKBEE for originator's stock seed. Postpaid, pkt. 10c; ½ lb. 30c; lb. 50c.

NEW JACKSON WONDER BUSH LIMA

Immensely Productive.

This is the most productive and very earliest of the Bush Limas. It is of true bush form, about 2 feet high, bearing in greatest profusion, broad, flat pods, each having from three to five medium-sized, handsomely speckled Beans, which cook quickly and are of superior quality. Good for Summer use, and as Winter shell Bean. A splendid Bean for the home garden. Postpaid, pkt. 10c; ½ lb. 23c; lb. 42c.

BURPEE'S IMPROVED BUSH LIMA

The Earliest Large Seeded Bush Lima. One of the Best for Market as Well as the Home Garden.

This is the earliest of the large seeded Bush Lima Beans. The first pickings fit for the table may often be taken in July and from that time until frost a continuous supply may be gathered. It is fully 8 days earlier than the old Burpee's Bush Lima and produces larger pods and more and larger Beans in the pod than this variety; the seed is also considerably thicker. The plants grow upright about 30 inches in height and measure often 24 inches across the top. They are very productive, producing immense crops of showy pods which measure from 5 to 6 inches in length. The Beans are of enormous size and of most luscious flavor. Postpaid, pkt. 10c; ½ lb. 28c; lb. 48c.

McCASLAN NEW POLE

The Best Pole Bean in Existence. A White Seeded Green Pod Snap or Shell Bean.

Although only of recent introduction, the McCaslan Bean is already very popular and in many localities has displaced the older pole varieties. It is earlier and more productive than Kentucky Wonder and Burger's Stringless and is fully equal to them in quality.

It is the earliest Pole Bean in cultivation, maturing about 10 days earlier than Burger's Stringless and White Creaseback, which were the earliest Pole Beans known so far. The illustration on this page is taken from a photograph of a single matured plant and shows its immense prolificness. The pods are of dark green color, 10 to 11 inches long, and fill perfectly, containing ten and more seeds. They are fine for use as snap sorts, being entirely stringless, meaty and of the finest flavor and quality. When allowed to mature the shelled beans are of pure white color, good sized and most excellent for Winter use.

The vines begin to bear pods quite early and continue to produce enormous quantities until frost.

This is the one Pole Bean for every garden north and south; it stays with you all season, furnishing delicious Beans in Summer and Fall when this vegetable is always scarce.

MANGEL WURTZELS

Buckbee's "Full of Life" Seeds Are Bred for Disease Resistant Qualities
Any land that will grow a good crop of Corn will produce a good crop of Mangels or Sugar Beets, which are surer crops than any other root.

Mangels give one-third greater increase of milk in feeding cows than does the same weight of Potatoes. Forty tons Mangels (a crop of an acre) have as much nutritive matter as 130 bu. of corn and are more digestible. Send to Secretary of Agriculture Washington, D. C., for Special Bulletin on Mangels and Beets.

Plant five pounds of Seed per acre.

BUCKBEE'S MASTODON

The Heaviest Cropping and Largest of All Mangels.

It is truly a Mammoth, a single root often weighing 75 pounds and over; in yield it is enormously productive—1,500 to 1,800 bushels per acre is nothing uncommon on good soil. It grows well above ground and on account of its shape is easily harvested. In length is about the same as Buckbee's Mammoth Long Red, but is more remarkable for its handsome shape and broad shoulders, the diameter being greater, and in weight much heavier; flesh deep red, fine texture, roots solid, tops small. In fact it combines all the fine points possible to condense in a Mangel of the highest nutritive value, and is without question the best and most profitable Mangel for dairy farmers. This is our pedigree stock—especially selected, and can be relied upon as the best money can buy and our moderate prices place it within the reach of all. Oz. 10c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 40c; 1 lb. 75c, postpaid.

BUCKBEE'S MAMMOTH LONG RED

A Wonderful Yields.

A standard and favorite Mangel, producing a very large root uniformly straight and well formed, weighing from 30 to 40 pounds each, of a beautiful dark red color, wonderfully productive, average 1,000 to 1,500 bushels per acre. Keeping qualities not excelled. Our stock is a great improvement over the old variety. Oz. 3c; 2 oz. 12c; ¼ lb. 20c; ½ lb. 35c; 1 lb. 60c, postpaid.

GOLDEN TANKARD

The Great Milk Producer.

This distinct variety is a most important addition to our list of roots for stock feeding, as it contains less water and more sugar than most Mangels. Sheep and all other stock thrive wonderfully on it; its great milk-producing qualities and richly colored yellow flesh have made it a favorite with every dairy farmer.

It is an immense yielder and 60 to 75 tons per acre have often been grown on good ground and under good cultivation. The roots are handsome, of an ideal, cylindrical form, with small neck, clean, generally with only one tap-root, and can easily be lifted, and are excellent keepers. The skin is light gray above and deep orange below the ground, the flesh is bright golden yellow, differing from all other varieties, which cut white. Oz. 8c; 2 oz. 12c; ¼ lb. 20c; ½ lb. 35c; 1 lb. 65c, postpaid.

BUCKBEE'S GOLDEN MONARCH

This entirely new and distinct Mangel grows to the largest size and is of a beautiful russet yellow color. The flesh is white, firm and sweet, greatly relished by cattle and other stock. The roots are large, ovoid shaped with small tops admitting close planting. Easily lifted, growing more than half above ground, producing enormous crops, and is an excellent keeper. Oz. 8c; 2 oz. 12c; ¼ lb. 20c; ½ lb. 35c; 1 lb. 60c, postpaid.

GIANT RED ECKENDORF

The roots are smooth, of cylindrical shape, very much like the Tankard Mangel, and weigh from 20 to 25 pounds each. The flesh is firm, solid, of white color and of highly nutritive value. The Eckendorf Mangels are phenomenal yielders and are easily harvested the root growing to the largest part above the ground. Oz. 8c; 2 oz. 12c; ¼ lb. 20c; ½ lb. 35c; 1 lb. 60c, postpaid.

GIANT YELLOW ECKENDORF

CHAMPION YELLOW GLOBE

One of the best for stock feeding. The roots grow almost entirely above ground and are therefore best adapted for shallow soils and are easily harvested. It produces as much per acre as most of the longer growing Mangels. It is a good keeper. Oz. 8c; 2 oz. 12c; ¼ lb. 20c; ½ lb. 35c; 1 lb. 60c, postpaid.

CHAMPION RED GLOBE

Similar to above except in color, which is a light red or pink. Oz. 7c; 2 oz. 12c; ¼ lb. 20c; ½ lb. 30c; 1 lb. 55c, postpaid.

BUCKBEE'S SUGAR BEETS FOR STOCK FEEDING

Buckbee's "Full of Life" Seeds Are Bred for Disease Resistant Qualities

GIANT FEEDING SUGAR

The Greatest Beet for Feeding Stock.

This magnificent Sugar Beet, while giving nearly as large a yield of easily grown and harvested roots as a crop of Mangels, supplies a food of very much higher nutritive value, being much richer in sugar. They yield under equally favorable conditions, more than double that of sugar beets and not being so sweet, are less liable to injure the kidneys, when fed in large quantities.

The roots grow about two-thirds out of the ground and because of this and their shape the crop can be harvested and stored at less expense than any other root crop. Roots very large, smooth, clean and of oval shape; white skin, white flesh. Every farmer should try it. Oz. 10c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 40c; lb. 70c post-paid.

BUCKBEE
IMPERIAL
SUGAR

BUCKBEE'S SUGAR BEETS FOR STOCK FEEDING

BUCKBEE'S NEW IMPERIAL SUGAR

This Beet is the result of years of methodical and persevering selection. It gives better results than any other variety. It is extremely rich in sugar, thousands of analyses showing that the average percentage of sugar obtained from this variety is about eighteen and its average yield may be stated as from 15 to 16 tons an acre, but crops of 25 to 40 tons per acre have been obtained off it. Flesh finely grained and very sweet. We sell thousands of pounds each year to the large growers and Beet sugar factories through the country, always with the most

satisfactory results. Postpaid, oz. 10c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 40c; lb. 75c.

KLEIN WANZLEBEN SUGAR BEET

This variety at the present time has probably a wider cultivation than any other Sugar Beet. While not, as a rule, equal to BUCKBEE'S NEW IMPERIAL SUGAR in saccharine richness, it is considerably more productive. We offer seed the second year from polarized roots. Postpaid, oz. 8c; 2 oz. 12c; ¼ lb. 20c; ½ lb. 35c; lb. 65c.

THE BEST STOCK CARROTS

Every farmer should plant a few acres of Carrots for stock food; they are very productive, less liable to disease than many other root crops, and being sown earlier do not interfere so much with the labor in the busy time. They can be stored over Winter like Potatoes. Make excellent nutritive feed for all stock. Horses are very fond of them and they increase the flow of milk in cows, improve the quality of butter and give it a beautiful golden color.

Buckbee's Champion

The World-Beating Stock Carrot

Buckbee's Champion is not, properly speaking, a table Carrot, although the flesh is remarkably firm and sweet. But it is most emphatically a Stock Carrot for the farmer and stock raiser, and once used nothing will take its place. It is the heaviest cropping variety grown, yielding more tons to the acre than any other sort. The flesh is white, crisp, solid and very sweet in flavor. The roots are of medium size, very broad and heavy at the shoulder and are therefore easily harvested. They frequently measure 15 to 20 inches in circumference and 25 to 50 tons per acre is not an extravagant statement as to yield. Our own growth, Choicest Northern Home-Grown Pedigreed Stock Seed. Oz. 12c; 2 oz. 20c; ¼ lb. 35c; ½ lb. 60c; lb. \$1.00.

BUCKBEE'S IMPROVED SHORT WHITE—Roots 7 to 9 inches long, smooth, very heavy at the shoulder, having a diameter of 3 to 4 inches, but taper regularly to a point growing almost entirely in the ground. Flesh rich, white, solid, crisp and of excellent flavor. Oz. 12c; 2 oz. 18c; ¼ lb. 28c; ½ lb. 45c; lb. 80c.

BUCKBEE'S MAJESTIC—The largest, heaviest cropping and most nutritious yellow variety. The roots are of excellent quality, possessing high feeding qualities. Oz. 12c; 2 oz. 18c; ¼ lb. 28c; ½ lb. 45c; lb. 85c.

BUCKBEE'S IMPROVED LONG ORANGE—The roots of the improved strain of this variety we offer are very deep orange, long and comparatively thick, often 12 inches in length and 3 inches in diameter. This intermediate to late maturing sort is suitable for table use as well as stock feeding, combining great productiveness with uniform shape where grown in light, deep, rich soil. When of size suitable for the table, the roots are tender and of good quality. Oz. 12c; 2 oz. 18c; ¼ lb. 30c; ½ lb. 50c; lb. 90c.

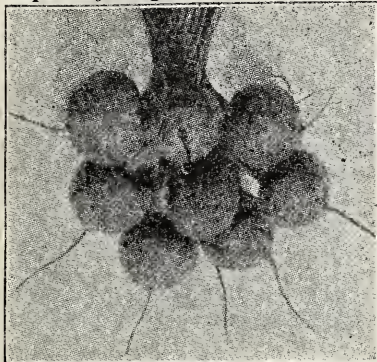

MAMMOTH WHITE BELGIAN—Splendid variety for table and stock. The roots are mammoth in size and very productive, often yields ten tons roots per acre. Oz. 10c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 40c; lb. 75c.

MAMMOTH YELLOW BELGIAN—Identical to the White Belgian, except in color. Oz. 12c; 2 oz. 18c; ¼ lb. 28c; ½ lb. 45c; lb. 80c.

BUCKBEE'S "Full of Life" CARROTS

Buckbee's "Full of Life" Seeds Are Bred for Disease Resistant Qualities
One Ounce Will Sow a Row 100 Feet Long. Four to Five Pounds Will Sow an Acre

The best soil for the Carrot is a sandy loam made rich by manuring the previous year; any good land if thoroughly and deeply worked will produce satisfactory crops. It is advisable to sow as early in the Spring as the ground is fit to work, though good crops may be grown from sowings as late as June 15. For table use sow the smaller kinds early in rows 16 to 18 inches apart. For field culture sow in drills 18 to 24 inches apart, using from 1½ to 3 pounds of seed to the acre. Cover ½ to 1 inch deep and see to it that the soil is pressed firmly above the seed. As soon as the plants appear, use the cultivator or wheel hoe. Thin 2 to 6 inches apart in the row, according to the size of the variety.

Tops small finely divided. The reddish orange colored roots are nearly round with a groove about the crown and when fully matured they are about 2 inches in diameter but they should be used before they are full grown when they are tender and delicious. Much used for forcing and pulled when they have only 4 or 5 leaves. Pkt. 8c; oz. 15c; 2 oz. 25c; ¼ lb. 40c; ½ lb. 75c; lb. \$1.25.

BUCKBEE'S CHAMPION HORN

Extra Early—Good Size—Splendid Keeper.

A splendid new Carrot from Holland where it is very largely grown for the market and considered the finest of all table Carrots. It is an extremely early variety as early as Scarlet Horn and will be ready for the market in about 45 days from sowing but it is about 6 to 7 inches long or twice the size of Scarlet Horn. It is the sweetest of all Carrots and without any yellow core. The roots are cylindrical blunt at the end and having a fine neck and small top can be planted close together. The color is very attractive bright red. They are entirely free from any stringy, coarse heart which is found in most other Carrots; are of fine texture and most delicious quality. Owing to its excellent quality, it ought to have a place in every garden and its extreme earliness and great productiveness make it an indispensable variety and a great money-maker for the market gardener. Pkt. 10c; oz. 15c; 2 oz. 25c; ¼ lb. 45c; ½ lb. 80c; lb. \$1.50.

Tops small for the size of the roots, which are comparatively short, about 5 inches long, but thick and often weighing a pound apiece; they terminate abruptly in a small tap root. Flesh bright orange, fine grained and sweet. About 10 days earlier than Danvers. A splendid variety. This is a desirable variety for soil so hard and stiff that longer growing sorts would not thrive in it. When young, excellent for table use, and when matured, equally good for stock. Pkt. 7c; oz. 12c; 2 oz. 20c; ¼ lb. 35c; ½ lb. 65c; lb. \$1.15.

BUCKBEE'S PRIDE OF THE MARKET

A large, handsome, main crop variety. Roots grow 10 to 12 inches in length, very broad at the neck, tapering evenly to the small tap root. Those Musk Melon Seed you sent last year sure were splendid. People turned others down for ours. And would ask where we bought the Seeds—said they had all others beat a mile and we sold as high as 12 two and three times a week to a single family. Can say you surely have fine Seeds. I have enough almost for another planting this year, as my garden is small.

Buckbee's Select Danvers

The Best Carrot for Every Purpose.

In this selected strain of Danvers Carrot, we have not only a splendid appearing Carrot, which always sells readily, but a variety which is an extra heavy yielder in any soil. We have spared no labor nor expense in perfecting this variety, and confidently claim and believe that it is now the leading Carrot. Adapted to all soils and enormously productive, yielding more than any other table Carrot, and often more than the large field Carrots, and is much easier harvested than these. The flesh is very tender and sweet; it is a valuable Carrot for both table use and for stock. We have an extra fine strain of this favorite sort, which is of very fine bright color, and exceptionally uniform in shape, size and color. We have sold this strain for years and it is giving the greatest satisfaction to our customers. Pkt. 8c; oz. 15c; 2 oz. 25c; ¼ lb. 40c; ½ lb. 75c; lb. \$1.25.

Half Long Danvers

The Popular Carrot for the Home Garden or Market.

This variety is well adapted to all soils and sections, and some years it leads our whole list as the best seller. It is half long in shape, almost cylindrical, somewhat stump rooted, and of rich, dark orange color. We claim that it will yield greater bulk and weight for a given length of root than any other Carrot now grown. Over 40 tons per acre of fine Danvers have been grown, and a yield of 25 to 30 tons per acre is not uncommon. Matures its crop of beautiful shaped roots in 70 days. Grown extensively by market gardeners for bunching and makes a handsome appearance on the market stalls; of the finest quality and one of the most popular sorts for home use. Pkt. 6c; oz. 12c; 2 oz. 20c; ¼ lb. 35c; ½ lb. 60c; lb. \$1.00.

Buckbee's Golden Ball Forcing

One of the earliest varieties in cultivation and very desirable for forcing. The tops are very small. The roots are reddish orange and are nearly round when forced quickly in very rich, well prepared soil, but are somewhat longer when grown outdoors. Early Scarlet Horn

A Good Variety to Grow for the Market—Tender and Delicious.

A favorite for early crop; a little later than Early Golden Ball. Color deep beautiful orange; has a short stump-shaped root about 3 inches long, large at top, therefore easily pulled. Pkt. 7c; oz. 12c; 2 oz. 20c; ¼ lb. 35c; ½ lb. 65c; lb. \$1.15.

New Early Chantenay or Model

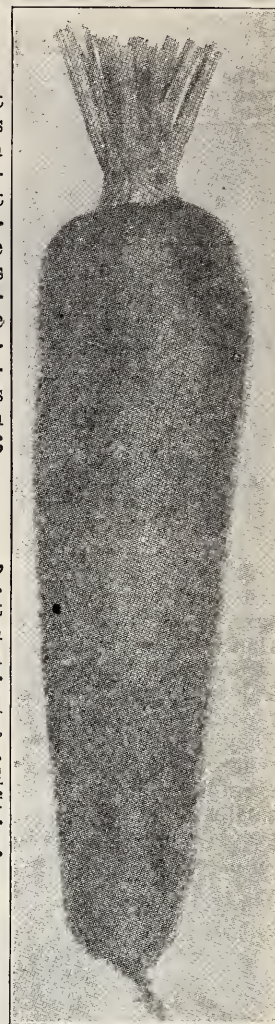

A Fine Bunching Carrot—Private Stock.

A most excellent, medium early, half long variety. It is one of the best in quality for the market and home garden, while its great productiveness and the ease with which it can be harvested makes it desirable as a field sort. The tops are medium sized with small neck. The mature roots are thick, 5½ to 6 inches in length uniformly half long or stump rooted but tapering slightly, smooth, deep orange-red in color. The flesh is very crisp and tender. Although a medium early sort the roots are suitable for use nearly as early as any. The variety is extensively used for bunching. Pkt. 7c; oz. 15c; 2 oz. 25c; ¼ lb. 40c; ½ lb. 75c; lb. \$1.25.

I want to tell you of my wonderful success with your Great Brazilian Flour Corn. I have conducted experimental farms in all states from Florida to South Dakota and from Chicago to Denver. This Corn has proven a success in all these states. Even in the arid and semi-arid regions of Kansas, Nebraska and Colorado. It came nearer making a crop than any other in all the Southern States. It's a grand success. It will fill a silo faster than any other.

Teosinte is another wonderful plant that I have great results from as far north as Southern Illinois and as far west as Southern Oklahoma.

Buckbee's New Race Horse Cabbage—Named in Honor of Red Lancelot, the Famous 2-Minute Pacer, Owned by Buckbee's Rockford Seed Farms

BUCKBEE'S NEW RACE HORSE

Absolutely the earliest Cabbage in cultivation. Indispensable to the market gardener for his very earliest crop.

Buckbee's Race Horse is ready for use in sixty days from sowing—ten days earlier than Jersey Wakefield. The plants are very hardy and can be set out very early; they are always sure to head, making good sized, solid and firm pointed heads, which, though a little smaller than Jersey Wakefield, are always marketable and being the first in the market bring high prices. There are but few outer leaves and the plants may therefore be set closely together, they will then yield large crops, and as many as 14,000 heads have been grown of this variety on one acre, which brought a larger profit per acre than later and heavier varieties. The heads are very attractive in appearance, of splendid quality, tender, fine grained and of sweet, delicious flavor.

Some space should be given in every garden to this variety, as coming ahead of every other kind, it is bound to make money for the grower.

We control the entire stock of this earliest of all Cabbage. Pkt. 10c; oz. 35c; 2 oz. 65c; ¼ lb. \$1.20; ½ lb. \$2.10; lb. \$3.75.

EARLY SPRING

BUCKBEE'S Chinese or Celery Cabbage

Which Is One of the Most Profitable Crops to Grow for the Market.**

**As Tender as Lettuce; Flavor as Delicate as Celery; as Hardy
as Cabbage. One of the Finest Table Delicacies
Ever Grown.**

The Chinese or Celery Cabbage belongs to the Cabbage family; when young, it resembles a smooth-leaved Chard-Beet, leaves being light green and crimped; the plant as it matures forms heads much like Cos Lettuce, which are about 15 inches high, have a diameter of 6 to 8 inches, weigh often 4 lbs., and are as firm and solid as Cabbage; their heart blanches to a crystalline white, whiter than any Lettuce or Cabbage. The leaf is as tender as Lettuce and as distinctive a flavor; very delicate and pleasant; every leaf, including the outside ones, is tender and edible. It is served on the table like Lettuce with French dressing; or if cut up like Cabbage and served with mayonnaise or French dressing, it makes a splendid cold slaw. It can also be cooked like Cabbage, but it is without the strong Cabbage flavor and tastes more like Cauliflower. Our seed is Chinese grown, which is the only reliable stock for good solid heads. Prices, postpaid, pkt. 10c; oz. 30c; 2 oz. 50c; ¼ lb. 95c.

Buckbee's "Full of Life" Seeds Are Bred for Disease Resistant Qualities

Buckbee's Christmas King Cabbage

The Grandest Winter Cabbage
The Largest Cabbage in the World
The Longest Keeper and Surest Header

The grandest late Cabbage ever introduced. This truly wonderful late variety of our own introduction gives the greatest yields of any Cabbage grown. Thousands of acres are annually sown with this one kind; it is a favorite among the largest and most discriminating growers everywhere and none of them have ever been disappointed in the results.

Nine hundred and ninety-nine out of every thousand plants will produce marketable heads, which are of mammoth size, on good, rich soil, reaching the sensational weight of 60 pounds each.

The leaves are deep blue, very wide and overlapping each other forming tight, compact heads, which are all very uniform in size and in time of maturity, and are of the most delicious flavor, crisp and sweet. It never bursts, has but few outside leaves and can be planted closer than most sorts and will then produce a larger crop per acre than any other variety. It is the best Winter keeper; there is no other variety which maintains its fresh appearance so long after it has matured. It is also the best for kraut.

Buckbee's Christmas King is the finest late Cabbage known today; for the market, for shipping and for the home garden it has no superior. We have grown this variety for many years, but improved it continuously and it is today better than ever.

There is big money in Cabbage, but your harvest depends on the seed you sow. Always remember that the seed is the cheapest thing about your entire crop, therefore buy the best, regardless of price, buy the right varieties, and varieties that have been tried out and yield bumper crops in the North, South, East and West. These are Buckbee's Early Queen and Buckbee's Christmas King. Mr. W. Forbus, Bingham, Ill., writes: "Buckbee's 'FULL OF LIFE' Seeds are the best that money can buy. Last year nearly all the Cabbage that people planted here made nothing on account of the dry hot weather but Buckbee's Christmas King Cabbage made fine heads." We control the complete stock of Christmas King and offer the choicest "FULL OF LIFE" Seed of our own growing at the following reasonable prices. Send to Buckbee for the true "Christmas King."

Danish Grown Cabbages—Round Headed Varieties—Wonderful Keepers

Danish Ball Head.

Buckbee's Famous Great Dane Cabbage.

Round Head Danish.

Buckbee's Famous Great Dane

The Hardest Headed Late Cabbage. The Gardener's Favorite, the Best Shipping and Longest Keeping Cabbage.

For years large quantities of Danish Cabbage have been imported to our leading markets, the heads being of such solidity that the demand has been far in excess of the supply, and always at a price far above the ruling market rate. To get to the source of this supply we sent an expert to Denmark, who after careful inspection of the Cabbage-growing localities found at the Island of Amagar the GREAT DANE Cabbage, which he considered by far the finest and most productive of all the types and strains of the Ball Head Winter Cabbage grown in Denmark, and he contracted with its originator for all the seed he could supply.

We give herewith the description of this great Cabbage—by the originator, Mr. Torgeson: "For more than twenty years I have worked in perfecting this variety. The stem is medium sized, heads are almost as round as a ball, of good size, perfectly solid, very fine grained, of the best quality. They average larger and heavier, also mature earlier than the other strains of Hollander or Ball Head grown here. Because of the larger size, heavier weight, greater solidity of its heads, its unequalled keeping and shipping properties and its more tender quality, it will supplant all other varieties for winter use. I cannot too highly recommend it to gardeners in your land (America)."

We control the entire seed supply and offer the choicest "FULL OF LIFE" Seed (grown by the originator in Denmark), at the following reasonable prices. Send to Buckbee for the true "Great Dane."

Pkt. 8c; oz. 30c; 2 oz. 55c; ¼ lb. \$1.05; ½ lb. \$1.90; lb. \$3.50.

New Round Head Danish

A Short-Stemmed Type.

Following the variety name in each column below are complete scales of prices of 100 to 5000 plants. The prices which appear opposite each variety apply to that sort only and not to a combination of varieties. For example you can order 500 plants of any one variety at the 500 price but if you wish 500 plants of five different varieties you should remit for them at the 100 prices on each sort. Regardless of how many varieties you may order, figure the price of each separately, the same as though you were ordering that variety only.

BUCKBEE'S EXTRA EARLY CHIEF CAULIFLOWER

Buckbee's "Full of Life" Seeds Are Bred for Disease Resistant Qualities

The Earliest Grown—A Sure Header—Drought Resister—Large Solid Heads of Snowy Whiteness

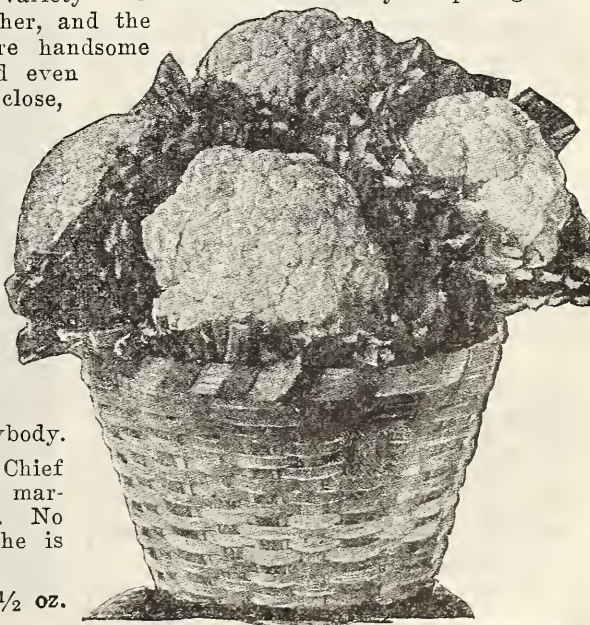

The best variety for either market or family purposes, by far the earliest and surest large header and the most profitable grown. The greater part of Cauliflower seed offered is of European growth, but after years of careful study and perseverance we are able to offer this thoroughbred American variety—"CHIEF." It is of very compact growth, with very short stalks. The plants can be set very close together, and the leaves growing upward naturally protect the heads, which are handsome beyond description, measuring fully 12 to 15 inches across, and even more under careful cultivation; they are pure snow-white, very close, compact and of the most superior quality. The heads being so extremely solid and deep, weigh heavier than any other early variety.

It can be used for early or late planting, for forcing or the open ground; used any way, we recommend it with the full assurance that it will give entire satisfaction and that it is not surpassed by any other variety in earliness and sure heading.

In no vegetable is there so vital a relationship between seed and crops as in the Cauliflower. We make Cauliflower a specialty and we know Extra Early Chief will never fail to please the most exacting; it is a thoroughbred, pedigree-strain, the grandest, large-heading, early Cauliflower ever grown. We have sold it for years, supplying the largest Cauliflower growers with it in every part of this country and have received nothing but praise from everybody.

Comparative tests have proved conclusively that Buckbee's Chief matures earlier, is a surer and heavier cropper and produces more marketable heads per acre than any other Cauliflower of equal size. No grower of Cauliflower need fear the outcome of the crop if he is relying on this superb, world-beating variety.

HENDERSON'S FINE EARLY SNOWBALL, Pedigree Seed Large Solid White Heads—A Sure Cropper.

Certainly a fine variety, a great favorite with market gardeners and a standard throughout the country; very early, close growing, of compact habit; is well adapted for forcing under glass during the winter and spring. BUCKBEE' "FULL OF LIFE" CELERY

Buckbee's "Full of Life" Seeds Are Bred for Disease Resistant Qualities

Buckbee's Easy Blanching Celery

The Easiest Blanching and longest Keeping Celery Ever Grown

A most valuable Celery of recent introduction. An entirely new and distinct variety, and the only easily blanched green or long-keeping sort known. It is already quite extensively grown by the most progressive Celery growers, and is bound to become one of the most popular varieties in this country.

Its remarkable combination of easy blanching and long-keeping qualities—not found in any other variety—make it at once the most valuable of all Celeries for those who grow for market as well as for all private gardeners, both for an early crop and for Winter use.

The plants are of strong and stocky growth with green foliage, showing a slight tinge of yellow in the inner leaves. The stalks are very large, heavy, thick and solid with shallow ribs and with extra large and firm hearts.

Our strain blanches so quickly and easily that even those who have never been successful in growing good Celery can now produce Celery equal in quality and appearance to that grown by professional growers and can enjoy this wholesome vegetable during the season.

Easy Blanching is of most attractive appearance, largely on account of its large, finely colored heart, and the quality is superb, tender and brittle, with an excellent nutlike aromatic flavor.

Easy Blanching is displacing Golden Self Blanching wherever it becomes known, as it is less liable to blight and is far superior to it in eating and keeping qualities. It is a trifle taller, fully as stout and ready for the market about two weeks later than Golden Self Blanching, but when bleached and ready for sale it can hardly be distinguished from that variety.

BUCKBEE'S PERFECTED KALAMAZOO

It is an acknowledged fact that more good Celery is grown in the famous "Kalamazoo Celery Fields" than anywhere in the country. For years our heaviest sales of Celery Seed have been in that section, and we have devoted much time to the improvement of the justly celebrated variety grown in that section, and **Buckbee's Perfected Kalamazoo** will be found greatly superior to the old strain. The stalks are quite thick, solid, crisp and of creamy-white color, growing very uniform in size and shape. It is profitable alike for market or family use. There is no waste in preparing it for the table. Pkt. 8c; oz. 30c; 2 oz. 55c; ¼ lb. \$1.05; ½ lb. \$1.90; lb. \$3.50.

BUCKBEE'S "Full of Life" CELERY

Buckbee's "Full of Life" Seeds Are Bred for Disease Resistant Qualities

BUCKBEE'S GOLDEN YELLOW SELF-BLANCHING Originator's French Grown Seed.

This is the strain used by gardeners and extensive growers in every large Celery district in the United States. No other strain of seed gives such universal satisfaction, and it is without question the most popular and dependable early strain of Celery grown. The plants are medium sized, stocky, and the stalks crisp, solid, heavy and of a yellowish-green color when young, but as they mature the inner stems and leaves turn a beautiful golden yellow, which adds much to their attractiveness and makes the work of blanching much easier. The handsome color, crispness, tenderness, freedom from stringiness and fine nutty flavor of this variety make it only necessary to be tried in order to establish it as the standard of excellence as an early sort. Pkt. 10c; oz. 95c; 2 oz. \$1.75; 1/4 lb. \$3.25; 1/2 lb. \$6.25; lb. \$12.00.

An early maturing sort, only a few days later than Golden Self-Blanching, and unsurpassed in shape and quality. The plant is of medium height, but very stocky and heavy. Comparative tests made by Sweet Corn experts throughout the country as well as at Rockford Seed Farms have proven it to be from three days to a week earlier than Cory, making it very desirable, not only for family gardens, but an especial boon to market gardeners who desire to have the first Sweet Corn in market. Ears are of good size, well filled with large grains to the very tip. Many of the ears contain from ten to twelve rows while the Cory generally has only eight rows. BUCKBEE'S PRIVATE STOCK EVERGREEN

Acknowledged the Best Standard Late Sweet Corn.

This Sweet Corn as now improved is the best for main crop. The illustration distinctly shows the formation and size of grains and the manner in which they are set on the cob, which is small in comparison to the size of the ears, making this strain of Evergreen Sweet Corn the most preferable variety ever offered for main crop. For table use the quality of Buckbee's Private Stock Evergreen Sweet Corn cannot be excelled. It is very tender, sugary, and remains a long time in condition suitable for cooking; coming into market at a time when the main crops are being sold, these are very important conditions. For canning purposes Buckbee's Private Stock Evergreen Sweet Corn will prove most satisfactory; its large ears, with long, slender grains, make by far the most saleable canned corn, and it out-yields all other varieties. Many of our customers who made trials of this splendid Sweet Corn the past year, report yields of over 200 bushels of ears per acre. You cannot possibly be disappointed by planting Buckbee's Private Stock Evergreen. Pkt. 10c; ½ lb. 22c; lb. 40c.

Something in Sweet Corn that makes everybody talk Early Sunrise as the very best introduction to present date. Our seed stock is carefully grown and selected with the sole object of keeping it up to the highest standard of excellence as the earliest, largest and best on record. This is a very distinct variety, which was originated many years ago by a market gardener in northern Iowa. With us it always proved earlier than any other so-called extra early variety of other seedsmen. The ears are about 6 inches long, 10 to 12-rowed; they are very uniform and handsome and have a small white cob. Postpaid, pkt. 10c; ½ lb. 25c; lb. 45.

BEAN

Buckbee's New Monarch Wax Bean

The Only "Sure Crop" Wax Bean Ever Grown.
Heavy Yielder. Entirely Stringless. Large Pods. Beautiful
Color. Sure Cropper. Crisp and Tender.

Our New Monarch Wax Bean is a very sturdy and vigorous grower and as near rust proof and disease resistant as it is possible for a bean to be. One of the earliest wax beans ever grown, starting to bear within 60 days after planting and continues its bearing season longer than most others. Pods are of splendid quality, fleshy, and are stringless at practically all stages of their growth. From 6 to 7 inches long by $\frac{1}{2}$ inch through and almost round, they make a wonderfully heavy yield, and the beautiful golden yellow color sells them easily. Seed is long, oval, medium size and purplish black color. In common with other black-seeded varieties, this bean may be planted quite early in the season. Practically rust proof, owing to the habit of the plant which branches freely but is perfectly sturdy and upright, every branch carrying a head of magnificent pods. As nearly all of the pods are produced underneath the foliage, excessive heat does not affect it in the least, a very valuable feature whether grown for home, the market garden or for shipping long distances. As a canning bean Buckbee's New Monarch is without an equal, as the pods are long enough to fill the jar and the beautiful color is retained after cooking. We control the entire stock of Buckbee's New Monarch Wax Bean. Pkt. 10c; $\frac{1}{2}$ lb. 35c; lb. 55c; 3 lbs. \$1.50. Postpaid.

The Crisp as Ice Lettuce. Extra Early. Sure Heading. Long Keeping. Finest Flavor. Crisp, Tender and Delicious.

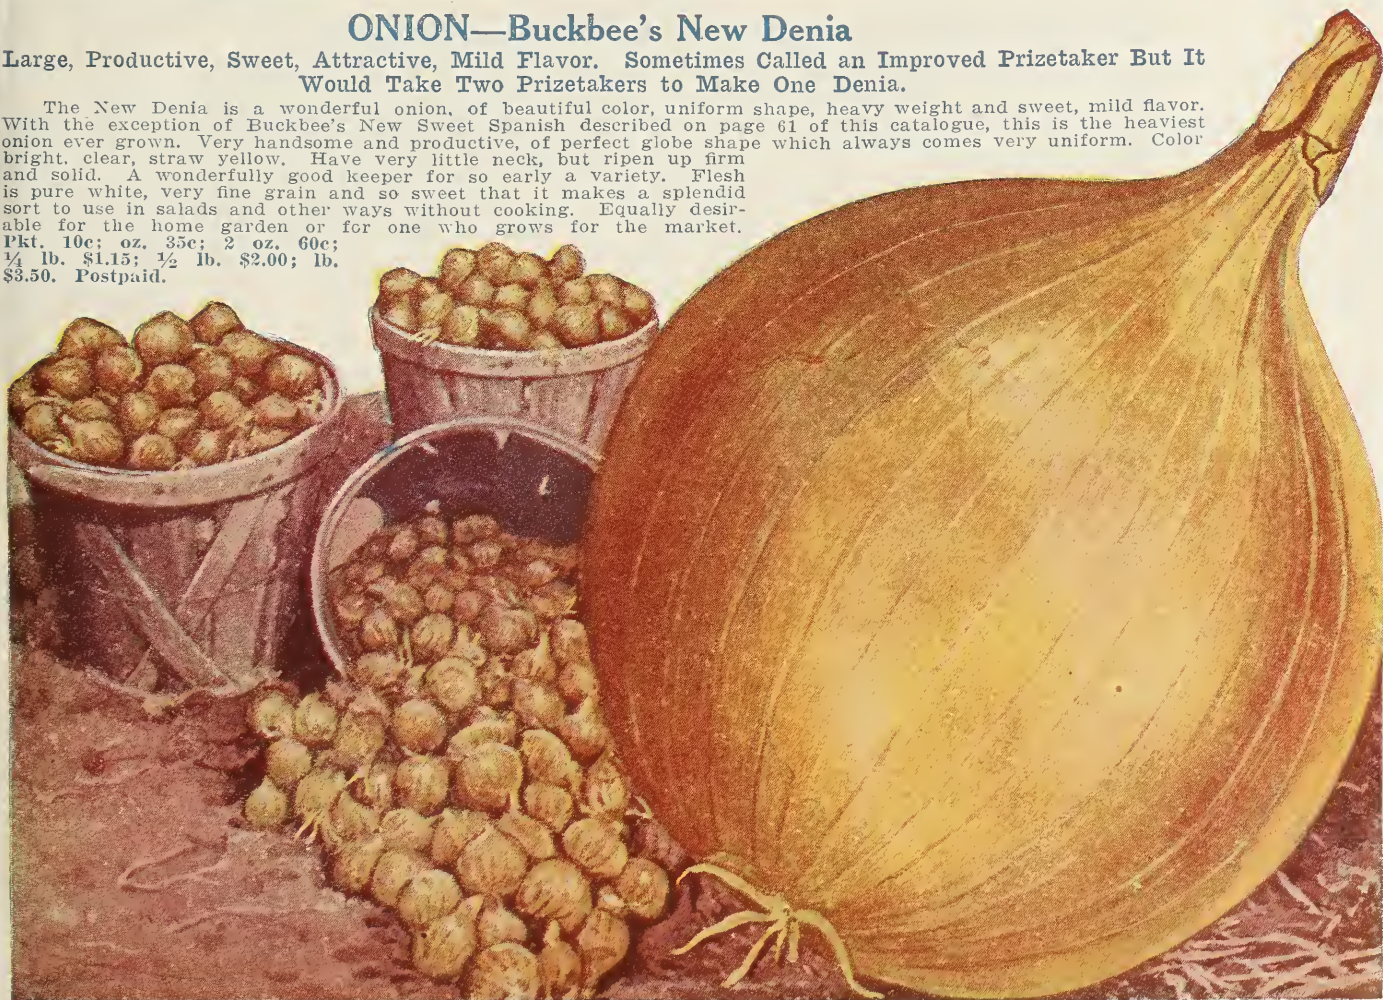

Besides being one of the most popular vegetables, the heading varieties of lettuce are used every day in the year. Our New Klondyke is distinct, having thick, dented outside leaves, with a beautiful creamy white or buttery center. Makes an extremely early, very solid head of good size and excellent quality. The outside color is a very desirable shade of green and the head is very compact for so large a variety, desirable shape and easily grown. Very fine and solid with incurving leaves, blanching the center quickly and satisfactorily. The quality is extra good, sweet and exceedingly crisp even in the hottest and driest weather. Can be grown with equally good results in the open ground for summer and fall use, or in frames or in the greenhouse for fall and winter use. Our New Klondyke, we believe, is the most dependable variety of lettuce that can be grown. Every one can be sure of head lettuce with this new variety. ONION—Buckbee's New Denia

Large, Productive, Sweet, Attractive, Mild Flavor. Sometimes Called an Improved Prizetaker But It Would Take Two Prizetakers to Make One Denia.

The New Denia is a wonderful onion, of beautiful color, uniform shape, heavy weight and sweet, mild flavor. With the exception of Buckbee's New Sweet Spanish described on page 61 of this catalogue, this is the heaviest onion ever grown. Very handsome and productive, of perfect globe shape which always comes very uniform. Color bright, clear, straw yellow. Have very little neck, but ripen up firm and solid. A wonderfully good keeper for so early a variety. Flesh is pure white, very fine grain and so sweet that it makes a splendid sort to use in salads and other ways without cooking. TOMATO

Buckbee's New Masterpiece

Vigorous Upright Growing or Tree Tomato.
Wonderful, Firm and Solid. Beautiful
Purplish Crimson Color. Rich
Red Flesh.

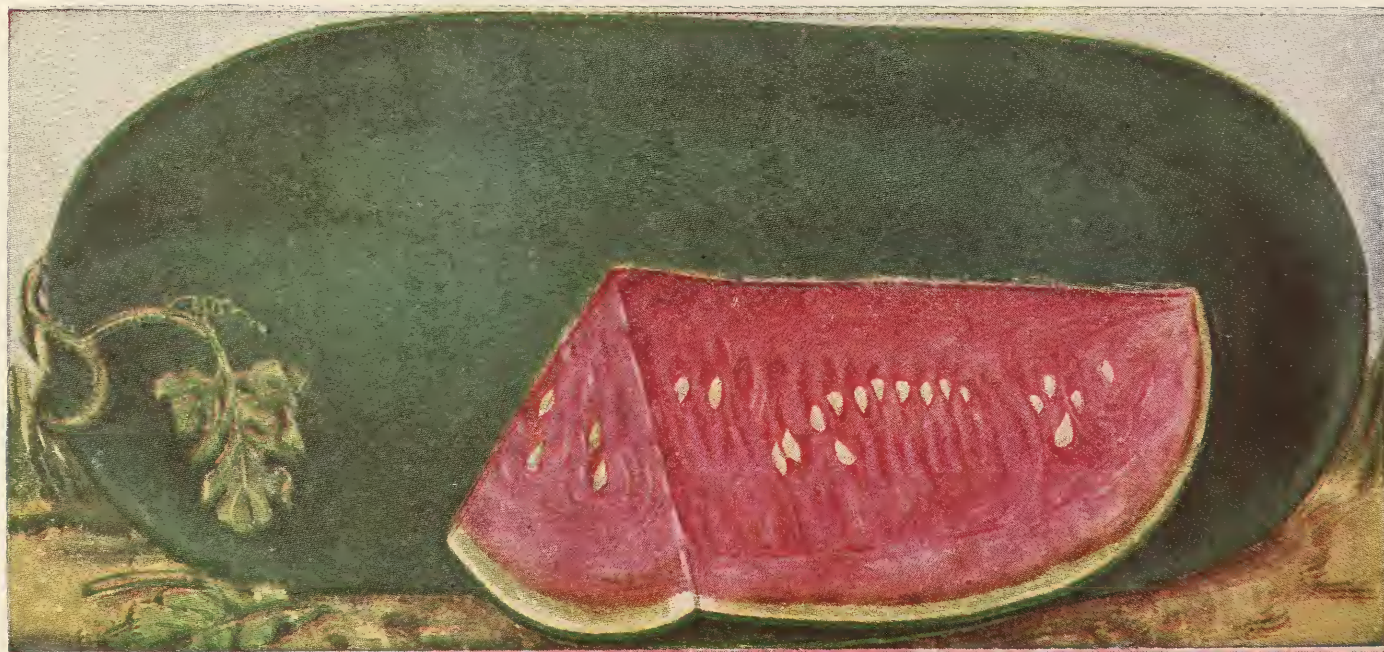

Buckbee's Tomatoes have been the Acknowledged Leaders for over 50 years and our varieties are planted by hundreds of thousands each year. In Buckbee's New Masterpiece we have the acme of perfection—not the largest grown but one of the best. In size it is just right for any purpose for which tomatoes are used, cooking, canning, shipping or slicing for the table. The tomatoes have thick solid flesh, there being no pulp or core, and thus cook without waste. The deep color is retained after cooking, making it especially desirable for canning. The skin is thin but strong, making an ideal shipper. Flesh is solid and of a beautiful dark red color. It has few seeds, making it a tomato that can be eaten entirely without waste. The habit of growth is exceptional in that it grows upright, throwing out branches from the main stalk and holds the fruit off the ground. Tomatoes grow mostly in clusters weighing from 10 to 20 ounces each. Strong and vigorous grower, bearing uniform sized fruits continuously until frost. We cannot recommend Buckbee's New Masterpiece Tomato too highly. Pkt. 15c; ½ oz. 40c; oz. 75c; 2 oz. \$1.25; ¼ lb. \$2.25; ½ lb. \$4.00; lb. \$7.50. Postpaid.

WATER MELON—Buckbee's Everbearing Always Sweet

The Greatest Yields and Sweetest Flavored Melon Grown. Good Shipper. Fine Keeper. Heavy Yields. Large Size. Sweetest Flavor. Finest Quality.

This new melon has made a sensation wherever it has been grown. Its surpassing merits are its large size, enormous yield and its splendid shipping and keeping qualities. It will produce more large, marketable melons under the same conditions than any other long variety and where hauling and shipping to distant markets is done, this melon never fails to give satisfaction. It is adapted for either shipping or home use. It is medium early, beautiful, very long and quite thick, often producing melons weighing 75 lbs each, and the average weight is about 40 lbs. The rind is firm and leathery, rather thick, standing rough treatment in transit, and is a splendid shipper. It has a deep green skin with dark irregular stripes and on close inspection very fine, veinlike, crisscross markings may be observed. The flesh is solid, is intensely red to the rind and is of superb quality. This is the sweetest, crispiest, most juicy and at the same time most solid melon ever introduced, never having a hollow or pithy center when ripe. Everbearing—Always Sweet is an excellent keeper. It may be left in the field three weeks when ripe and then be shipped to a distant market and keep well. It has been grown the past few years in different places in the South for shipping North and the commission merchants of New York, Chicago, etc., claim that it will outsell any other variety on the market time and again.

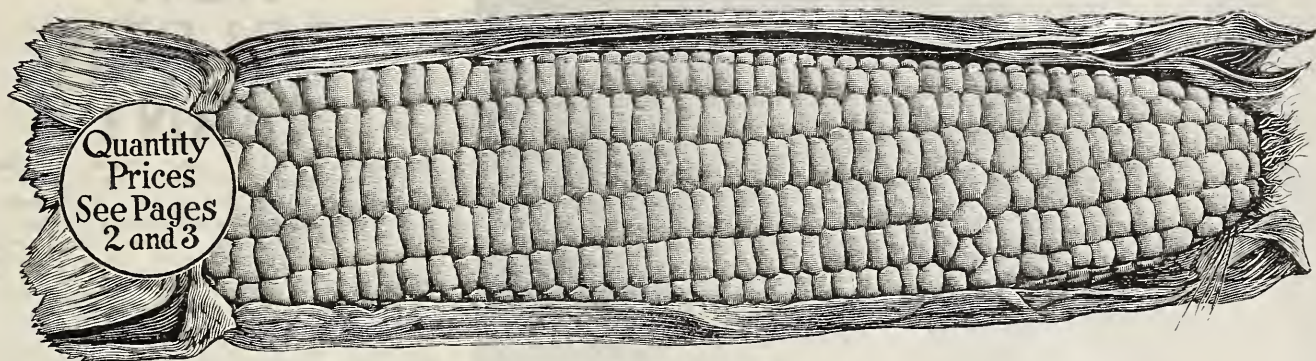

Our seed is the best and the purest and is secured from Melons weighing not less than 40 pounds and is absolutely dependable. Pkt. 10c; oz. 25c; 2 oz. 40c; ¼ lb. 75c; ½ lb. \$1.25; lb. \$2.00. Postpaid.

EARLY VARIETIES—Cont'd

Buckbee's Everbearing.

Buckbee's Everbearing

If You Want Delicious Corn on Your Table the Fourth of July Plant This Extremely Hardy, Early Maturing, Large Eared Sort.
We have produced in this early corn a variety which stands alone as a money maker. It is in the same class as the Earliest of All Sugar Corns, considerably larger and, best of all, contains a sweetness equal to most true sugar varieties. It has the power of germination under conditions where all others have failed and can safely be planted much earlier than any true sugar corn on account of its extreme hardiness. It adapts itself to any kind of soil, either sand or heavy clay.

It is as large as Stowell's Evergreen. The fodder grows 6 feet high; no small item to a gardener; and, as a proof of its quality and sweetness, we have a continuous call for "Everbearing" from our customers year after year. The ears are of good size and covered with kernels clear to the end of the cob. Each stalk will produce one to two well developed ears. Now, if these are picked when mature, one or two and even four more ears will set and develop on the same stalk during the next two to four weeks. Three or four dozen hills will supply a good-sized family for weeks. Postpaid, pkt. 10c; ½ lb. 20c; lb. 35c.

Black Mexican

Delicious Sweetness. Cooks Clear White.

The stalks are about 6½ feet high. The ears are about 8 inches long and are usually eight rowed. Postpaid, pkt. 8c; ½ lb. 20c; lb. 35c.

The grain is large, broad, very white and of sweet, delicious quality. The plants are vigorous growers of medium height and are very prolific. CHRISTMAS SALADS AND CHICORY

Buckbee's Christmas Salad.

BUCKBEE'S CHRISTMAS SALAD

The Very Choiceest of All Winter Salads.

This is the new salad which is sold at such high prices by dealers of fancy fruit during winter and is so much relished by epicures at the leading hotels.

The blanched heads are the edible portion of the plant and they are ready to use as soon as they show above the sand, which should be in two or three weeks.

The heads are oblong and very solid, they blanch ivory white and are often quite large, equal to a compact Cos Lettuce. When lifting cut whole head with small portion of the roots attached to it to hold the leaves together. They are generally eaten raw with French dressing and are the tenderest and most delicately flavored of all salads. Pkt. 10c; oz. 30c; 2 oz. 50c; ¼ lb. 90c.

WITLOOF CHICORY OR FRENCH ENDIVE

A delicious winter vegetable which is really a variety of chicory, but is sometimes called French Endive and can be eaten raw as salad or boiled. Being available in winter, will make a profitable crop. It can be easily grown by anyone. The seed should be sown in the open ground not later than June, in drills 12 to 18 inches apart, thinning out the plants so that they will stand not closer than 3 inches. Pkt. 7c; oz. 25c; 2 oz. 40c; ¼ lb. 70c.

CHICORY—LARGE ROOTED OR COFFEE

Dried and prepared roots are used quite extensively as a substitute for and an adulterant of Coffee. Pkt. 5c; oz. 15c; 2 oz. 25c; ¼ lb. 45c.

ASPARAGUS CHICORY

A good healthy and tasty substitute for the well known "Asparagus" and can be produced from seed the first year in abundance. The sprouts of this plant, when cut fresh, boiled in salt water, and served either warm, or as a salad, make a most excellent substitute for the genuine article. It can be blanched and eaten raw the same as celery and is preferred by many to that delicious vegetable. Pkt. 10c; oz. 45c.

Chervil, Curled.

CHERVIL

CURLED—Hardy annual, worthy of more general use for flavoring and garnishing. More beautiful than Parsley. Greatly superior to the old, plain variety, earlier, more handsome, having fully as fine perfume and flavor. Pkt. 10c; oz. 25c; 2 oz. 45c; ¼ lb. 80c.

CRESS

NEW UPLAND CRESS—Has the highly prized flavor of Water Cress. Its usage should be more general, as it is of as easy culture as Spinach. It is a perennial plant and can be grown for several years without renewal. Pkt. 8c; oz. 25c.

CURLED OR PEPPER GRASS—Much used with Lettuce, to the flavor of which its warm, pungent taste makes a most agreeable addition. Pkt. 5c; oz. 12c; 2 oz. 20c; ¼ lb. 35c.

TRUE WATER CRESS—Distinct from the last; thrives only when its roots and stems are submerged in water. Grown best along moist banks of small, rapid streams, or in a tub, in water-covered soil. The plants will increase rapidly by self-sown seed and extension of the roots. One of the most delicious of small salads. Pkt. 8c; oz. 40c.

True Water Cress.

Chufas, or Earth Almond.

CHUFAS OR EARTH ALMOND

In sweetness and flavor very much resembles a cocoanut or almond and greatly liked by all children. Vary in size from a large pea to a hazelnut. The nuts grow under and very near the surface of the ground, easily reached and relished by pigs and poultry. As soon as the crop is grown, turn these animals into the field, thus saving the labor of harvesting and feeding. Pull up a few plants by the roots and leave them on the ground, and when either hogs or chickens get a taste of them they will go over the whole field in search for them. Very prolific, nutritious and fattening. Pkt. 8c; ¼ lb. 15c; ½ lb. 25c; lb. 45c.

CORN SALAD

This delightful salad is used during the late Fall, Winter and Spring months as a substitute for Lettuce. It is also cooked and used like Spinach. Pkt. 6c; oz. 12c; 2 oz. 20c; ¼ lb. 35c.

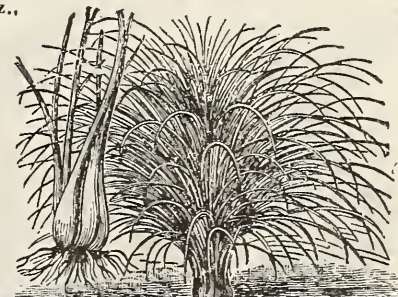

Corn Salad.

CHIVES

Also Called Schnittlauch.

Chives are perfectly hardy perennial plants of the Onion type. They are grown for their small leaves which are produced very early in the spring and are used for giving a mild onion flavor to various dishes. Easily raised from seed. Pkt. 10c; 3 pkts. 25c; Selected clumps or plants by mail, 20c; 3 for 50c; \$1.50 per doz., postpaid.

BUCKBEE'S "FULL OF LIFE" LETTUCE

Buckbee's "Full of Life" Seeds Are Bred for Disease Resistant Qualities

Buckbee's Earliest Forcing.

BUCKBEE'S EARLIEST FORCING

The Earliest Lettuce Grown.

For those who like a large, thin, exceedingly tender leaf, and for those markets which demand a large, loose cluster of leaves rather than a solid head, this is the best variety for forcing and growing in the open ground. The plants form a large, loose head, rich light green in color and blanch nicely. The leaves are very much blistered and crumpled, crisp and are of excellent quality. This is the earliest of all Lettuce; it is a splendid shipper, of beautiful appearance and keeps in good condition better than any other sort. It is a money-maker for the market gardener, either if sown under glass or outdoors, and is very satisfactory for the home garden. We control the entire stock of this variety. Pkt. 10c; oz. 20c; 2 oz. 35c; ¼ lb. 60c; ½ lb. \$1.10; lb. \$1.95.

BUCKBEE'S "FULL OF LIFE" LETTUCE

Buckbee's "Full of Life" Seeds Are Bred for Disease Resistant Qualities

Buckbee's Mammoth All Head Lettuce.

BUCKBEE'S MAMMOTH ALL HEAD LETTUCE THE WORLD'S ONE UNBEATABLE HEAD LETTUCE

Entirely New and Distinct. The Most Wonderful Market Gardeners' and Shippers' Lettuce Known. The Best Smooth-leaved, Firm-heading, All-season Lettuce. Slow to Run to Seed, Unaffected by Hot Weather. A Sure Header and a Large Header.

Mammoth All Head is a great improvement on the well-known Big Boston Lettuce. It forms larger heads, more compact and tightly folded, and is about ten days earlier than either the white or black seeded variety. It is without the reddish brown tinge on the leaves and, furthermore, it can be sown all through the growing season, and stands heat remarkably well. Is slow to run to seed, and will not scald or burn and will make a head when other varieties fail. In our repeated trials we have found it to be the best smooth leaved, firm heading Lettuce to grow through the summer months. Mammoth All Head is one of the earliest, large Cabbage-Lettuces grown, forming heads in six weeks from sowing, and the heads grow to a large size, often more than 12 inches across, are solid and compact with few outer leaves; of an attractive bright light green color, never spotted or reddish in any part. They blanch creamy white, have decidedly buttery flavor and are crisp, tender and sweet. This is the grandest, most valuable Lettuce ever introduced. There is no other variety giving such general satisfaction under so many varying conditions. Grown in the open ground, or forced in cold-frames or cool greenhouses, it produces a perfect head of extra large size, which never fails to please both grower and user. Pkt. 10c; oz. 25c; 2 oz. 40c; ¼ lb. 65c; ½ lb. \$1.20; lb. \$2.25.

EARLY PRIZE-HEAD

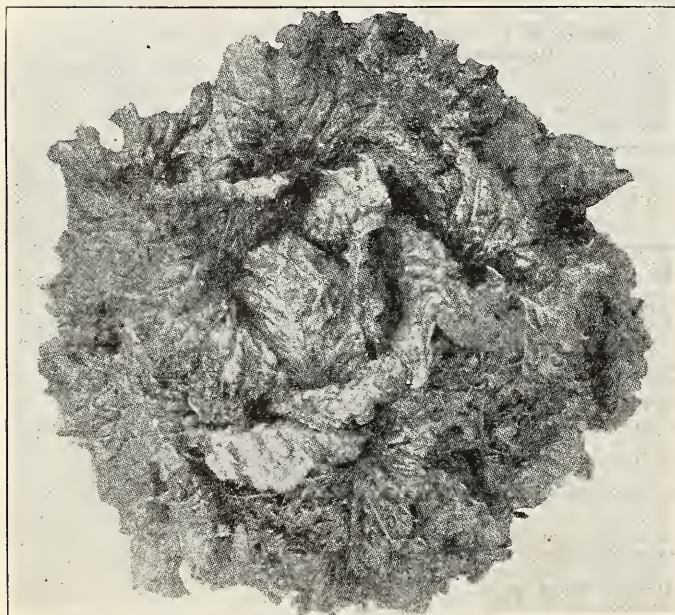

Crisp and Tender. Bright Green Leaves Edged with Brown.

This old standard sort still stands at the head of the large, thin-leaved clustering sorts for the home garden. Exceedingly tender, crisp and sweet. There is more Prize Head Lettuce grown in this country than any other variety. It is a most reliable variety for all-the-year-round cultivation. Leaves light brown, varying to bright green. Pkt. 6c; oz. 15c; 2 oz. 28c; ¼ lb. 50c; ½ lb. 95c; lb. \$1.75.

BUCKBEE'S MAMMOTH BIG BOSTON

Big, Compact, Tender, Cream White Heads.

A very popular variety for Market Gardeners. It heads well in the open ground during cool weather in Spring and Fall and is grown very extensively in the South for shipping North during the Winter. It is also a fine forcing variety for cold-frames during the Winter months. Our strain is very hardy, sure to head and produces solid heads of large size, often 10 to 12 inches across, which are slow to go to seed. The leaves are thin, hard and crisp, comparatively smooth but wavy at the edges and are of bright light green color, slightly tinged with reddish brown. The inner head blanches to an attractive greenish-white. The quality is excellent. Our seed of this famous variety is used by thousands who purchase it year after year, testifying by that to its wonderful quality. Pkt. 7c; oz. 20c; 2 oz. 35c; ¼ lb 60c; ½ lb. \$1.10; lb. \$1.95.

Buckbee's Ice Drumhead—The Longest Keeping Head Lettuce.

BUCKBEE'S ICE DRUMHEAD

A Sure Header, Slow to Run to Seed, Unaffected by Hot Weather. Crisp, Tender and Delicious. Absolutely Free from Bitterness.

It grows rapidly; heads very early, only little later than May King, but the heads are much larger, as large as Summer Cabbage and as solid. The leaves are thick, broad, light green outside, changing toward the center from a golden yellow to a creamy white. The heads are as palatable as beautiful; very tender; never bitter; of deliciously sweet buttery flavor. Buckbee's Ice Drumhead is a sure header and an all header. It stands hot weather better than any other variety of its class. Can be used when quite young and until it runs to seed. It is immensely popular especially in the Northern and Central States, and justly so, as it is unexcelled in its superb quality, beautiful appearance, heat resistance, keeping and shipping qualities. We control the entire stock of this variety. Pkt. 10c; oz. 18c; 2 oz. 35c; ¼ lb. 65c; ½ lb. \$1.05; lb. \$1.90.

BUCKBEE'S EXTRA EARLY MAY KING

The Earliest Head Lettuce Grown.

An ideal lettuce for planting in the open ground in Spring, as well as in Fall, and also splendid for forcing. Extremely hardy and very quick growing. Plants grow from 7 to 8 inches in diameter with outer leaves so closely folded that the plant is practically all head. Outer leaves are light green slightly tinged with yellow, of a specially fine rich, buttery flavor. The round, compact heads are very solid, so that they will carry well to market. It attains a size suitable for use before any other large heading variety. Buckbee's May King is an extra fine strain and is much earlier than that mostly sold by others. Buckbee's "Full of Life" Seeds Are Bred for Disease Resistant Qualities
BUCKBEE'S NEW GIANT WONDER GEM

An Entirely New and Distinct Melon, Magnificent in Every Respect, the Largest in Size and Finest in Quality.

Resembling the old Emerald Gem in shape, color and flavor. Buckbee's New Giant Wonder Gem, however, is much larger; in fact, it is the largest good melon growing, weighing under ordinary conditions as much as seventeen and eighteen pounds each and with special care much more, and it is also much more netted and of good shipping quality.

The melons are globular, slightly flattened, deeply but irregularly ribbed, covered more or less with shallow netting; the skin is of rich emerald green color while young, becoming slightly tinged with yellow as the fruit matures. The flesh is of deep, rich salmon color, about 3 inches in thickness, thicker than the flesh of any other sort we know of; the melon is indeed almost all solid meat, the cavity being very small, hardly large enough to accommodate the seeds. Sterling quality and luscious flavor. Vines vigorous, resisting the attacks of insects and blight.

Sells at good prices, as they closely resemble in appearance and flavor the large, greenhouse grown melons sold at fancy prices at the fruit stands. Pkt. 10c; oz. 15c; 2 oz. 28c; ¼ lb. 50c; ½ lb. 95c; lb. \$1.75, postpaid.

BUCKBEE'S NEW STRAWBERRY

Always the Same—Always the Best.

Flavor like that of a strawberry, hence the name. It grows to be a desirable market size; the fruits weigh from 6 to 8 pounds each. Its outside appearance compares favorably with the green nutmeg of old, turning to a yellowish hue, as it were, over night, when fully ripened. Its smooth, deep flesh is of an attractive orange-red color, particularly soft and melting, and with that exceptionally delicious strawberry flavor leaves nothing more to be desired in a musk melon. Mr. Beck, the veteran melon grower, who honored us with the introduction of the Strawberry Musk Melon, writes: "This grand melon was originated by planting the most luscious variety of strawberries between every other row of a New Hybrid Musk Melon that I had previously perfected." While the stock of this new acquisition is but limited, we are going to offer it as follows as long as our seed supply lasts. Price, choicest seed of our own growing. NEW VALENCIA CHRISTMAS MELON

The Best Long Keeping Melon.

A great acquisition and destined to become a standard vegetable. These are late maturing Musk Melons, which are largely grown in California, and hundreds of cars of them are shipped from there to the East every year. They do not ripen on the vines in the North, but are gathered there before freezing weather and if properly stored all Melons, even half grown ones, will ripen gradually. Sow and cultivate like other Musk Melons. Do not pick until the light streaks become quite yellow. Stow away so they do not touch each other in a cool, dark, dry place. When the rind becomes slightly softened and moist they are ready to eat. Some of the Melons will actually keep until February. The seed cavity is small and the flesh thick, of fine texture, juicy and palatable to within one-quarter inch of the skin. Pkt. 10c; oz. 25c; 2 oz. 40c; ¼ lb. 75c; ½ lb. \$1.30; lb. \$2.50.

New Bush Musk Melon

The Vineless Gem of the Garden.

The bush habit of growth of this new variety enables it to be grown in small gardens, where the vine sorts could not be grown for lack of room, and they yield about twice as much on the same piece of land as the vine sorts. The fruits are of the popular "Jenny Lind" type, but larger, averaging 5 inches in diameter; they vary somewhat in shape from flattened-round to almost spherical; the ribs are shallow, the surface is dark green, but so densely netted that it appears almost russet colored. The flesh is very deep, edible almost to the rind and is colored light green flushed with salmon towards the center. The seed cavity is small. The quality is superb, lusciously sweet and juicy, with a cool, gratifying flavor and a delightful aroma. They ripen a little in advance of "Rocky Ford." The plants grow from 15 to 18 inches in length and two or three plants can be grown in a hill 2½ to 3 feet apart. Pkt. 10c; oz. 25c; 2 oz. 45c; ¼ lb. 85c.

BUCKBEE'S RARE AND DELICIOUS MELON NOVELTIES

Queen Ann's Pocket Melon

Sweet Scented or Melon Pomegranate.

A pretty climbing variety; fruit round, size of an orange, of yellow color, striped and spotted red. Flesh not edible; grown for ornament and its agreeable pungent fragrance, sweetly perfuming the room for days. Trained on trellises or arbors it is very ornamental. It is easy to grow. Cultivate like Musk Melons. Pkt. 10c; oz. 25c.

The Mango Melon or Vegetable Peach

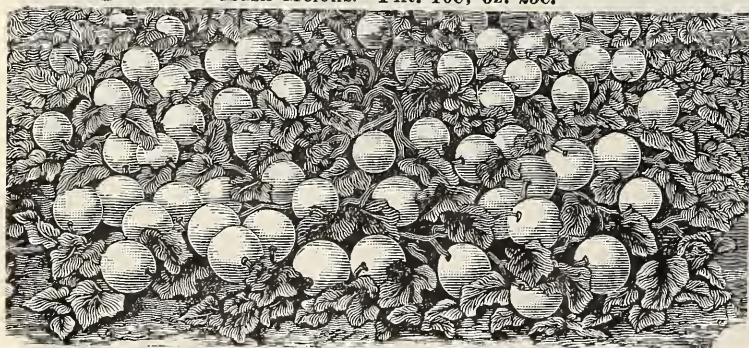

Very striking in color, most wonderful yielder. Vines of Mango Melon are somewhat smaller than the Musk Melon, requiring same cultivation. Fruit about the size, shape and color of an orange, somewhat russeted. For sweet pickles, pies or preserving they are splendid. In the West and Northwest, where fruit is scarce, they are rapidly becoming popular, as they are easily cultivated, enormously productive, and can be used in every way as the Peach, except that they are not quite as sweet and are not used raw. Pkt. 10c; oz. 25c.

Buckbee's New Garden Lemon

Resembles the Mango Lemon in manner of growth, but is distinct in that the unripe fruit is striped with very dark green spots, nearly black, and when ripe is not russeted. Fruit a trifle smaller than the Mango Melon. Has a finer flesh and most desirable acid flavor, thus dispensing with sliced lemon, which is so important in putting up the Mango Melon. Unexcelled for general canning purposes. Cultivate similar to Musk Melons. It is an enormous yielder. Pkt. 10c; oz. 35c.

Will you not try it this year? This is an early variety, ripening about a week or ten days later than the extra early kinds offered in this book. It is a grand, good shipper, has a firm, solid rind, not too thick, yet will stand the most severe handling. The outside skin is of a rich, dark green color, shaded with faint stripes of a somewhat lighter color. Certainly the finest appearing Melon ever grown for market, shipping or table purposes. MONTE

CRISTO

Last year we raised a fine crop of Tomatoes. Lots of them weighed a pound. We irrigated less than a sixteenth of an acre. Sold \$54.00 worth, used and gave away that many and the vines were full when frost came.

T. E. STREPY, Hico, Texas.

I just received the bulbs and am much pleased with the condition in which they came and the generous extras which I seldom receive with my orders, and I sincerely thank you for your generosity. I feel sure I will have good results from all. Success to you.

BUCKBEE'S "Full of Life" WATER MELON SEED

Buckbee's "Full of Life" Seeds Are Bred for Disease Resistant Qualities

COLE'S EARLY

Cole's Early is not only one of the earliest varieties in cultivation, but it continues to bear throughout the season. The beautiful bright red flesh is crisp and of delicate texture—granulated, cool and sparkling. In flavor it is lusciously sweet and refreshing. The melons are not large, seldom over 12 inches in length by 9 inches in diameter, but what they lack in size is more than made up in number and solidity. The heart is large, there is little or no cavity and very few seeds—all solid flesh. Pkt. 7c; oz. 12c; 2 oz. 20c; ¼ lb. 35c; ½ lb. 60c; lb. \$1.00.

NEW CHILIAN

A new melon of splendid quality, which is already very popular on the Pacific Coast and is taking high rank elsewhere as its desirable characteristics have become more generally known. Fruits are nearly round or slightly oblong, skin rich deep green, mottled and striped with a still darker shade; flesh of decidedly bright vermillion red, remarkably fine grained, firm and sweet. Pkt. 7c; oz. 12c; 2 oz. 18c; ¼ lb. 30c; ½ lb. 50c; lb. 90c.

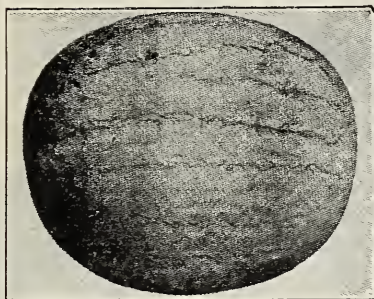

KLONDIKE WATER MELON

There is no question but that this is the sweetest melon grown—clear to the rind. Wonderfully prolific, early, long and continuous bearing and stands droughts without any lessening of its size or flavor. Pkt. 8c; oz. 18c; 2 oz. 30c; ¼ lb. 50c; ½ lb. 85c; lb. \$1.50.

BUCKBEE'S NEW WINTER WATER MELON

Fruits Can Be Gathered and Stored Until Christmas.

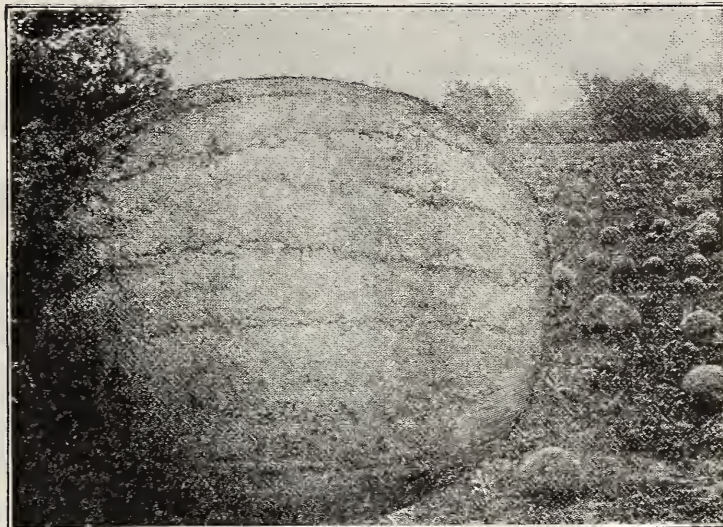

The Winter Melon is a great luxury. It is late to mature; very light in color with a suspicion of a stripe; size 10 inches in diameter; seed small shiny black, flesh pink, solid and stringless. The flavor is sweet, crisp and delicious. Like the Cassaba it should not be eaten right off the vine, but be allowed to ripen slowly after being picked. Pkt. 10c; oz. 15c; 2 oz. 25c; ¼ lb. 45c; ½ lb. 80c; lb. \$1.50.

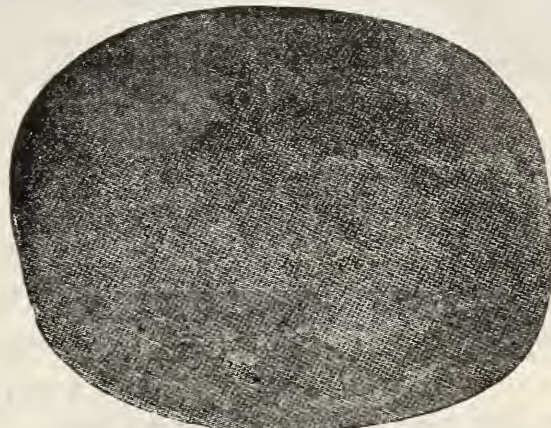

Baby Delight.

BABY DELIGHT

The Baby of the Water Melon, a delight for the grower on account of its extraordinary prolificness, yielding fully as much in weight per acre as any of the larger melons and being earlier than any other, always finds a ready market and brings very high prices; a delight also for the consumer on account of its convenient size and its luscious sweetness. This melon is almost round and measures from 5 to 7 inches each way, and weighs from 3 to 6 lbs. The skin is dark green, the rind is thin but strong. The flesh is of rich carmine color, always solid and of exceptionally sweet flavor. The seeds are very small, resembling apple seed, but of gray color. Pkt. 10c; ½ oz. 18c; oz. 30c.

Cole's Early Water Melon.

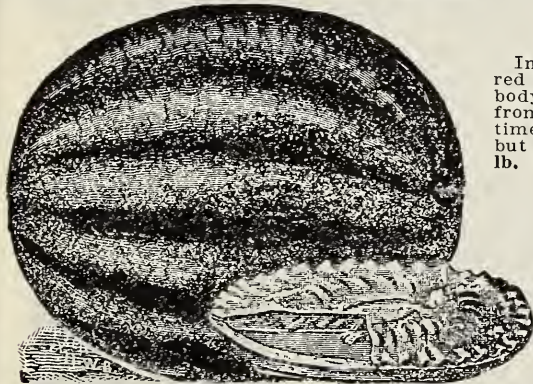

Harris' Early.

HARRIS EARLY

In form the melon is oval to oblong; beautifully striped with green and gray; bright red flesh, which is sweet and tender. It is very productive. It is the melon for everybody to grow who wants to be first in the market with fine large melons weighing from 20 to 40 lbs. It bears shipment very well. Harris Early ripens about the same time as Cole's but, having a tougher skin, it is a better shipper; it also grows larger, but for quality we prefer Cole's. Pkt. 7c; oz. 12c; 2 oz. 20c; ¼ lb. 35c; ½ lb. 60c; lb. \$1.00.

Buckbee's Sure Crop Mushrooms

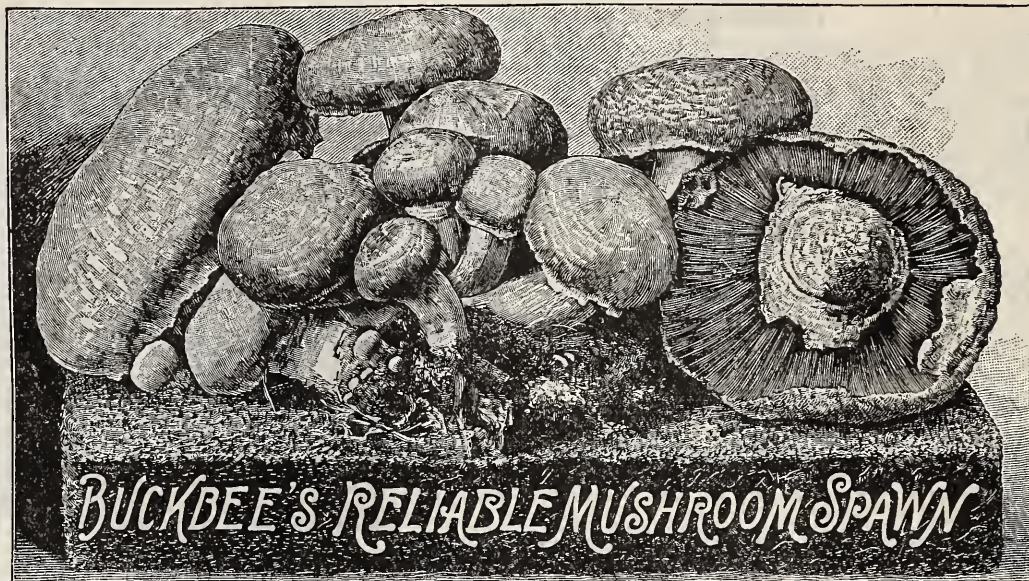

GROWING MUSHROOMS IS NOT DIFFICULT

Get Reliable Spawn. Start Right and the Results Are Certain and Profitable.

We furnish every buyer of Mushroom Spawn with explicit directions for growing. If they are followed, nothing is so certain as big success.

The Mushroom is a delicious, edible fungus. It produces no seed, but instead a white fibrous substance in broken threads called spawn, which is developed and preserved in horse manure and pressed in form of bricks.

No expensive equipment is or ever will be necessary for the propagation. The plain fact is that anyone who starts right can grow Mushrooms successfully. An abandoned outhouse, or waste space in one, a shed, a basement or a cellar can be used for growing Mushrooms and will answer the purpose excellently.

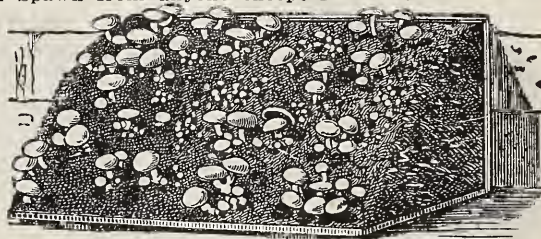

FACTS ABOUT BUCKBEE'S SURE CROP SPAWN

This Spawn is prepared exclusively for us by a specialist in this country who has not only devoted a lifetime to the work, but who is a profound student of the industry. His work has resulted in procuring the best and most reliable Spawn in the world. Under our contract it is impossible for the grower to secure any Sure Crop Mushroom Spawn from anyone except Buckbee.

We can safely assure all Mushroom growers, as well as those who have never grown any, but are on the point of trying it, that they will find Sure Crop Spawn to be all that is claimed for it and more. It produces Mushrooms true to type, in much greater abundance, of much earlier maturity and of much larger size than those grown by any other method, and these Mushrooms are in great demand at the very highest market prices.

In order to meet the demand for Sure Crop Spawn, and to provide against deterioration of its producing qualities, our arrangement with the producer is for frequent shipments which, coupled with the care we give it, renders it absolutely certain that our customers will all be furnished with Spawn that is fresh, of quick, vigorous growth and if they handle it properly will bring them big returns.

We have made the price as low as Spawn of such an exceedingly high grade can possibly be sold for.

Unexcelled Either for Home Use or for Market.

Buckbee's Genuine Prizetaker Onion has proved itself to be by far the handsomest, most productive and largest of all Yellow Globe Onions which are grown extensively today. Prizetaker is at once the largest and most handsome of all American Onions, and is renowned everywhere. It is grown with great success in all sections of the country, and is one of the few vegetables that attain great size and still retain perfect quality. It grows as easily as any other sort, and can be used for all purposes—the young plants as salad, the half-grown bulbs in early summer, and the perfect mature Onion practically at all times, for it keeps so well that it may be used almost the year round. It is esteemed not only in America, but in foreign countries. Soon after its introduction it was exhibited in London, and in the keenest competition with the products of the most skillful growers, earned an "Award of Merit" from the Royal Horticultural Society of England. Not only does it grow to a large size, but uniformly so.

The shape is true globe, broad at the base, tapering sharply at the top. It is so well bred that the tops dry down entirely when it ripens, leaving a clean, sound bulb, perfect in form, rich in color, and wonderfully solid. The outer skin is extremely mild in flavor, very much esteemed for slicing, baking and boiling; in fact, in whatever way it is prepared, it is unsurpassed. One of the chief departments of our seed growing business consists of growing Buckbee's Pedigree Red Wethersfield Onion for seed purposes only. Our stock has reached such a high point of merit that it is a household word everywhere that "Buckbee's Pedigree Red Wethersfield Onion Seed is the most reliable and produces more good marketable Onions per acre than any other offered." And from the many thousands of unsolicited testimonials which we have received from all over the country, we have every reason to believe that the time which we personally spend in our onion fields is truly appreciated by our many thousands of customers who stand by us and say: "Buckbee's Seeds are Full of Life."

There are many strains of this justly celebrated Onion offered, but we venture to say none can surpass Buckbee's Prize Medal Stock of this famous variety. The various strains, good, bad and indifferent that are generally offered to the unwary planter, come to maturity all the way from August up until as late as October. This unreliability of cropping is very disastrous to most localities.

BUCKBEE'S PEDIGREE LARGE RED WETHERSFIELD—Our own growth, choicest, northern grown, high-grade, pedigree "Full of Life" Stock seed. Pkt. 10c; oz. 35c; 2 oz. 60c; ¼ lb. \$1.10; ½ lb. \$2.10; lb. \$4.00.

BUCKBEE'S NEW GOLDEN GLOBE DANVERS

Long Keeper. Best Shipper. Unrivalled Market Onion. Always in the Lead. Challenges Competition.

A most perfect type of the globe-shaped Onion and an extra early variety. It has a very small neck, the entire crop drying down at one time. The bulbs are of a beautiful golden yellow color. Trial tests have shown this great variety to yield over 2,000 bushels per acre, while under ordinary cultivation in past seasons several of our customers have reported yields of 1,000 bushels per acre. The bulbs are very hard, solid and are exceptionally good keepers.

Remember, that we control the entire supply of this variety. Our own growth, choicest Northern-grown, high-grade pedigree stock seed. Pkt. 10c; oz. 55c; 2 oz. \$1.05; ¼ lb. \$2.00; ½ lb. \$3.95; lb. \$7.75.

BUCKBEE'S SELECTED YELLOW GLOBE DANVERS

Standard of Excellence for Home and Market Use.

Buckbee's strain of Yellow Globe Danvers, developed by careful selection and breeding, is pedigreed stock of the highest type, far superior to the seed mostly offered by others. This stock produces bulbs of fine symmetrical shape, large size, average specimens weighing from 1 to 2 lbs. each. These bulbs have small necks and ripen evenly. The skin is a light golden brown; the flesh is finely grained, pure white, crisp, mild and of excellent flavor. It is a grand, magnificent keeper and shipper. Frequently produces 800 bushels or more to the acre from seed. About a week earlier, but not quite so large nor so perfectly globe-shaped as Southport Yellow Globe. Our own growth, choicest Northern-grown, high-grade, pedigreed stock seed. Pkt. 10c; oz. 45c; 2 oz. 85c; ¼ lb. \$1.60; ½ lb. \$3.10; lb. \$6.00.

THE GREATEST OF ALL RED ONIONS

The seed which we are offering is of the earliest maturity; grown from hand-sorted bulbs that will produce Onions of immense size; 1½ to 2½-pound Onions from our seed are of frequent occurrence. BUCKBEE'S RED WETHERSFIELD grows with unusual regularity, scallions being unknown. It is a magnificent keeper. An enormous cropper—700 to 1,000 bushels have frequently been raised upon a single acre. The shape is accurately shown in the illustration above. In color the skin is a deep rich, purplish red, while the flesh is of a beautiful white, firmly grained and of good flavor. Our customers throughout the country indorse it as the best Red Onion ever grown.

NEVER HAS BEEN KNOWN TO FAIL

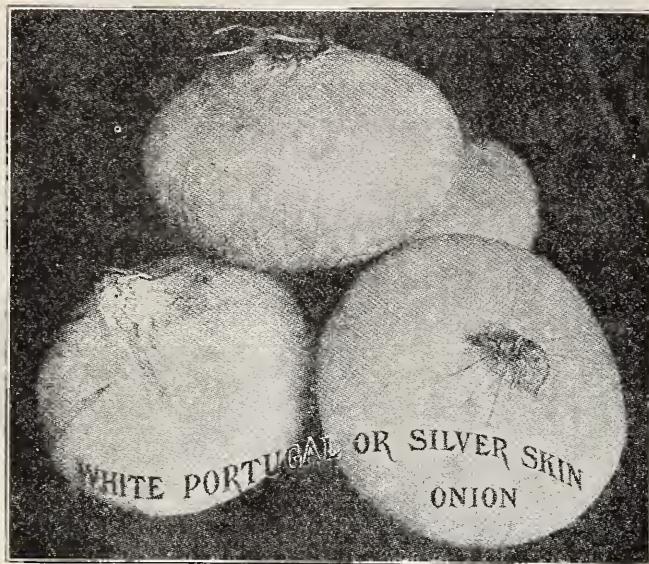

We trust no Onion grower who receives our catalogue will fail to try at least a small quantity of BUCKBEE'S RED WETHERSFIELD ONION, for all ought to know how much superior it is to other strains offered. This seed will produce highly-colored, long-keeping Onions, sure to command the highest price in the market. Will yield double the crop that seed from most other dealers will produce.

BUCKBEE'S PEDIGREED "Full of Life" ONION SEED FLAT VARIETIES

EXTRA EARLY RED

The Earliest Red Onion in the World.

A favorite early variety of fine shape. Always a good yielder and magnificent keeper, its beautiful shape and rich purplish crimson color making it extremely attractive and desirable. Medium sized, flat bulbs. Adapted for a great variety of soils and succeeds in wet, cold and mucky land. Very desirable for early market use. Selected stock seed. Pkt. 8c; oz. 30c; 2 oz. 55c; ¼ lb. \$1.05; ½ lb. \$1.95; lb. \$3.85.

AUSTRALIAN BROWN

Long Keeping. Fine Quality.

This sort is distinct from all other Onions. Is uniform in size and shape, wonderfully hard, solid and heavy, and will keep almost indefinitely. Ripens extremely early and never makes scallions. It is of medium size, round, with skin of a deep amber-brown; flesh white, mild and agreeable. A sure cropper. Pkt. 8c; oz. 30c; 2 oz. 50c; ¼ lb. 95c; ½ lb. \$1.80; lb. \$3.50.

SELECTED YELLOW STRASSBURG OR DUTCH

Quite similar to the foregoing, but the bulbs are rather more flattened, of a darker skin, a little larger and mature a few days later. One of the best to grow for sets, and a splendid keeper. High-grade pedigreed seed. Pkt. 8c; oz. 30c; 2 oz. 50c; ¼ lb. 95c; ½ lb. \$1.80; lb. \$3.50.

EARLY WHITE WELSH (For Green Onions)

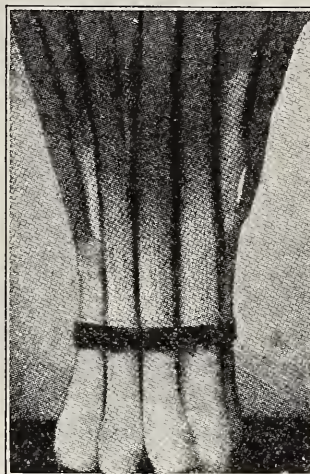

A most desirable green bunch Onion. It does not form bulbs, only scallions or enlargements at the base of each shoot, which are quite attractive and, being extremely early, sell well before Onions grown from sets are brought to the market. We recommend this variety very much and know market gardeners will find it an exceedingly profitable crop. A hardy perennial can remain in the ground for years. Pkt. 10c; oz. 40c; 2 oz. 75c; ¼ lb. \$1.25.

NEW WHITE PORTUGAL or WHITE SILVERSKIN

The Standard White Onion for Market and Family Use

Medium size bulbs of flat shape, which ripen evenly and quite early—about 10 days earlier than Southport White Globe. They are of handsome appearance; have a clear, white skin as beautiful as glistening silver. The flesh is of mild, delicious flavor. For keeping, this is the best of all white varieties.

A gardener who does not care to plant more than one variety should use this one, and everyone should make a liberal sowing of it for continuous use. These Onions make fine bunching of Green Onions and are also grown for the market as large White Onions. They are also much used for pickling and for Onion Sets. Buy your seeds from first hands. Our own growth, choicest Northern-grown, high-grade pedigree stock seed. Pkt. 10c; oz. 45c; 2 oz. 85c; ¼ lb. \$1.75; ½ lb. \$3.30; lb. \$6.50.

Early White Welsh.

EXTRA EARLY WHITE QUEEN OR WHITE PEARL

A silver-skinned variety of remarkably quick growth. Small bulbs, flat, of mild flavor. Particularly valuable for pickles. Pkt. 10c; oz. 40c; 2 oz. 70c; ¼ lb. \$1.30; ½ lb. \$2.45; lb. \$4.75.

BUCKBEE'S WHITE PICKLING

Nothing Earlier in Onions.

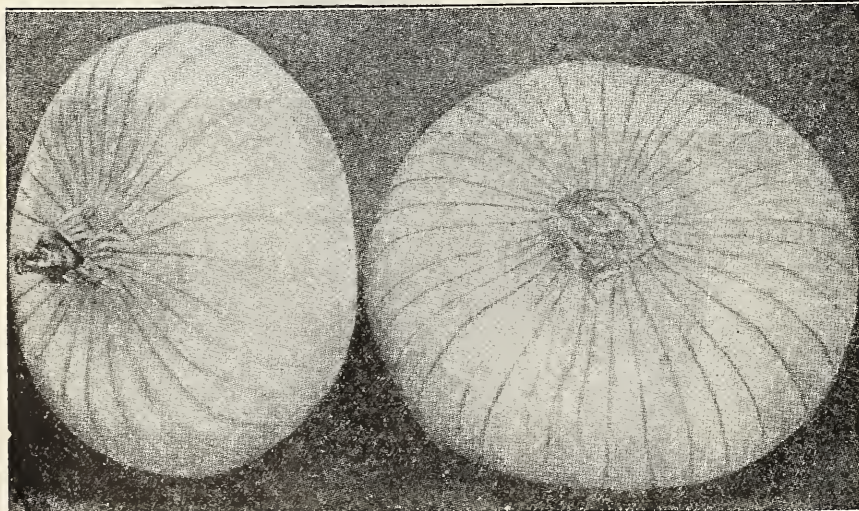

This distinct variety is the very earliest Onion in cultivation. Of a pure paper-white color, very mild and delicate in flavor; from 1 to 1½ inches in diameter and ¼ of an inch in thickness. Its extreme earliness makes it very valuable for early table use as well as bunch Onions for market. Pedigreed stock seed. Pkt. 10c; oz. 40c; 2 oz. 70c; ¼ lb. \$1.35; ½ lb. \$2.55; lb. \$5.00.

Genuine Bermuda Onion Seed

Bermuda Onions are largely grown in the South and have proved a most profitable crop. They are planted there in the fall and shipped North in May and are the earliest large new Onions in the market. Growers can do equally well with them in the North. They are the quickest growing Onions known. Sown at the same time as Danvers and White Portugal, they will produce full grown bulbs about 3 inches in diameter when the others are only 1 inch in size.

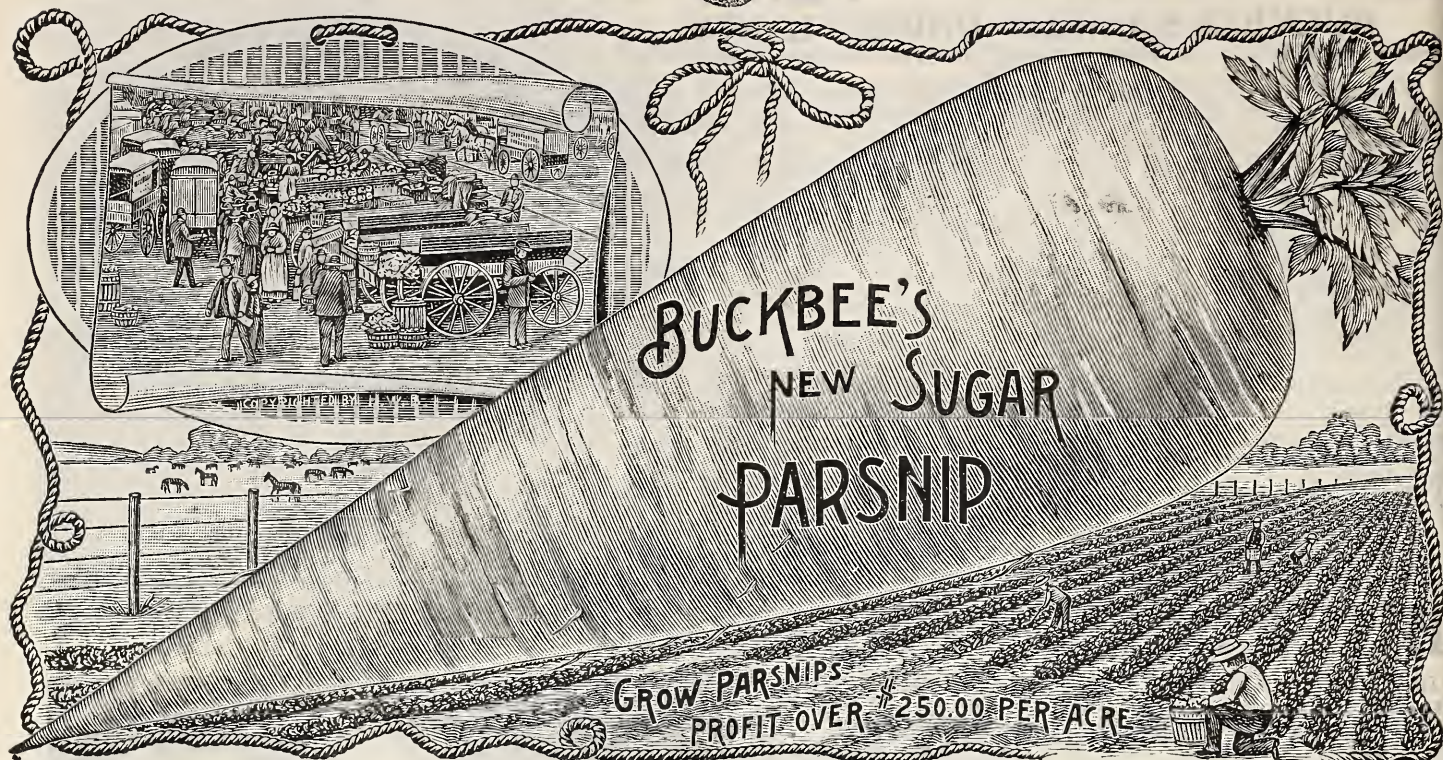

Genuine Bermuda Onions—The Earliest and Mildest Onions in the World.

CRYSTAL WHITE WAX—This new variety is a large, pure-white flat Onion. It is the earliest and most popular Onion with the large growers in the South. It produces the mildest and sweetest Onions of them all. It is very fine for slicing, the color being so clear and pure. Our stock seed each year is imported direct from Canary Islands, where the only True Bermuda Seed is grown. We spare no labor or expense to have our stock "Full of Life" and the best that can be obtained. Pkt. 10c; oz. 50c; 2 oz. 95c; ¼ lb. \$1.85.

WHITE OR YELLOW BERMUDA—Bulbs broad and flat in form. The color is not a clear white, but rather a pale straw; flesh crisp, solid and mild, early ripening. Pkt. 10c; oz. 45c; 2 oz. 85c; ¼ lb. \$1.65.

RED BERMUDA—Similar in form and early ripening to the Bermuda White, but grow larger in size, ranging from 3 to 4 inches in diameter; very flat and of a light pink color. The flesh is white, slightly suffused with pink; very mild. Pkt. 10c; oz. 45c; 2 oz. 85c; ¼ lb. \$1.65.

PARSNIPS

The value of the Parsnip as a table vegetable is well known but is not generally appreciated at its full value for stock feeding. On favorable soil it yields an immense crop of roots, more nutritious than turnips and very valuable for dairy stock.

Parsnips are usually grown on deep, rich, sandy soil, but will make good roots on any soil which is deep, mellow and moderately rich. Fresh manure is apt to make the roots coarse and ill shaped. As the seed is sometimes slow and uneven in growth, it should be sown as early as possible in drills $2\frac{1}{2}$ feet apart; cover $\frac{1}{2}$ inch deep and press the soil firmly over the seed. Give frequent cultivation and thin the plants to 6 inches apart in the row.

BUCKBEE'S NEW SUGAR

Parsnips are one of the few Winter vegetables. The roots are hardy and are improved in flavor by the action of the frost. Where the climate is mild the roots can be left in the ground over Winter and dug as needed. They yield immense crops and the roots are very rich in saccharine food.

After repeated trials at Rockford Seed Farms we have no hesitancy in offering Buckbee's New Sugar as the best Parsnip grown. Roots fine size, of good diameter, enabling them to be easily gathered; are exceedingly smooth; the flesh fine grained and of the most excellent quality. A magnificent cropper, yielding as high as 750 bushels per acre under good cultivation. You will not be disappointed by planting BUCKBEE'S NEW SUGAR PARSNIP. Pkt. 10c; oz. 15c; 2 oz. 25c; $\frac{1}{4}$ lb. 45c; $\frac{1}{2}$ lb. 80c; lb. \$1.50.

BUCKBEE'S NEW HALF LONG—Roots smooth, shaped like a top. Usually about half as long as Buckbee's New Sugar with a diameter of 3 or 4 inches. Leaves short; early cropper. Excellent for stock as well as table. Pkt. 8c; oz. 12c; 2 oz. 20c; $\frac{1}{4}$ lb. 35c; $\frac{1}{2}$ lb. 65c; lb. \$1.25.

NEW MALTESE—A wonderfully fine strain. The roots do not grow as long as the Hollow Crown, but are of greater diameter and more easily gathered. Very heavy cropper. Flesh fine grained and of most excellent quality. Pkt. 6c; oz. 12c; 2 oz. 20c; $\frac{1}{4}$ lb. 35c; $\frac{1}{2}$ lb. 60c; lb. \$1.00.

IMPROVED HOLLOW CROWN—An excellent variety for the table. The roots grow to a length of about 15 inches with a diameter at the top of 3 inches. Very productive. Pkt. 5c; oz. 12c; 2 oz. 18c; $\frac{1}{4}$ lb. 30c; $\frac{1}{2}$ lb. 50c; lb. 90c.

PARSLEY

Parsley is used for seasoning soups and stews, for salads, for garnishing; also for ornamental borders in the flower garden. The green leaves are used for flavoring or they may be dried crisp, rubbed to powder and kept in bottles until needed.

Parsley succeeds the best on rich, mellow soil. The seed is even slower than parsnip in germinating and should be sown as early as possible in the spring, in drills 1 to 2 feet apart, covering not more than $\frac{1}{2}$ inch with fine soil firmly pressed down. When the plants are well up thin 8 to 12 inches apart in the row. When the plants of the curled varieties are about 3 inches high cut off all the leaves; the plant will then start a new growth of leaves which will be brighter and better curled and later, if these turn dull or brown they can be cut in the same way; every cutting will result in improvement.

BUCKBEE'S BEAUTY

A distinct and handsome variety of quick, robust growth forming compact, ornamental plants, densely furnished with strong-stemmed graceful leaves, finely cut, most beautifully curled, and of that brilliant emerald green color so highly attractive when used for garnishing. The flavor of the leaves is also unusually rich and aromatic, rendering this variety of special value where used for flavoring, in sauces, dressing, etc., either when fresh or dried. Pkt. 10c; oz. 15c; 2 oz. 25c; $\frac{1}{4}$ lb. 45c; $\frac{1}{2}$ lb. 80c; lb. \$1.50.

NEW MOSS CURLED—Invaluable as a garnishing plant and suited for mixing with dwarf, ornamental foliage plants in the garden. This is a vigorous, compact growing variety, excellent for garnishing and flavoring, and a handsome decorative plant. The leaves are very finely cut and so closely crisped or curled as to resemble bunches of moss. Owing to its uniformly fine deep green color and very attractive foliage, this is one of the most popular sorts for both market and home garden. Pkt. 6c; oz. 12c; 2 oz. 20c; $\frac{1}{4}$ lb. 35c; $\frac{1}{2}$ lb. 60c; lb. \$1.00.

PLAIN—Leaves flat and deeply cut but not curled. Unequaled for flavoring soups and stews. Pkt. 5c; oz. 10c; 2 oz. 15c; $\frac{1}{4}$ lb. 25c; $\frac{1}{2}$ lb. 40c; lb. 75c.

HAMBURG TURNIP ROOTED—The edible portion of this variety is the fleshy root which resembles a small parsnip and has a flavor similar to Celeriac; it is extensively used for flavoring soups and stews. Large pkt. 7c; oz. 12c; 2 oz. 20c; $\frac{1}{4}$ lb. 35c; $\frac{1}{2}$ lb. 65c; lb. \$1.25.

PEANUTS

Peanuts have always been an important farm crop in this country; millions of acres have been planted with them in the southern states, but now that their great value for producing oil and oil-cake is being better realized, a much larger acreage will be grown with them. Last year about a hundred million bushels of Peanuts have been ground up by oil mills for oil and oil-cake, while a few years ago none had been used. A ton of Peanuts in pods produces 80 gallons of sweet oil and also 750 pounds of feeding cake. This oil and cake are superior to that from cotton seed. Peanut oil is fully equal to olive oil and Peanut meal makes hard hog-flesh. The Peanut Family contain a larger percentage of oil than the other legumes and are wanted by the oil mills who now pay a higher price for a bushel of them than for cotton seed. In the South, especially on a sandy land, Peanuts will supplant cotton as a money crop, being more profitable. The cultivation of this crop is also every year extending farther north, and on suitable soil in the northern states Peanuts will make a profitable crop for stock feed where Indian Corn thrives and with a season of only four months free from frost.

Plant in rows $2\frac{1}{2}$ to 3 feet apart and 6 to 8 inches apart in the rows. The Seed Peanuts are planted either shelled or in pods, using $1\frac{1}{2}$ peck of shelled or 2 bushels in pods per acre. The pods may also be broken in 2 parts, soaked in water and then planted at once. The larger varieties are mostly planted shelled at the rate of $\frac{1}{2}$ bushel per acre. Planting must not be done until the weather is warm. Cultivate until they begin to form pods. When they mature pull them up, turning the roots to the sun. In bright weather they will be cured in 24 hours. They must be pulled before frost.

NEW MAMMOTH VIRGINIA

This Mammoth Virginia Peanut is more profitable and desirable than the common spreading kind, because more productive, earlier, yields fewer imperfect pods and is more easily cultivated and harvested, having very erect stems and upright foliage. The vines make valuable forage for stock. Will ripen even as far north as Canada. Hundreds of our young friends reported a wonderful crop the past season. The standard variety for roasting. Postpaid, pkt. 8c; $\frac{1}{4}$ lb. 15c; $\frac{1}{2}$ lb. 25c; lb. 40c.

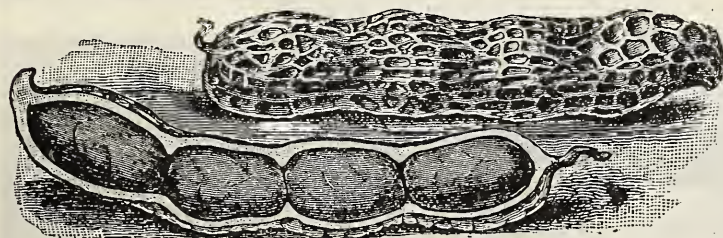

NEW EARLY LONG POD BUSH

Originated by one of the best Peanut growers in the South and is certainly a distinct improvement in appearance over any Southern variety now in use. Will do well on most all kinds of soil, and fill out better than any other large variety. Can be pulled up with the vine same as the old Spanish Peanuts. The distinct long pods grow close and are well filled, containing 3 to 4 nuts to each pod. Very productive and of a mild, sweet flavor. Well adapted for stock feeding. Postpaid, pkt. 10c; $\frac{1}{4}$ lb. 15c; $\frac{1}{2}$ lb. 25c; lb. 45c.

I am writing you to tell you about my success with the garden seed I ordered from you last Spring. Your Table Queen Squash does fine in California, the Abraham Lincoln Tomato is very fine, the Ground Cherries did very well. I carried 11 Abraham Lincoln Tomatoes (they weighed 10 lbs.) to the Ventura County Fair. They took the blue ribbon and \$3.00 cash prize and on your Table Queen Squash the same, also on your Purple Ground Cherries, first prize on all three, three blue ribbons and \$9.00 cash prizes. The Abraham Lincoln Tomato is undoubtedly the best Tomato for slicing that is grown. Inclosed find order for Cabage seed. J. A. BAXTER, Santa Paula, Calif.

NEW DIXIE GIANT

The Jumbo of the Peanut family; owing to its extremely large size and handsome appearance is very desirable in every market, always bringing fancy prices. Plants grow about 18 inches high, with heavy, erect stalks and large leaves, fruits near the tap root. Can be planted close together, thus producing a large yield, and are more easily cultivated than the running varieties. The pods fill out well, forming few, if any, pops. Should yield a gallon of nuts to one kernel planted. Postpaid, pkt. 10c; $\frac{1}{4}$ lb. 18c; $\frac{1}{2}$ lb. 30c; lb. 50c.

New Dixie Giant Peanuts.

SPANISH PEANUT

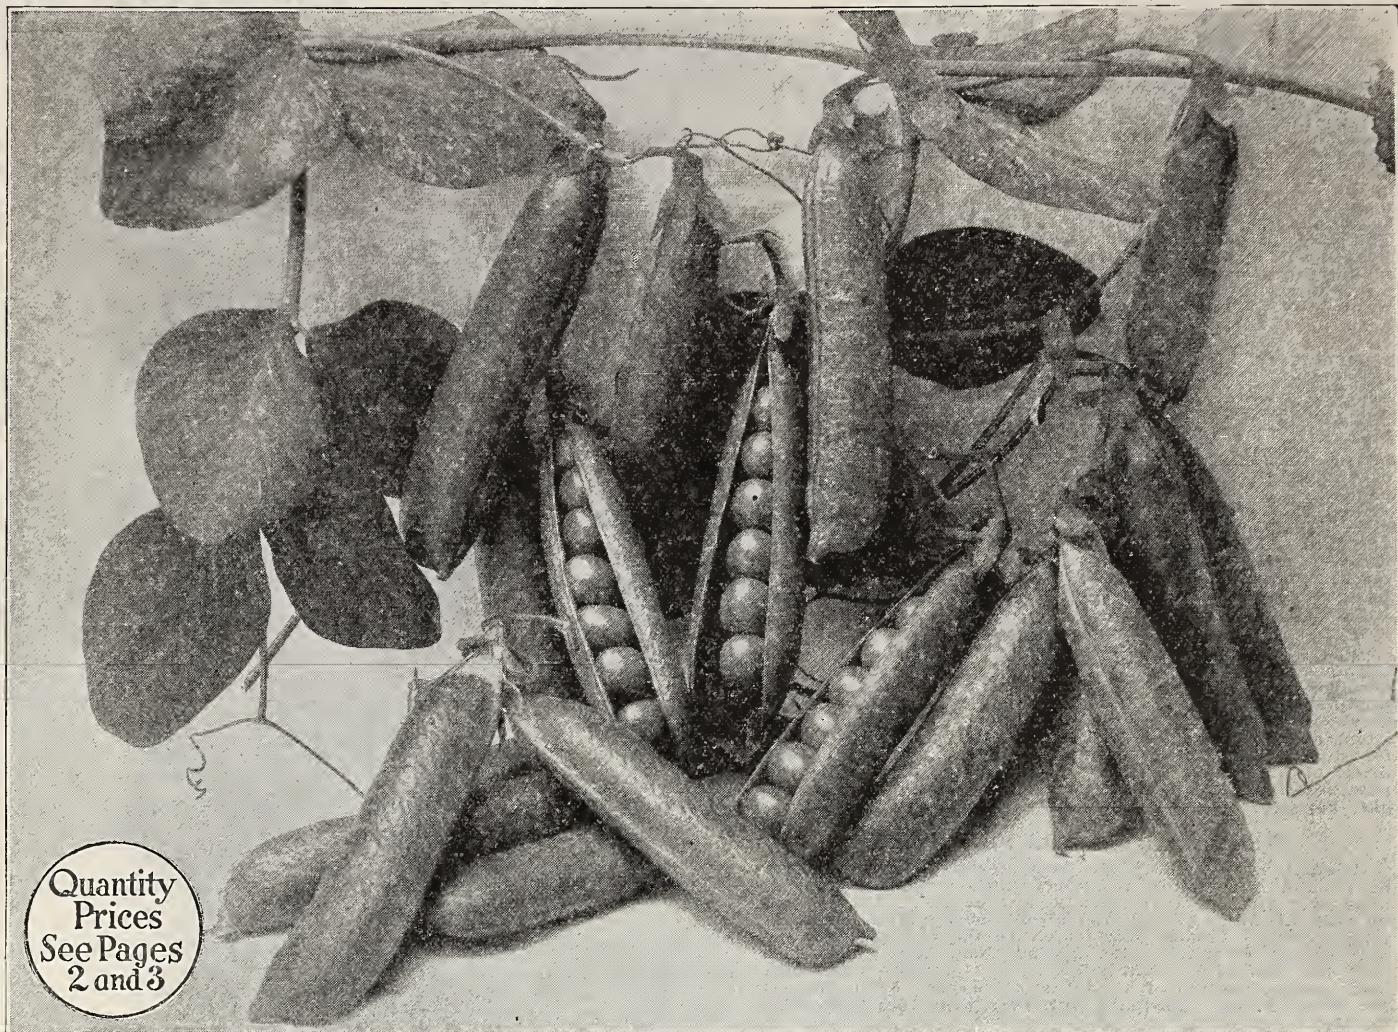

The earliest variety grown; maturing in about 100 days; in some parts of the South two crops are raised in a year. Plants upright, with abundant and heavy foliage; the pods cluster at their base. Pods are small but well filled with nuts of sweeter and finer flavor than the larger sorts. The yield is on an average from 50 to 60 bushels of nuts and a ton of hay per acre, but frequently 100 bushels of nuts have been harvested. Can be cultivated with the plow. Because of its earliness, easy cultivation and great productiveness it is the best variety for farm use, for fattening hogs and other stock. In harvesting, the nuts hang to the vine and tops and nuts are fed together as a complete hay and grain ration. This variety has also a commercial value over that for feeding; it is the kind mostly used for Peanut candy and salted Peanuts and is also the best for oil, containing 10 per cent more oil than others. Postpaid, pkt. 7c; $\frac{1}{4}$ lb. 15c; $\frac{1}{2}$ lb. 22c; lb. 35c.

GIANT LAXTONIAN OR BLUE BANTAM

Very Early—Extra Large Podded—Heavy Yields—Sweet Flavored.

A giant podded, dwarf, extra early pea. The most valuable Pea introduced in many years. This handsome new wrinkled Pea is the largest podded of all the dwarf early Peas. It grows only 16 to 18 inches high, requires no support, and has the same large pods as Gradus, even a few days earlier in season and of little darker green color. The Peas are almost double the size of any other early dwarf Pea, are wrinkled, of bluish-green color, and have the true rich marrow flavor, tenderness and quality of the best main crop varieties. Its great earliness, the very large size and dark green color of the pods commends this variety particularly for market gardeners' use, while the unsurpassed quality makes it especially desirable for the table. Postpaid, pkt. 10c; ½ lb. 30c; lb. 50c.

THOMAS LAXTON

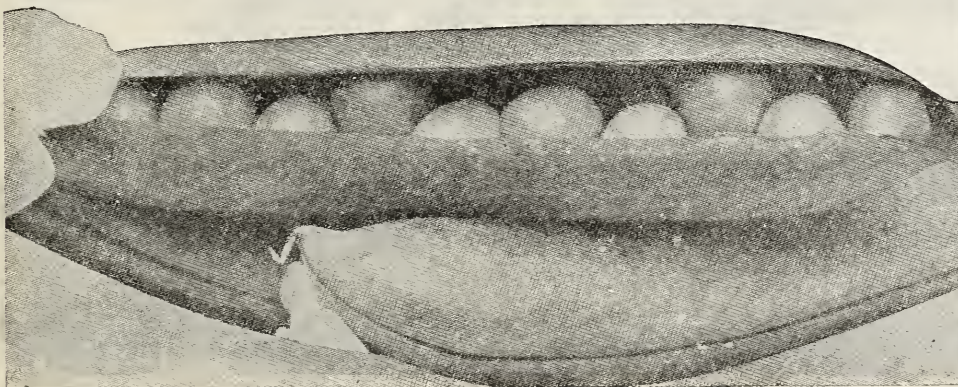

Extra Early Large Podded Sweet Wrinkled Pea.

The rival to the famous Gradus—as a long-podded, extremely early wrinkled Pea. The growth is identical but the pods are deeper, richer green, square at the end and contain more Peas. In the opinion of some experts, Thomas Laxton is even sweeter and finer in flavor, while as the large Peas are of a deeper green, they present a more attractive appearance on the table. The crop ripens only 3 to 4 days after Gradus. A splendid market gardener sort, but especially recommended for the home garden. Postpaid, pkt. 10c; ½ lb. 22c; lb. 40c.

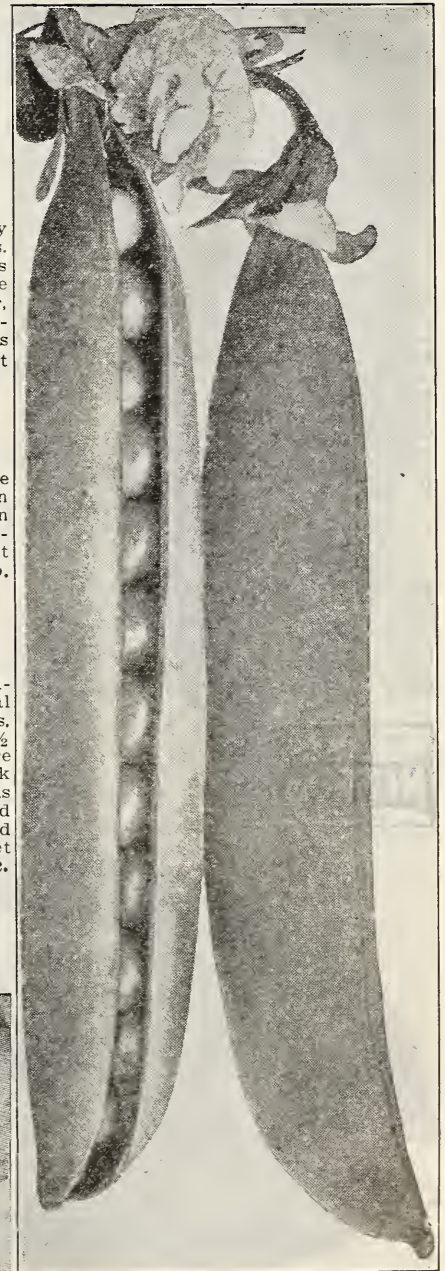

NEW EARLY GRADUS OR PROSPERITY

The Earliest, Largest Podded Wrinkled Pea.

This popular Pea matures only two or three days later than the small-podded, round-seeded Extra Earlies, but has pods as large as those of the Telephone Pea and is fully equal to it in quality. Gradus is probably the most popular of all the extra early wrinkled Peas. It has taken the place of the smooth early Peas to a great extent. It grows from 3 to 3½ feet high, requiring no sticks or brush, but sticks may be used if preferred. The vines are of pale green color and bear in great profusion from top to bottom immense round, dark green pods, 4½ to 5 inches long, well filled with from 8 to 10 or more Peas of delicious quality as large and as rich in flavor as the Telephone Peas, and these Peas can be had only a few days later than the small extra early Peas. These Peas retain their color and attractive appearance after cooking. Gradus is adapted to all purposes of the market gardener and does equally well in the home garden. Buckbee's "Full of Life" Seeds Are Bred for Disease Resistant Qualities
Second Early and Main Crop. Sweet, Wrinkled Varieties

BUCKBEE'S NEW DAISY OR DWARF TELEPHONE

Dwarf Vines; Large Green Pods.

The vines, though growing only about 18 inches in height, are very thick, stout and bear a big crop of large, well-filled pods. The pods average 5 to 6 inches in length, containing 7 to 9 large Peas of a light green color which are tender and sweet. Compared with the tall Carter's Telephone in size, shape and color of pods and exquisite flavor, the two varieties are alike, but the Daisy being dwarf can be grown without support and the rows of it can be made closer together and furthermore it is about ten days earlier than the tall sort. Postpaid, pkt. 10c; ½ lb. 25c; lb. 45c.

IMPROVED STRATAGEM

High Grade Standard Dwarf Late Pea.

One of the best of the large-podded sorts. The pods are of immense size and uniformly filled with very large dark green Peas of the finest quality. The vines grow 15 to 16 inches in height. About 5 to 6 days later than the Daisy. It is vastly superior to the stocks now generally sold as Stratagem. Vines require no support. Postpaid, pkt. 8c; ½ lb. 21c; lb. 38c.

CARTER'S TALL TELEPHONE Selected Stock

A Standard Large Podded Main Crop Variety in Every Market.

The Telephone has become the leading Pea with market gardeners whose trade appreciates fine appearance and high quality. Vines vigorous, growing about 4 feet high, producing an abundance of very large pods filled with immense Peas, which are tender, sweet and of excellent flavor. Foliage and pods are of light, bright green color. Postpaid, pkt. 10c; ½ lb. 22c; lb. 39c.

ALDERMAN OR IMPROVED TELEPHONE

Highly Bred Main Crop Sweet Wrinkled Peas.

This comparatively new Pea is, in many respects, the very best early main crop variety of the valuable Telephone type. The vines grow nearly 5 feet high, are dark green, vigorous and exceedingly productive. Pods are very large, long, dark green. They appear a little later than those of Carter's Telephone, but are larger, often measuring 6 inches and over. The Peas are of the largest size and of unsurpassed quality. Market gardeners are demanding the large podded, dark-colored sorts, which retain their fine appearance even after shipping a long distance. The Alderman answers these requirements and furthermore is the most productive variety of this class. We recommend it unreservedly as one of the finest and most desirable for the home as well as for the market gardener. Postpaid, pkt. 10c; ½ lb. 24c; lb. 44c.

PRINCE EDWARD OR PRODIGIOUS

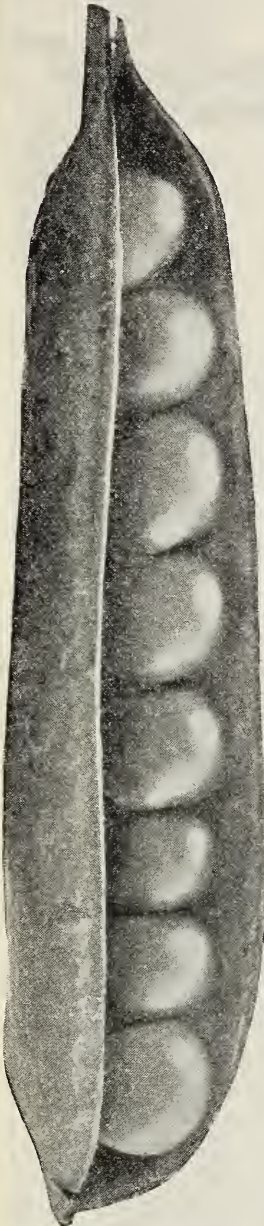

The Giant of the Pea Family. Unrivalled in Quality and Productiveness.

This is an English strain of the Telephone type, selected and bred from the Alderman, which also belongs to that type, especially for size of the pods. Prince Edward is considered by all who have tried it the most profitable variety to grow for the trucker, and where it is known there is an enormous demand for it. This is the largest garden Pea we grow. It is truly the giant of the Pea family and is unsurpassed for exhibition purposes. In England, where it has been exhibited in the last few years at the leading shows, it has always taken the first prize. The vines grow about 6 feet in height, are of vigorous and robust habit and have dark green foliage and pods. The pods are produced in pairs and in great profusion. They attain the extraordinary length of 7 inches and upwards and are closely packed with 11 to 13 large, dark green Peas of delicious quality. Postpaid, pkt. 10c; ½ lb. 25c; lb. 45c.

Buckbee's "Full of Life" Seeds Are Bred for Disease Resistant Qualities

BUCKBEE'S NEW EVERBEARING

The Great Continuous Everbearing Variety.

Vine stout, about two and one-half feet high, bearing at the top six to ten broad pods. If these are picked as they mature and the season and soil are favorable, the plant will throw out branches bearing pods which will mature in succession, thus prolonging the season. The Peas are very large and wrinkled, cook very quickly, are tender, of superior flavor and preferred by many to any other sort. Postpaid, pkt. 10c; ½ lb. 23c; lb. 42c.

IMPROVED CHAMPION OF ENGLAND

The Standard Sweet Flavored Late Wrinkled Pea.

Very productive and universally admitted to be one of the richest and best flavored Peas. Height four to five feet; seed light green and much shriveled. Very inferior and mixed stocks of this sort are frequently offered, but when the seed is as well grown and selected as that we offer, we consider the variety equal in quality to any in cultivation and one of the best of its season, either for the amateur or market gardener. This is the latest pea we grow; it is about a week later than Telephone. Postpaid, pkt. 8c; ½ lb. 21c; lb. 38c.

HORSFORD'S MARKET GARDEN

Reliable Home Garden and Canning Pea.

A first-class wrinkled Pea; medium late. Height 2 to 3 feet. It is a profitable sort for market gardeners, equally good for the home table and also much used by canners. Medium-sized pods, enormously productive. Postpaid, pkt. 8c; ½ lb. 20c; lb. 35c.

GRANT'S FAVORITE

The Ideal Home Garden Pea.

This fine variety of our own introduction is unquestionably the sweetest late Pea ever offered, coming into use just after the early varieties are through bearing. A luxuriant grower from 3 to 4 feet high. The pods are of good size, and always well filled with exceptionally sweet and highly flavored Peas. It is nearly an upright grower, but will do better if staked or planted along a fence. Postpaid, pkt. 10c; ½ lb. 22c; lb. 40c.

Buckbee's New Vigorosa

THE MOST MAGNIFICENT OF ALL NEW PRODUCTIONS

Nothing like it for a second early Pea has ever been produced. It requires no support. There is no Pea more prolific. It is a leader in the market and in demand among epicures. To try it is to surely succeed.

This grand, exceptionally good, new Pea is beyond all reasonable doubt by long odds the very best Second Early variety that has ever been introduced. The extended history of Pea culture gives us no example of a production anything near the equal of Vigorosa. It is absolutely unparalleled.

No bushing at all is required. The vines grow to be but 20 inches tall and are so stout that they bear immense crops without falling. As an enormous yielder the New Vigorosa ranks first and has no close rival. When it comes to quality—well, that is one of its many strong points. No one who knows the merits of real Peas could possibly find fault with it. It pleases critical judges, which means it is all that we claim for it. Those of our customers who have tried it say it is better than we represent it to be. Postpaid, pkt. 10c; ½ lb. 24c; lb. 44c.

I have ordered my Garden Seed from you for four years and I have been more than pleased with it; that is why I am sending for another order, and as long as I can get as good Seed as I always have I will always order your Seed.

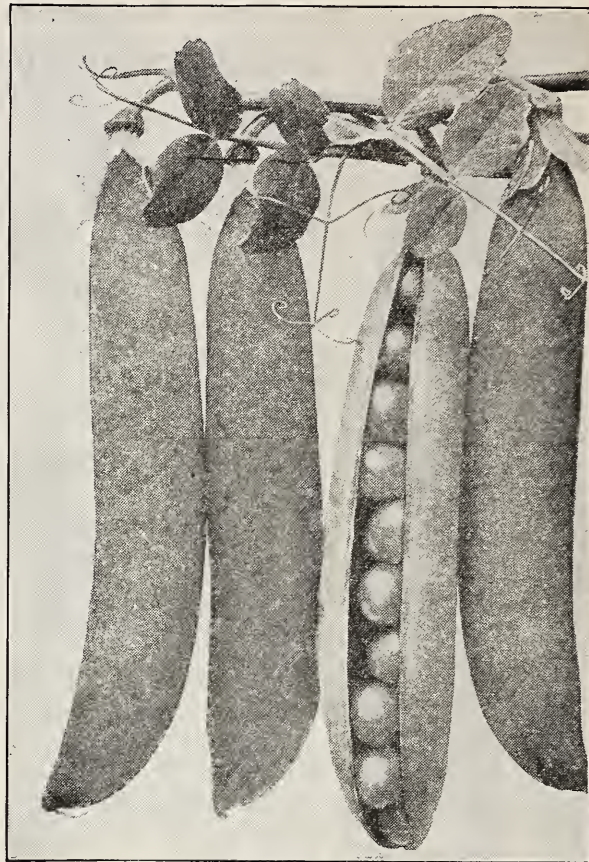

MRS. CLIFTON MILES, Dongola, Ill.

I would write you a few lines in regard to your garden and field seed. Especially your Ruta Baga Seed. They are fine. It was a sight what Ruta Bagas I raised. There was a good many people came to see them and they want me to furnish them some seed.

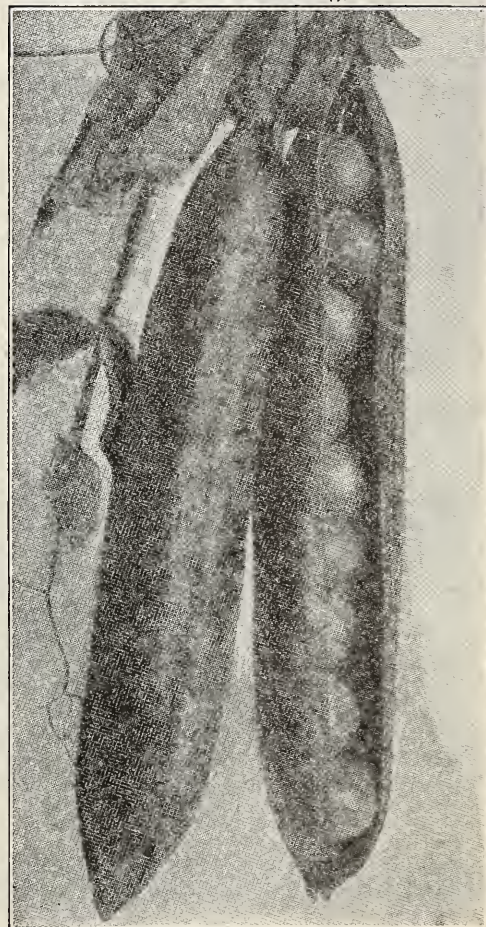

R. W. JAMES, Major, Va.

I received the Bulbs October 31st you sent Oct. 28th, in good order. The seed I got of you last year were all good—Buckbee's Stringless Green Pod Beans. I never raised such a crop of Bunch Beans. I ordered 2 lbs. of the McCaslan Beans and it was just one pound too many as I picked a bushel of Beans off of four hills. My other seeds were all good.

BUCKBEE'S "FULL OF LIFE" POTATOES

PEDIGREED STOCK, GROWN EXPRESSLY FOR SEED IN THE FAMOUS RED RIVER VALLEY OF THE NORTH.

No Seed Potatoes can be compared with those produced in the North, either for vigor and freedom from disease, or for producing and long-keeping qualities. Furthermore, our stock is all grown from hill selected Potatoes and only from plants which have produced a large number of market-sized tubers, and it will easily yield a hundred bushels more per acre than common stock. Remember, no matter what fertilizer, cultivation, protection against disease and insects you give the crop, the fact remains that the yield is dependent very largely on the seed you plant.

DATE OF SHIPMENT.—Potatoes will be shipped at any date ordered, at purchaser's risk, but where no special instructions are given to the contrary, we will ship them, when, in our judgment, there will be a minimum danger from freezing. Of the many varieties that claim public favor, we have selected the best in cultivation.

BUCKBEE'S EXTRA EARLY ROCKFORD

Is of very handsome appearance, with pinkish tinged skin and white flesh. Of delightful flavor. Price, postpaid, 3 lbs. 90c.

IMPROVED EXTRA EARLY OHIO

It is fully two weeks ahead of the Early Rose, and is a general favorite with Potato growers and market men alike, and the most profitable Potato they can possibly grow. Maturing early, it brings the highest prices. The tubers grow compact in the hill, are easily dug, with very few small ones—nearly every Potato is of marketable size; has few eyes which are even with the surface. Our Improved Extra Early Ohio is very fine, pure stock and uniform in shape. Price, postpaid, 3 lbs. 70c.

I planted seeds which were bought of you last year and I raised the largest Watermelons in Crittenden County.

Last year we had a very wet season and I had some trouble getting things started but I think your seeds are fine and also true to name.

SAM KIMSEY, Tolu, Ky.

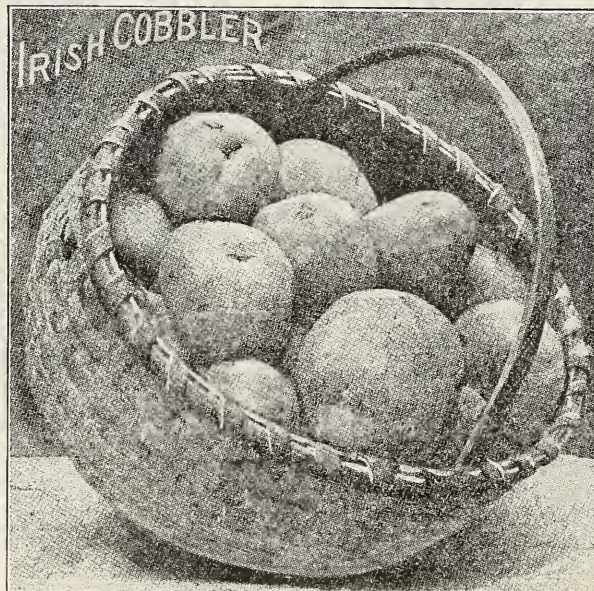

I wish to tell you about your last year's Tomato Seed, that when the neighbors around us were getting 50c a basket for theirs, we got \$1.25, for hardly any one of them weighed under 6 ounces and lots of them weighed 10 to 12 ounces apiece.

They were wonderful and our first year of planting. They were late Tomatoes, too.

MRS. MARY E. PETERSON, N. Absecon, N. J.

IRISH COBBLER

Sometimes called Early Eureka. A most excellent extra early variety, maturing good sized tubers seven weeks from time of planting. It has also the remarkable characteristic of producing nearly all tubers of large size. The vines make short, upright growth, allowing close planting. The tubers are of round shape with few shallow eyes. The flesh is pure white, with a clean, smooth skin, and in quality they are excellent, always cooking dry and mealy. They are splendid keepers and, taking it all in all, are one of the most reliable and satisfactory first early sorts, excelling in productiveness many of the late varieties. Specially suited to dry climates on account of its deep roots and by far the best white Potato for the South. In a comparative test of sixty-seven varieties, reds and whites, made at the Station at Fayetteville, Ark., the Irish Cobbler gave the best yield of all, which was 198.49 bushels per acre. Choicest Pedigreed Stock Seed. Price, postpaid, 3 lbs. 75c.

BLISS RED TRIUMPH

The standard extra early Potato much planted in the South. The tubers are nearly round, are smooth, medium in size, reddish pink in color. Vines are small and compact, with short, thick stalks and broad leaves. This is one of the hardest varieties known, and is not susceptible to rot, scab and other diseases in fact, it can be grown on the most heavily manured land without danger of rot. Price, postpaid, 3 lbs. 85c.

PURE EARLY ROSE

The good old favorite, which continues in great popularity. A prolific yielder, sure cropper and popular market Potato. The seed we offer is the purest and best on the market. Price, postpaid, 3 lbs. 70c.

EARLY SIX WEEKS

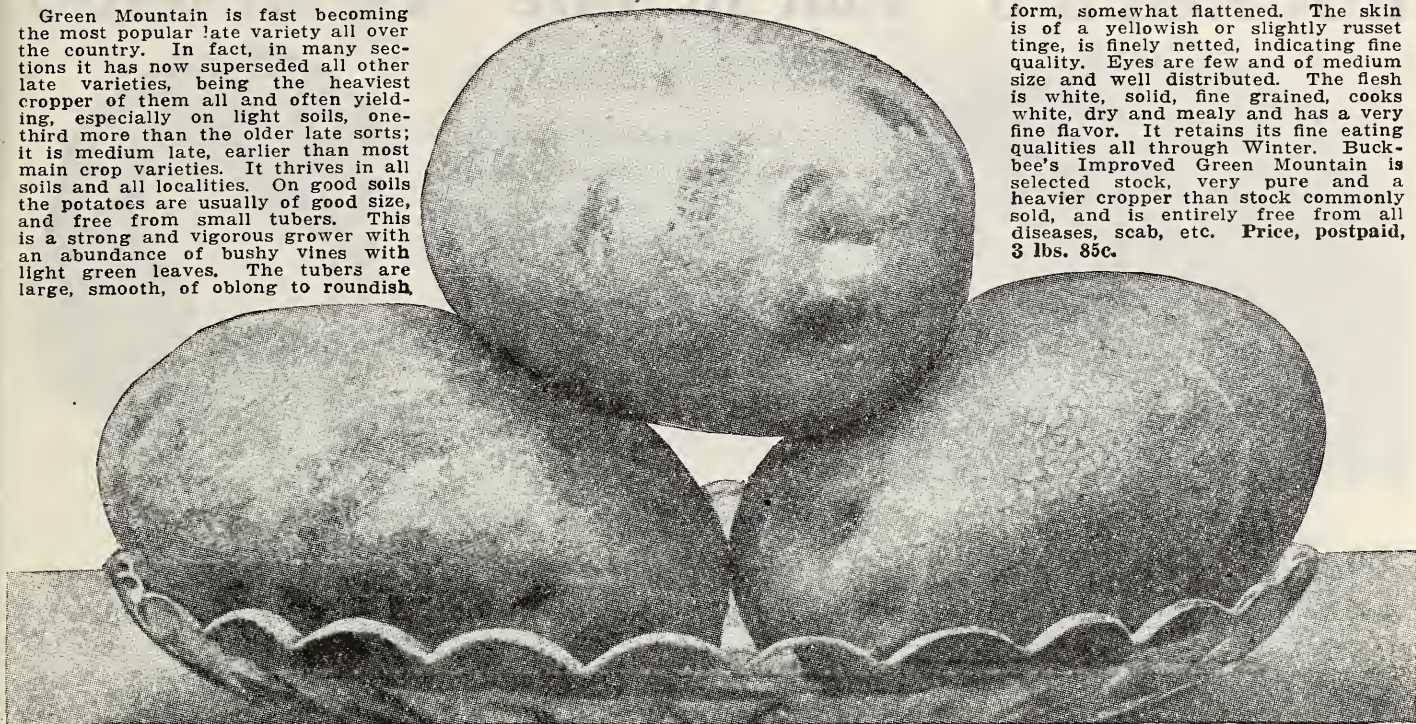

A fine Potato of the Ohio type and as early as that variety. It is in demand everywhere. As now improved we consider it one of the best extra early market varieties grown. As table Potatoes they are not excelled. Price, postpaid, 3 lbs. 75c.

BUCKBEE'S IMPROVED GREEN MOUNTAIN POTATOES

Green Mountain is fast becoming the most popular late variety all over the country. In fact, in many sections it has now superseded all other late varieties, being the heaviest cropper of them all and often yielding, especially on light soils, one-third more than the older late sorts; it is medium late, earlier than most main crop varieties. It thrives in all soils and all localities. On good soils the potatoes are usually of good size, and free from small tubers. This is a strong and vigorous grower with an abundance of bushy vines with light green leaves. The tubers are large, smooth, of oblong to roundish

form, somewhat flattened. The skin is of a yellowish or slightly russet tinge, is finely netted, indicating fine quality. Eyes are few and of medium size and well distributed. The flesh is white, solid, fine grained, cooks white, dry and mealy and has a very fine flavor. It retains its fine eating qualities all through Winter. Buckbee's Improved Green Mountain is selected stock, very pure and a heavier cropper than stock commonly sold, and is entirely free from all diseases, scab, etc. Price, postpaid, 3 lbs. 85c.

CARMAN No. 3

The Carman No. 3 is one of the greatest yielding Potatoes ever introduced. The tubers are borne very close to the plant, a single turn of the fork turning out every Potato. It is of a large size and of the shapeliest form. Eyes are few and shallow. It is a perfect keeper and is not surpassed as a table variety. Skin and flesh of extreme whiteness. It has no hollow heart or any dark parts. We recommend this Potato to our customers as being unqualifiedly one of the best of all late sorts. Price, postpaid, 3 lbs. 70c.

Large, of oval form and rather flat, with few and shallow eyes; the smoothest and cleanest potato grown; skin white, as is also the flesh, which is of best quality; it comes dry and floury. Medium late and best drought resister. Although it is a large yielder, it grows but few and small vines. It is hardy and will stand the heaviest manuring without getting scabby or spotted. Under ordinary circumstances they will yield from 300 to 400 bushels per acre, but by heavy manuring this yield can be double. Price, postpaid, 3 lbs. 65c.

SIR WALTER RALEIGH

A white-skin, main crop Potato much resembling Rural New Yorker No. 2, of which it is a seedling. The Cream of the Extra Early Radishes

Buckbee's selected strains of Extra Early Radishes, listed on this page, are grown from transplanted roots, are the earliest and finest known, and are bred for disease resistant qualities. Will invariably produce roots even in size, shape, maturity with small tops, rich, bright colors and command the highest market prices.

BUCKBEE'S ROCKFORD BEAUTY

A Truly Wonderful Radish.

Very early—only a day or two later than Rapid Forcing. Of bright scarlet color, with a large white tip covering almost one-half of the roots. Flesh crystal white, tender and crisp. This is one of the most popular Radishes grown for the home as well as for the market, being of most beautiful appearance and exquisite flavor. We control the entire stock of this variety. Pkt. 10c; oz. 15c; 2 oz. 25c; $\frac{1}{4}$ lb. 40c; $\frac{1}{2}$ lb. 75c; lb. \$1.25.

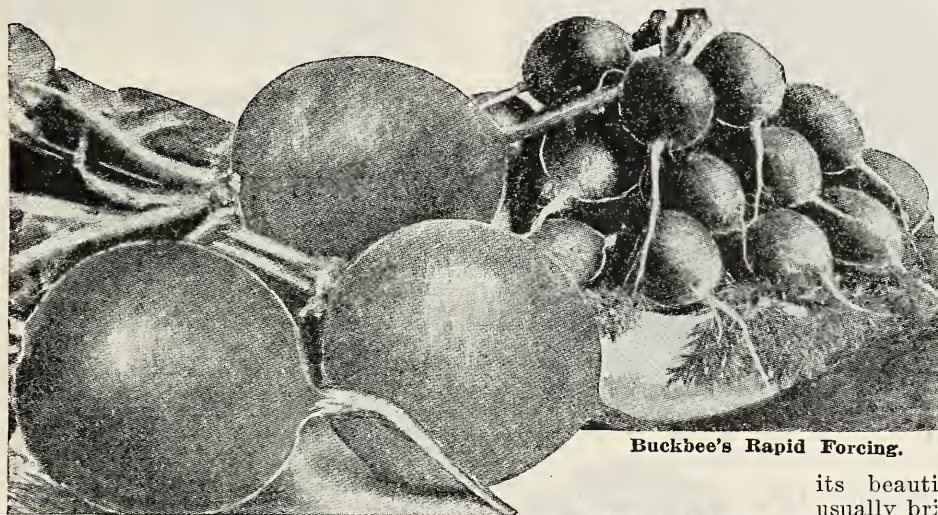

BUCKBEE'S RAPID FORCING

The Earliest of All Radishes.

Quick growth is one of the main essentials for a crisp and tender Radish. Buckbee's Rapid Forcing matures in about 14 days from sowing. This in itself makes it of especial value for the market garden. This Radish is of a fine turnip shape. It remains in good condition without getting hollow or pithy longer than any other extra early variety. The flesh is pure white, crisp and of very pleasant flavor. The skin is a most attractive bright scarlet. The leaves are very short, which admits of close sowing. Its extreme earliness,—maturing before all other kinds—

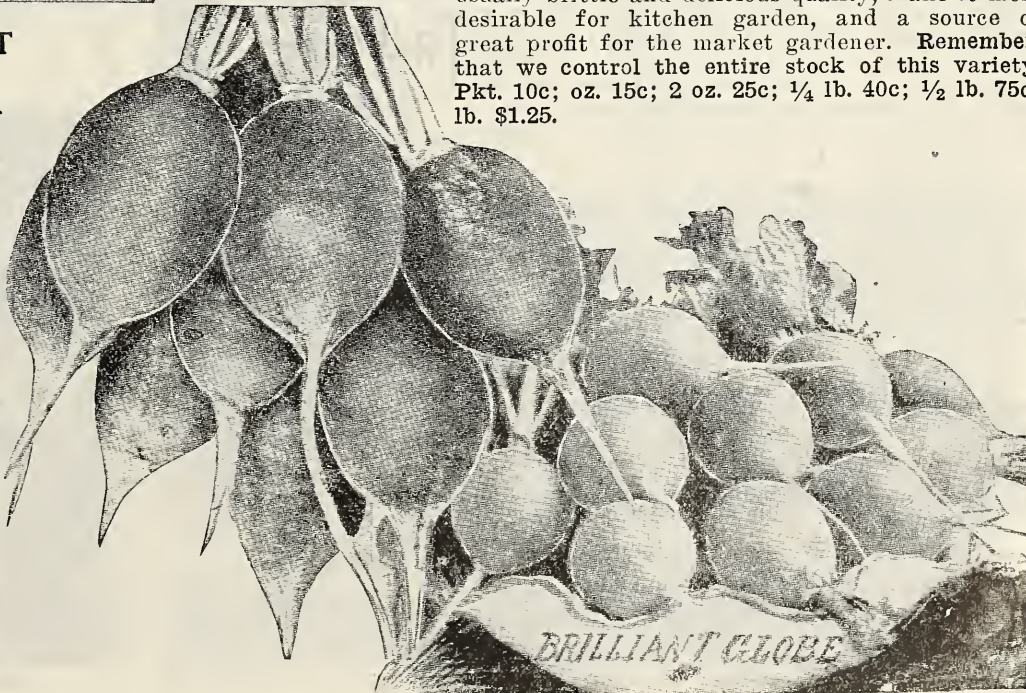

its beautiful bright scarlet color, and its unusually brittle and delicious quality, make it most desirable for kitchen garden, and a source of great profit for the market gardener. Remember, that we control the entire stock of this variety. Pkt. 10c; oz. 15c; 2 oz. 25c; $\frac{1}{4}$ lb. 40c; $\frac{1}{2}$ lb. 75c; lb. \$1.25.

BUCKBEE'S BRILLIANT GLOBE

Can't be beat for home use and market purposes.

Buckbee's Brilliant Globe is a great improvement on the well-known Scarlet Globe, as it runs more even in shape and size, is of a richer and brighter color and is very much earlier. It will surely take the place of the older variety where known. It is well suited for greenhouse and hotbed forcing, and also for growing outdoors. It is of attractive globular form, of magnificent, glowing, bright scarlet color, and has pure white, crisp, tender and juicy flesh. We especially recommend this variety to the market gardener, but it is also one of the finest for the home garden. Pkt. 10c; oz. 15c; 2 oz. 25c; $\frac{1}{4}$ lb. 40c; $\frac{1}{2}$ lb. 75c; lb. \$1.25.

Buckbee's 'Full of Life' Seeds Are Bred for Disease Resistant Qualities

BUCKBEE'S NEW EARLY RED KING

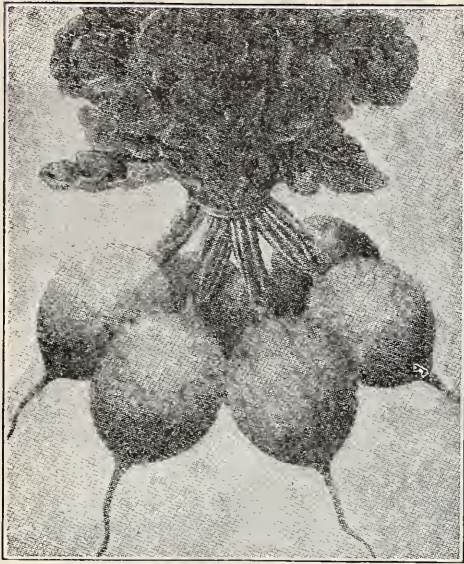

The Earliest and Best; Sweet, Crisp, Juicy, Mild; Wonderful Yields, Beautiful Color, Uniform Size.

This new variety is our own production and is one of the earliest ever grown—fully matured Radish being pulled on our Rockford Trial Grounds in the short space of 14 days from time seed was planted. Won favorable comment and helped to secure First Prize and Diploma at the State Exhibit at the Springfield, Illinois, State Fair. It is of small size; just right for the purpose; beautiful dark red skin; ivory white flesh; extremely mild and sweet flavor; retains its crispness even after quite old and never becomes pithy. Pkt. 10c; oz. 15c; 2 oz. 25c; ¼ lb. 40c; ½ lb. 75c; lb. \$1.25.

BUCKBEE'S CRYSTAL FORCING

The Quickest Growing Round White Radish.

Without an equal. Matures in 2 weeks. Pure snow-white in color—fairly crystal—so clear and transparent. Nothing is more tempting and pleasing than a combination of Buckbee's Crystal Forcing and Buckbee's Rapid Forcing when arranged in market or on the table. Pkt. 7c; oz. 12c; 2 oz. 20c; ¼ lb. 35c; ½ lb. 60c; lb. \$1.00.

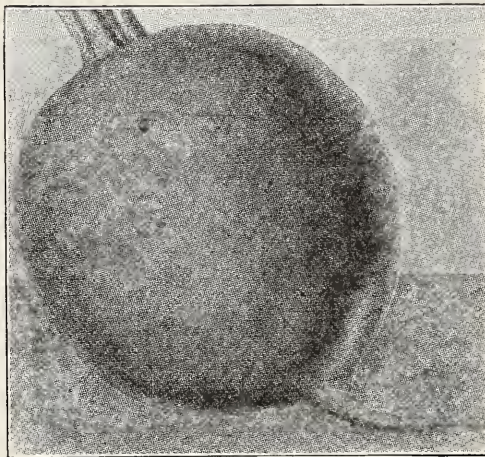

Buckbee's New Early Red King.

BUCKBEE'S CRIMSON GIANT GLOBE

Sweet, Crisp, Juicy, Mild—Wonderful Yields, Beautiful Color, Large Size.

This Radish is an entirely new type and differs radically from all varieties hitherto in cultivation, insofar as its roots attain more than double the size of other round, early varieties, without getting pithy or hollow. It is very early, notwithstanding its size. Color crimson, flesh pure white, of the best quality. The roots often weigh 1½ ounces each and are crisp and juicy. Fine for outdoors and forcing. The seed should be sown very thinly to permit full development of the roots. Pkt. 8c; oz. 12c; 2 oz. 20c; ¼ lb. 35c; ½ lb. 65c; lb. \$1.25.

Buckbee's Crimson Giant Globe.

BUCKBEE'S NEW TRIUMPH

The Greatest Radish Novelty.

Both unique and useful. Matures early, generally in about 14 days. Nothing produces a more pleasing effect on the table than this beautiful variety. The roots are of globular form, tops are short and attractive, which make it valuable for cultivation under glass. The flesh is very crisp and solid and of mild, pleasing flavor. Its most attractive and distinctive feature, however, is the unique color of the skin. The ground color is beautiful ivory white, striped horizontally and splashed with bright scarlet. Sure to become popular with market gardeners and private planters. Pkt. 8c; oz. 15c; 2 oz. 25c; ¼ lb. 40c; ½ lb. 75c; lb. \$1.25.

BUCKBEE'S NEW LEAFLESS

The extra early forcing Radishes lately introduced are remarkable for the small size of their leaves; they develop their roots in so short a time that the latter are practically in advance of the leaves. The character is still more noticeable in this new variety. The seed leaves, which are noted for great development from the start, are the only green parts to be seen on the plants until the bulbs are almost large enough for pulling. At that time one or two short leaves only are produced. The roots are of the shape and color of our Rapid Forcing Radish. Pkt. 7c; oz. 12c; 2 oz. 20c; ¼ lb. 35c; ½ lb. 60c; lb. \$1.10.

EARLY SCARLET TURNIP WHITE-TIPPED

For many years we have found this variety to be the most popular of all among private gardeners, and unsurpassed as a Table Radish, where, by reason of the strong, contrasting colors of the root, it makes a most attractive appearance. The flesh is crisp, white and tender, and extremely mild. Roots smooth, fine bright scarlet, with clear white tips. Very early. Very popular for planting outdoors and a splendid market variety. Pkt. 6c; oz. 12c; 2 oz. 20c; ¼ lb. 35c; ½ lb. 55c; lb. 95c.

VICK'S SCARLET GLOBE

Its color is a rich scarlet. It has a small top and is a highly bred Radish. A grand forcing variety and excellent for sowing outdoors. Pkt. 6c; oz. 12c; 2 oz. 20c; ¼ lb. 35c; ½ lb. 55c; lb. 95c.

EARLY WHITE TURNIP

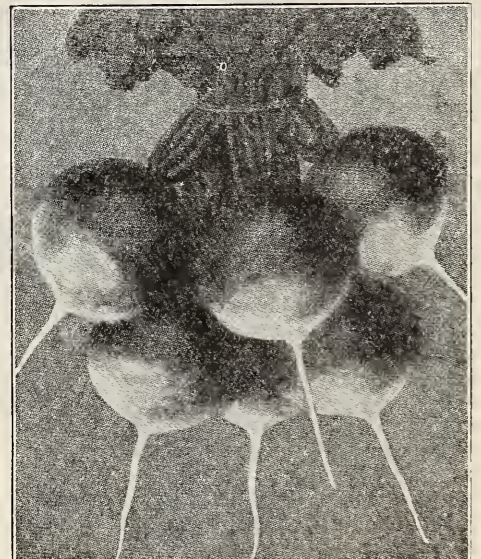

Very handsome; of quick growth; sweet, crisp and tender. Skin ivory white; flesh pure white. Pkt. 6c; oz. 12c; 2 oz. 20c; ¼ lb. 35c; ½ lb. 55c; lb. 95c.

This new Squash is a heavy yielder and the best all-purpose variety every grown. Can be used when quite young and will keep splendidly for a winter squash. The color is grayish-green, shell soft, so that it can be cut with a knife. It grows from eighteen to thirty inches long and six to nine inches in diameter. It is very prolific but a shy seeder. Flesh is of high color; entirely free from fibre or stringiness. Cooks up perfectly smooth and is of most delicious flavor. Yields well and is of such superb table quality that many growers will have no other for their own use. Matures rather late and should be planted early if very large fruits are desired. BUCKBEE'S IMPROVED HUBBARD

The Famous American Standard Winter Squash.

The Grand Old Favorite—This is a superior selection of this famous variety and one of the best winter Squashes; flesh bright orange yellow, fine grained, very dry, sweet and rich flavored; keeps perfectly good throughout the winter; boils or bakes exceedingly dry and is esteemed by many to be as good baked as a sweet potato. Our stock is most carefully selected with regard to quality of the flesh and color and wartiness of the shell, but the latter peculiarities are largely determined by the soils in which the Squashes are raised. Our customers can plant this variety in perfect confidence that every fruit will be a pure Hubbard. Pkt. 8c; oz. 15c; 2 oz. 28c; ¼ lb. 50c; ½ lb. 85c; lb. \$1.50.

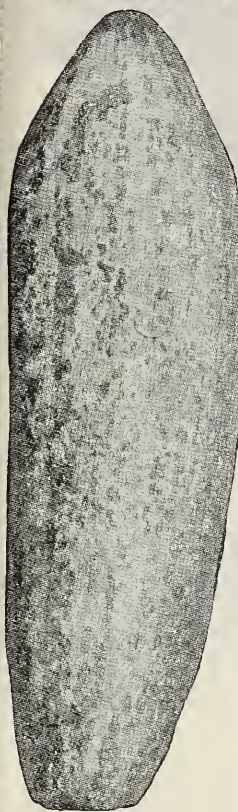

New Golden Hubbard.

NEW GOLDEN HUBBARD

First Offered by Us as a Novelty. Now Known and
Grown in Every State in the Union.

This is a true Hubbard Squash, except in color, which is bright golden. It ripens its crop very early and uniformly, thus making it a certain cropper. The fruits are very uniform in size, weighing from 6 to 8 pounds, and in shape are like the Hubbard. Though maturing early, they are wonderfully long keepers, so they can be held over in good condition for spring use. The shell is warty, hard and strong, and a very beautiful orange red color, except for a bit of olive green on the blossom end. The flesh is deep orange and uniformly so to the rind, never having the green tinge so objectionable in other sorts. It cooks very dry, fine grained and good flavored. Pkt. 6c; oz. 15c; 2 oz. 25c; ¼ lb. 40c; ½ lb. 75c; lb. \$1.25.

He concludes his article by saying that, although he planted six different varieties, "The Beefsteak Tomato proved to be the best by far both in number and size of Tomatoes."

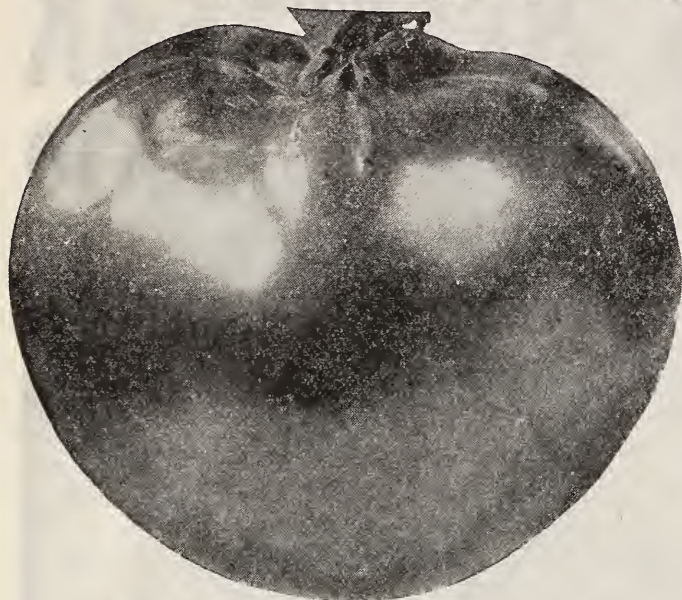

True Originator's Stock Can Only Be Obtained from H. W. Buckbee

THE EARLIEST SCARLET TOMATOES

BUCKBEE'S EARLIEST MARKET

The Earliest Large Smooth, Scarlet Tomato in Existence.
Indispensable to the Market Gardener.
A Great Money-Making Tomato.

Buckbee's Earliest Market.

This variety bears fruit which in size, shape, color, solidity and quality compares favorably with the noted later kinds, and by repeated trials at Rockford Seed Farms and elsewhere has demonstrated that it ripens up a larger portion of its crop the earliest of any variety. It is, without question, the earliest good, large scarlet Tomato. Gardeners and Tomato fanciers will readily see the advantage obtained over their competitors by growing Buckbee's Earliest Market. This is the variety which will give them the opportunity to be first on the market with a large crop of beautiful large fruits, selling readily at good prices.

Compared with the well-known Earliana, Earliest Market is about a week earlier, the fruits are fully as large, smoother, have no hard core, while Earliana is often rough and has large seed cavities. Furthermore, Earliest Market is much more prolific. An excellent kind also for the home garden, and if you have not given this wonderful variety a trial, be sure to include it in your order for 1926. Pkt. 10c; oz. 40c; 2 oz. 75c; 1/4 lb. \$1.40; 1/2 lb. \$2.50; 1 lb. \$4.50.

MANSFIELD TREE OR MAMMOTH PRIZE

This wonderful variety grows from 10 to 15 feet in height, and will begin to ripen by July 4th and bear until killed by frost. Flesh firm and solid, almost seedless and of the most delicious flavor. Pkt. 8c; oz. 35c; 2 oz. 65c; 1/4 lb. \$1.25.

CHALK'S EARLY JEWEL

One of the largest, smoothest, best flavored extra early bright red Tomatoes. Within a week to ten days as early as Spark's Earliana, it is even a heavier cropper, with Tomatoes of a larger size and sweeter flavor. Pkt. 7c; oz. 30c; 2 oz. 50c; 1/4 lb. 90c; 1/2 lb. \$1.65; 1 lb. \$3.00.

BUCKBEE'S NEW 50-DAY TOMATO

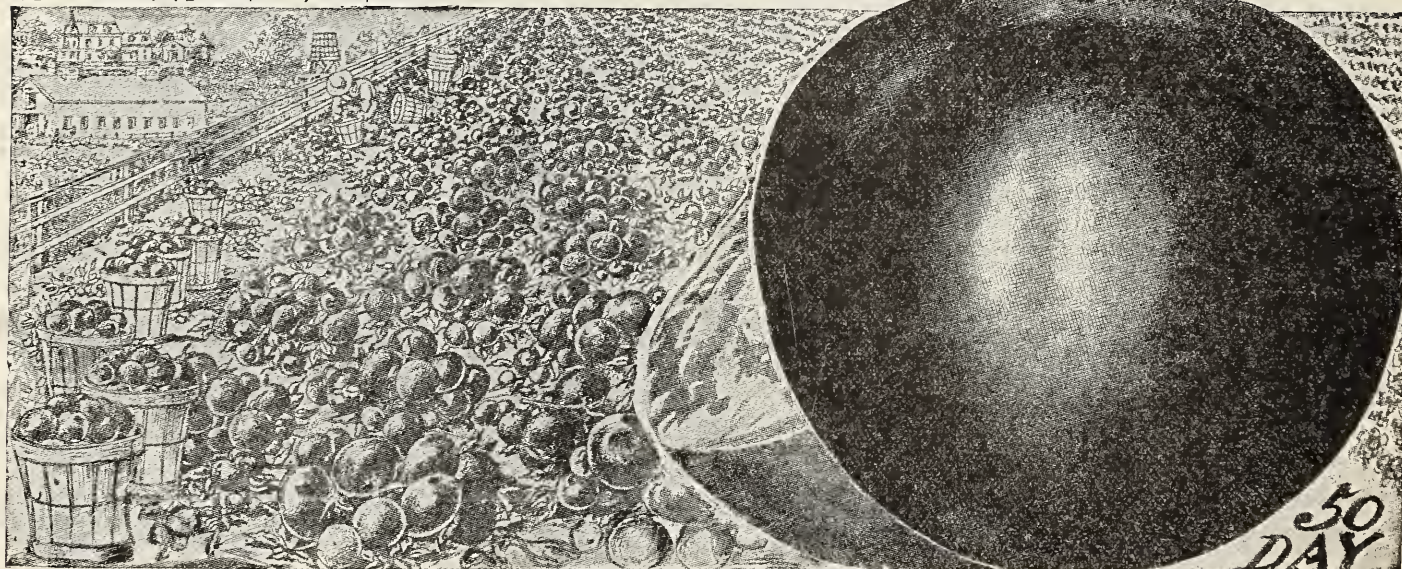

The Largest Fruited, the Smoothest, the Finest in Quality of all Extra Early Scarlet Tomatoes.

Originated on our Rockford Seed Farms. Called 50-Day Tomato because it produces large, ripe fruits on strong plants in 50 days from time they are set in the open ground.

The vines are short, very vigorous, enormously productive and ripen a very much larger crop at the early part of the fruiting season than any other extra early variety. The fruits are globular, always entirely free from cripples, wrinkled or cracked fruits, and weigh on an average about 5 oz. each, although many fruits as heavy as 6 1/2 oz. each and over have been found in our fields. The color of the fruits is a beautiful bright scarlet. They ripen evenly, well up to the stem, have no hard core, small seed-cells, and are practically all heavy, solid meat of mild and most delicious sweet flavor. The skin is thin, but very tough, making it a splendid long-shipping variety.

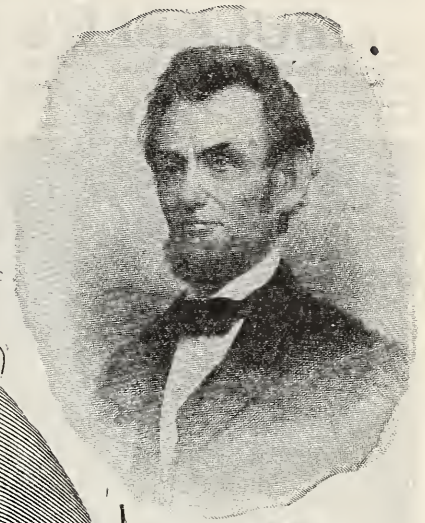

Compared with Earliana, 50-Day is a much heavier cropper and its fruits of much larger size, smoother, of better quality, containing less seed and more meat. They are of better appearance and therefore better sellers; furthermore, they ripen practically as early. Fifty-Day will soon replace Earliana, and it should also be planted in place of second early sorts like Bonny Best and Chalk's Jewel, being earlier, more productive and producing fruits fully equal in size, beautiful appearance and of better quality; only Buckbee's Earliest Market is a few days earlier than 50-Day, but has somewhat smaller fruit. Price, pkt. 10c; oz. 50c; 2 oz. 90c; 1/4 lb. \$1.50; 1/2 lb. \$2.50; 1 lb. \$4.50.

BUCKBEE'S NEW TOMATO ABRAHAM LINCOLN

The Giant of all Tomatoes

BUCKBEE'S ABRAHAM LINCOLN
The World-Beating Tomato

BUCKBEE'S NEW TOMATO—ABRAHAM LINCOLN—This world-beating Tomato was originated on Buckbee's Rockford Seed Farms and named in honor of Illinois' greatest son—Abraham Lincoln. This Giant of All Tomatoes was introduced by us in 1923 and is the largest Tomato ever grown. We have had 9 tomatoes in a single cluster with a total weight of 7 pounds; the average weight is about a pound and we have grown many weighing nearly 3 pounds. Beautiful dark red, attractive fruits, heavy, large, sweet, solid and meaty with very few seeds. For so large a tomato it is remarkably smooth and free from cracks and seams.

BUCKBEE'S NEW TOMATO—ABRAHAM LINCOLN—usually bears fruit in clusters of from four to six; the individual fruit, 5 to 7 inches in diameter, runs remarkably uniform in size and shape, being almost round, solid and weighs about one pound each, or heavier than any other tomato grown; the surface is very smooth and seldom cracks; the color, a rich blood-crimson, also permeates the flesh to the very heart; it ripens thoroughly, coloring up clear to the stem.

BUCKBEE'S NEW TOMATO—ABRAHAM LINCOLN—possesses one crowning merit, the phenomenal solidity of the flesh. Even the seeds, which are small and few, are embedded in flesh of meaty firmness.

BUCKBEE'S NEW TOMATO—ABRAHAM LINCOLN—has superlative merit; it is a sturdy, healthy grower with distinctive bronzy-green foliage; it ripens its first fruits immediately following those of the early sorts and from that time until frost it is practically ever-bearing, yielding enormous quantities of tomatoes, no other variety approaching it in productiveness.

BUCKBEE'S NEW TOMATO—ABRAHAM LINCOLN—on account of its solid character, splendid quality, rich red color of the flesh, and its appetizing appearance, is absolutely unsurpassed for slicing, salads and table use generally, while it is equally superior for baking, boiling and canning—the solidity of flesh and minimum of juice make thickening unnecessary.

BUCKBEE'S NEW TOMATO—ABRAHAM LINCOLN—as a market variety, has already become very popular; its general merit and handsome appearance can not but attract buyers, and it is so solid that it "holds up" well when shipped, even though it does not have the thick, tough skin heretofore considered the most important requisite in a shipping tomato.

Seed of Buckbee's New Tomato Abraham Lincoln can only be obtained from the originator, H. W. Buckbee, Rockford Seed Farms. Buckbee's "Full of Life" Seeds are bred for disease resistant qualities. Pkt. of 100 seeds 20c; 3 pkts. 50c; ¼ oz. \$1.25; ½ oz. \$2.00; 1 oz. \$3.50. Postpaid.

BUCKBEE'S "Full of Life" TREE TOMATOES

The so-called Tree or Bush sorts are the most valuable Tomatoes for the home garden, where room is generally short, as they grow stiffly erect and have close, heavy foliage, allowing very close planting. Even if set as close as 12 x 24 inches apart they will produce an abundant crop. All of these varieties are very productive and of the finest quality. Buckbee's "Full of Life" Seeds are bred for disease resistant qualities.

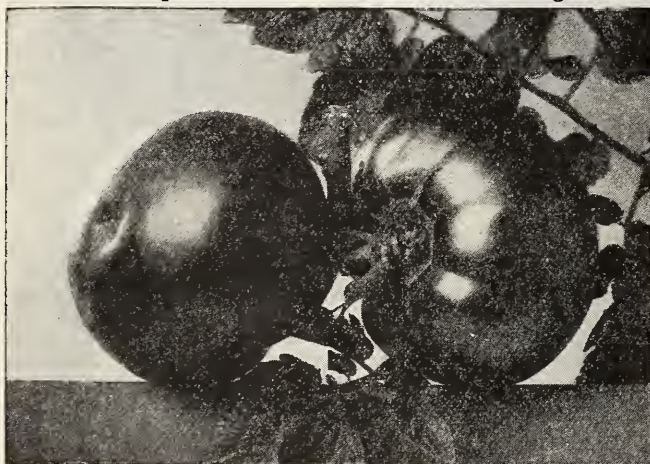

Firm, Solid, Thick Flesh BUCKBEE'S NEW TREE TOMATO Large Meaty Center

This grand tomato owes its popularity to its stiff, vigorous, upright growth, with fruit well above the soil, and to the earliness with which it reaches its maturity. In color the fruit is purplish pink, form always round and symmetrical and of medium size. Buckbee's New Tree Tomato is immensely productive, clusters of four to six fruits being produced in abundance along the stem. All of the fruits grow to a marketable size.

The table qualities are the best as this is a good slicing

variety, the seed cells being surrounded by rich heavy flesh. This feature also makes it desirable for canning. As a shipper it stands up remarkably well, arriving at its destination in fully as good condition as when it left the field. This wonderful tomato leaves nothing more to be desired, as it is mild, pleasant and of delicious flavor. Being a strong, robust grower it has the broad foliage which prevents sunburn in hot sections. Pkt. 10c; oz. 45c; 2 oz. 80c; ¼ lb. \$1.50; ½ lb. \$2.75; lb. \$5.00.

Buckbee's Early Prosperity.

large-fruited Tomatoes. Pkt. 8c; oz. 35c; 2 oz. 65c; ¼ lb. \$1.25; ½ lb. \$2.30; lb. \$4.00.

BUCKBEE'S WORLD'S FAIR

Golden Yellow Variety; Solid and Attractive

A very choice, dwarf-growing yellow Tomato of upright or tree habit. Very early and a heavy yielder. The fruit is a beautiful, golden yellow color, of a medium size, good shape, round and solid, and contains very few seeds. Flavor is delicious; very sweet and mild. A wonderful table variety and, when sliced with red or purple sorts, is very attractive. Pkt. 8c; oz. 40c; 2 oz. 75c; ¼ lb. \$1.45; ½ lb. \$2.60; lb. \$4.75.

DWARF PONDEROSA

A true Dwarf Ponderosa. The fruits are glossy purplish-red, with solid, meaty, bright red flesh; no core and but few seeds. They are fully as large as those of the Tall Ponderosa. Plants grow about 2 feet high, stocky and branching, bearing Tomatoes in great clusters from July until frost. This enormous but erect growing variety is one of the most important advances made in Tomatoes, especially adapted to the home gardens. The original plant was discovered in a large field of Ponderosa. Pkt. 10c; oz. 35c; 2 oz. 65c; ¼ lb. \$1.25.

EARLY DWARF CHAMPION—Very early; hard to beat for home use. Color purplish pink. Fruit smooth, symmetrical, solid and meaty. Pkt. 8c; oz. 40c; 2 oz. 70c; ¼ lb. \$1.30; ½ lb. \$2.40; lb. \$4.25.

DWARF STONE—The largest fruited dwarf tree sort, excepting Masterpiece and Dwarf Ponderosa. The fruits are very similar to New Stone in color, shape and size. They often weigh a pound each and more, are of a bright scarlet color, very smooth, firm and of excellent quality. Pkt. 7c; oz. 35c; 2 oz. 65c; ¼ lb. \$1.20; ½ lb. \$2.10; lb. \$3.75.

BUCKBEE'S EARLY PROSPERITY

Wonderful New Tomato of Great Value

Prosperity is a Tomato of sterling worth, one that is bound to please. It is the earliest of the Tree Tomatoes, with large perfect fruits; a splendid keeper, an enormous yielder and fine shipper. Color bright scarlet red. Invaluable for the home garden, market garden or for shipping purposes. The vines are dwarf but vigorous and productive. Although an intermediate or rather late maturing variety, the fruits are of good color, being an attractive bright red, exceedingly smooth and very solid. It is a desirable sort for the home garden. We consider this the best of the dwarf

New Dwarf Ponderosa.

NEW EARLIANA—Buckbee's Pedigreed Strain

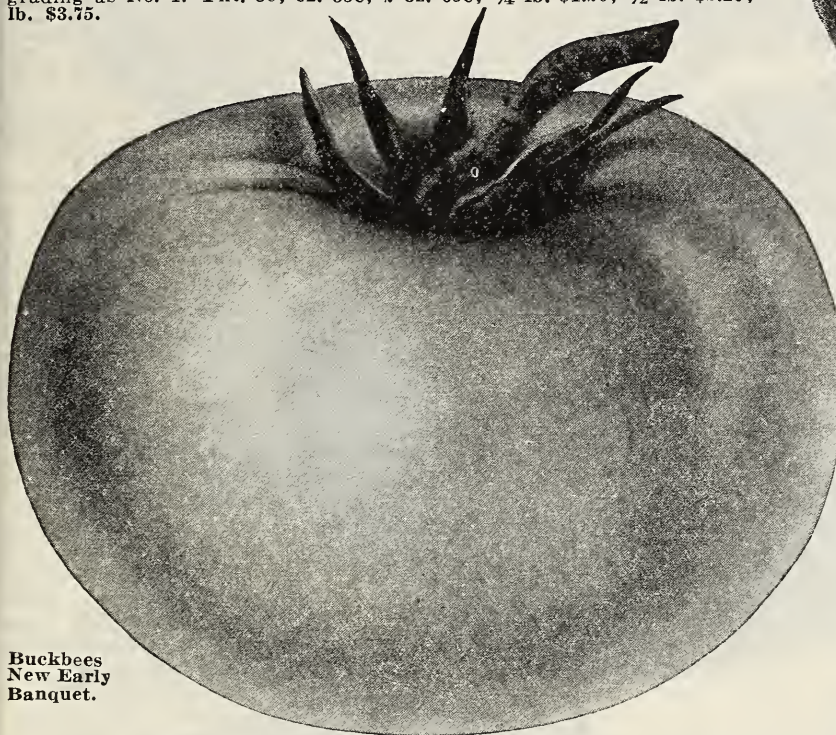

An extremely early, smooth, bright red Tomato of good size and flavor. Is among the very first ready for the market, and not only remarkable for its earliness, but for its very large size, handsome shape and bright color. The vines are small but vigorous and very productive, bearing the fruits in clusters near the base of the plant. The fruits grow about 3 inches in diameter, have solid thick flesh of splendid quality and are excellent shippers. Send to Buckbee for the earliest strain. Pkt. 8c; oz. 35c; 2 oz. 65c; ¼ lb. \$1.05; ½ lb. \$1.90; lb. \$3.50.

BUCKBEE'S BONNY BEST

One of the very best early Tomatoes yet introduced; within a week as early as Earliana, but a much heavier cropper, producing Tomatoes of much larger size, more attractive in shape and color. The fruits are very smooth, round, very deep, solidly meaty, with only a few small seed cells; of bright deep scarlet color and of excellent quality. The plants are very vigorous, of robust growth and fruit continuously throughout the season. Very desirable for the home garden and one of the best for market gardeners whose trade demands extra fine fruits. As a canning sort it yields from 12 to 15 tons to the acre, grading as No. 1. Pkt. 8c; oz. 35c; 2 oz. 65c; ¼ lb. \$1.20; ½ lb. \$2.10; lb. \$3.75.

BUCKBEE'S NEW EARLY BANQUET

The Earliest and Finest Very Large Scarlet Tomato. The most valuable early variety introduced in the last 30 years.

As large and more productive and earlier than Stone, the king of all main crop tomatoes for the canner and market gardener.

This new variety which we introduced in 1918 has all the good qualities of the old Stone, it has the same large solid, smooth fruits, and its immense productiveness but it far excels it in earliness, beginning to fruit about 2 weeks earlier, hence, lengthening the bearing season.

The fruits are brilliant, bright-red often weigh a pound and a pound and a half each and are borne in large clusters averaging six and more to the cluster; all fruits are invariably of marketable size and have flesh of the richest, brightest red color, which makes them especially suitable for canning and cat-sup making. Price, pkt. 8c; oz. 35c; 2 oz. 65c; ¼ lb. \$1.25; ½ lb. \$2.30; lb. \$4.00.

LIVINGSTON'S PERFECTION

Popular variety everywhere. The solid fruits stand shipment nicely. Very smooth, bright red sort of excellent quality. Pkt. 6c; oz. 25c; 2 oz. 40c; ¼ lb. 75c; ½ lb. \$1.30; lb. \$2.50.

LARGE RED TROPHY

Main crop. Solid, smooth and of uniform size. Color a rich crimson scarlet. Quality excellent. Pkt. 6c; oz. 25c; 2 oz. 45c; ¼ lb. 80c; ½ lb. \$1.45; lb. \$2.75.

NEW JOHN BAER

An extra early Tomato, large, smooth, bright scarlet fruits of excellent quality. Short, vigorous vines, enormously productive. Fruits larger, smoother, with less seeds than those of Earliana, but somewhat later. For early crops the New John Baer Tomato is planted exclusively in many sections supplying large city markets. Plants are compact in growth, with short, close-jointed branches, setting fruits very freely in the center. So freely are the fruits set that one plant usually will produce ½ to ¾ of a bushel of uniform Tomatoes in a season. Most valuable for the market gardener and very desirable for home use. Pkt. 8c; oz. 35c; 2 oz. 65c; ¼ lb. \$1.20; ½ lb. \$2.10; lb. \$3.75.

THE NEW STONE

Buckbee's Improved Strain

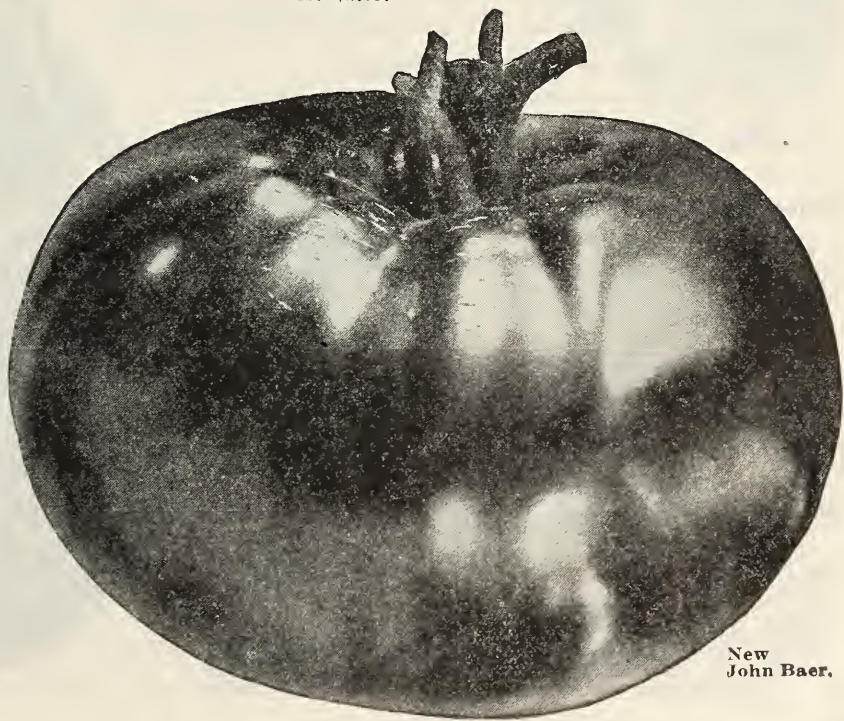

A standard main crop variety of red Tomatoes. Late, enormously productive, with very large, very deep solid and very smooth fruits of splendid shape and finest quality. Unsurpassed for slicing and canning. The vines are large, vigorous and very productive. Buckbee's Improved Strain of this old and valuable variety is the finest on the market, being larger, smoother, more uniform in size and shape and of brighter color than that offered by others. Pkt. 6c; oz. 30c; 2 oz. 50c; ¼ lb. 90c; ½ lb. \$1.65; lb. \$3.00.

BURPEE'S MATCHLESS

PINK or PURPLE TOMATOES

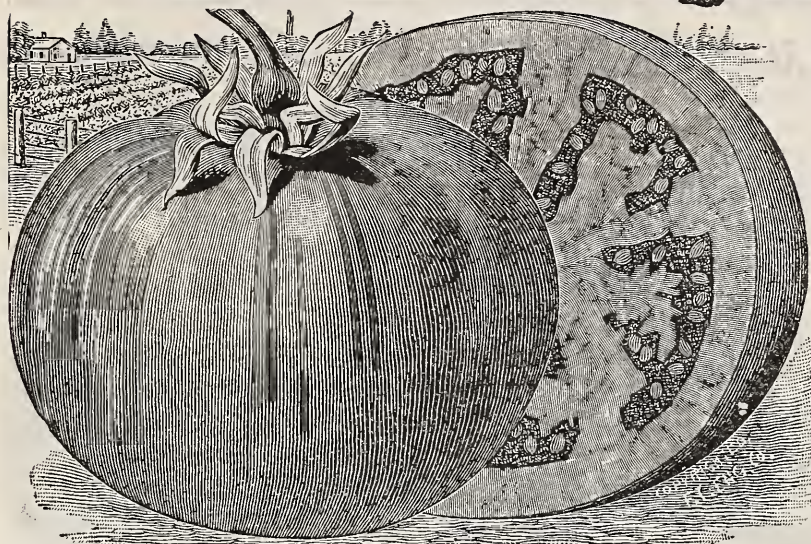

Buckbee's "Full of Life" Seeds Are Bred for Disease Resistant Qualities

BUCKBEE'S NEW EARLY JUNE PINK

The Earliest Pink in Cultivation

The earliest of the pink fruited Tomatoes, similar to the popular scarlet-fruited Earliana in growth of vine, shape and size of fruit and time of maturing. This is of exceptional value to market gardeners, who want an early, pink-fruited Tomato. The vines are compact and branch freely, bearing their handsome, good-sized deep pink fruits in large clusters continuously throughout the season until frost. It is very popular as a market and shipping variety and most desirable for the home garden. Our seed is superior to that commonly offered by others and will produce fruits earlier, larger, smoother, of better shape and color. Pkt. 8c; oz. 40c; 2 oz. 75c; ¼ lb. \$1.40; ½ lb. \$2.50; 1b. \$4.50.

I want to say that your Seeds are great. Everything I received last year grew in spite of a very cold rainy spring, except parsnips; they did not come up at all, and I believe they were drowned. I cannot recommend your Tomatoes too highly, the 50-Day and the Beefsteak Tomatoes for a main crop. Beefsteak Tomatoes are in a class by themselves absolutely.
C. E. GREENWOOD, Webster, Pa.

New Early June Pink.

LIVINGSTON'S GLOBE

A very beautiful second early variety. The fruits are of large size, specimens weighing over one pound have been grown from our seed, and they retain a marketable size throughout the season. Always smooth, have firm flesh and very few seeds. They will ripen evenly without any green core. The color of the skin is a fine glossy rose, tinged with purple. The Globe is exceedingly productive, the plants being literally loaded with fruit. In quality there can be nothing more desirable, flesh being mild, pleasant, and of delicious flavor. Pkt. 8c; oz. 40c; 2 oz. 75c; ¼ lb. \$1.40 ½ lb. \$2.50; 1b. \$4.50.

Buckbee's Imperial.

BEAUTY

We have been perfecting this to a larger, smoother fruit than the original stock, and think we have made it one of the smoothest and best of the large purple sorts. Fruit large, uniform, very smooth; color purplish pink, flesh light pink, excellent flavor. The vines are large, vigorous, not subject to rust or blight and bear enormous crops until killed by frost. Pkt. 7c; oz. 30c; 2 oz. 55c; ¼ lb. \$1.05; ½ lb. \$1.90; 1b. \$3.50.

EARLY ACME

Vines are large and productive. Fruit is purplish pink, round, smooth and of good size. Early Acme is an early variety good for family and market purposes. Pkt. 6c; oz. 30c; 2 oz. 50c; ¼ lb. 90c; ½ lb. \$1.65; 1b. \$3.00.

FERRY'S EARLY DETROIT

A large and firm purplish pink Tomato. The fruits are very smooth, all of a size, globe shaped and with firm and solid flesh. Quality is unequalled. Pkt. 7c; oz. 30c; 2 oz. 55c; ¼ lb. \$1.05; ½ lb. \$1.90; 1b. \$3.50.

Unquestionably the Most Productive of the Large Purple Tomatoes.

Buckbee's Imperial is fully as early as Beauty, but the fruits are much larger and heavier. The vines are hardy, vigorous and enormous croppers, single plants often yielding under field culture more than a bushel of fully grown, ripe fruits. The plants bear continuously until destroyed by frost. The flesh is firm, of the finest flavor; ripens evenly to the stem. The skin is thin but tough.

Buckbee's Imperial is the best purple variety to grow for the market. A splendid long-distance shipper and most desirable for the home market. Pkt. 10c; oz. 30c; 2 oz. 55c; ¼ lb. \$1.05; ½ lb. \$1.90; 1b. \$3.50.

American Beauty Asters.

AMERICAN BEAUTY ASTERS

The Aristocrats of the Aster Family.

When we first offered the American Beauty in 1918 we had an immense flower of a most pleasing color. This has been perfected so that now we have a flower 4 to 5 inches in diameter. In 1920 we listed for the first time New Purple American Beauty and later the New Lavender and September Pink—three varieties that are now in even greater demand than the original Carmine American Beauty. All four colors come true from seed and are of the same mammoth size as the original. We grow these wonderful Asters on our own farm and select the seed from the finest flowers only.

The flowers are unusually large, 5 to 6 inches in diameter, very double and borne on long stiff stems. The petals are of good substance, consequently flowers remain a long time in perfect condition. These magnificent blossoms being gracefully poised on strong, well-leaved stems 15 to 18 inches long are very desirable as cut flowers for vases in home decoration. Buckbee's Giant Frost Proof Burning Bush.

BUCKBEE'S NEW GIANT FROSTPROOF BURNING BUSH

Strikingly Handsome
For Late Summer and
Fall Show

A new grand foliage plant for the garden may also be used as a pot plant for Christmas and New Year decoration. This differs from the common variety of Burning Bush as it is more than twice the size and remains in splendid condition until after the new year, while the old variety dies early in the Fall. The pyramidal bushes may be grown singly or in the form of a hedge. In the early Fall the whole bush becomes a flaming red—whence the name Burning Bush. The beauty of the plant is in its trim shape and brilliant coloring, which is often the only touch of color in otherwise empty garden.

CHINESE WOOL FLOWER

A World-Beating Floral Wonder

A valuable novelty. A unique form of the Feathered Cockscomb. The plants grow 2 to 3 feet high, branching freely. Each branch terminates in a large ball-shaped flowerhead of rich color, looking as if made of some silky-wool material. All these branches uphold numerous side shoots with smaller heads of bloom intermingled with the attractive green foliage so that one plant forms an immense, beautifully arranged bouquet. Very effective in beds and borders and valuable for cutting. The flowers may also be cut and dried, retaining their bright coloring for a long period. They flower profusely from early June till frost. Besides the original Rose color that we have been offering for the past few years, we also have a clear pink and bright yellow at the following prices:

Chinese Wool Flower—Rose. Pkt. 10c; $\frac{1}{8}$ oz. 45c.

CHINESE LANTERN PLANT

Wonderfully Fascinating and Beautiful

A very showy, hardy, perennial plant; forms dense bushes about 2 feet high; it blooms early and produces freely the first season balloon-like husks, 2 to 3 inches across, much like a husk tomato; inside of these husks the fruit develops. These husks are green first, then gradually change to orange-scarlet; at that period of growth they strangely resemble miniature lighted Chinese lanterns, hence the name. Dried branches covered with these lanterns are used with splendid effect as parlor ornaments for fall and winter decorations. Pkt. 10c; $\frac{1}{8}$ oz. 35c.

Cardinal Climber.

CARDINAL CLIMBER

The Most Beautiful and

A strong and rapid grower attaining in good soil and in a sunny situation a height of 30 feet or more; it has beautiful fern-like, lacinated, rich green foliage, and from mid-summer till frost is literally covered with clusters of tubular flowers, $1\frac{1}{2}$ inches across, of a dazzling scarlet color. No other flower is as graceful and beautiful climber as this wonderful plant. If started outdoors, seed must not be sown until the weather is settled and warm; otherwise the seed is liable to rot. File or cut a small notch in each seed and soak in lukewarm water overnight to hasten germination. Pkt. 10c; $\frac{1}{8}$ oz. 35c.

It is rarely troubled by insects and heat and drought do not seem to affect it in the least. Pkt. 12c; ¼ oz. 30c.

I have bought seed of you many times and always found them O. K.

FRANK MATHESON, Britt, Ia.

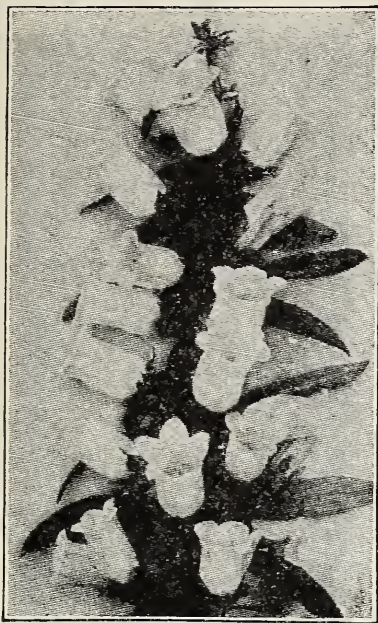

I bought a package of your New Golden Ponderosa Tomato Seed last year and planted same in my hot bed and when plants were large enough to set out in the open ground I sold my other plants, insisting the people try a few of the Yellow which doesn't take very well around here.

The result was that they were more than pleased with same, and I must say that I had a large crop of Yellow Tomatoes, the best I have ever grown of any kind, two or three making all that we wish to eat at one meal and we like plenty of Tomatoes.

Pansies are universal favorites with young and old and, aside from their great beauty, we all treasure them as the symbol of modest worth and true affection. Our new Fiftieth Anniversary selection of new and wonderful varieties contains shades and markings never before seen in a Pansy. All are large size, and many are exquisitely curled. Be sure to have a fine bed of our Mammoth Jubilee this year. The smallest yard must have its Pansies. Not poor, forlorn plants, struggling with heat and drought and hard baked ground, though even there yielding us handfuls of cheery bloom; but, rather, strong, vigorous plants, riotous in the cool, deep, mellow beds they love, made rich with fertilizers, kept free from weeds, and shaded from the hot afternoon sun. In such a bed one may gather great, velvety Pansies by the handfuls. Pansies are now produced in an almost infinite variety of colors and markings. Their brilliancy of shading, extended season of blooming and long keeping characteristics make them general favorites. We have been interested in the bringing forward of advanced types of large varieties in this country as well as in Europe, and our stocks are the very best obtainable. We spare neither pains nor expense to satisfy the most critical trade. Poor Pansy seed is dear at any price. Ours is saved with great care and is the best. New Double Flowering Phlox.

BUCKBEE'S NEW DOUBLE FLOWERING PHLOX

Double Phlox are most desirable annuals for cut flowers, lasting longer than single ones. We have secured a particularly fine strain from France, which has a large percentage of pure white and cream color and is perfectly double and semi-double. The white is especially valuable as a cut flower. The semi-double flowers are fully as desirable as the doubles; in fact, many claim they are even prettier. This Phlox is not rivaled among garden flowers in brilliancy of bloom. They are strong growing, healthy plants, with pretty foliage, and belong in every garden, being one of the most brilliant and at the same time one of the earliest and most satisfactory plants which can be readily grown from seed. The fine blooms, produced in large trusses, furnish a grand display in the garden and are very effective for table decoration. We are sure our customers will be greatly pleased with them. Select Mixed. Pkt. 10c; $\frac{1}{4}$ oz. 40c.

Hardy or Perennial Phlox.

HARDY OR PERENNIAL

(For Plants see Inside Back Cover)

No class of Hardy Perennials is of more importance than the Phlox which succeed under almost any conditions and flower from the end of June until late in the Fall and while they will continue in good condition and flower freely for many years without attention, still they are much improved by liberal cultivation. There are quite a number of different varieties. Our select assortment contains the very cream of the Phlox family. The great rich heads of flower masses are simply magnificent. The most admired sorts and the best bloomers. Mixed. Pkt. 15c; $\frac{1}{4}$ oz. 40c.

Height, 6 inches.

While living in a community where there is keen rivalry in the culture of garden flowers, it is conceded that the Dahlias we grew from seed to bloom in one year surpassed those of our neighbors, although many of theirs were grown from bulbs and inside starting. The foliage was luxuriant while the blooms were of the most beautiful colors, ranging from the purest white to the richest deep purple. We know of no other reason for our success than the marvelous reproducing powers of Buckbee flower seeds.

The Wonder Bedding Plant Acalypha.

The Wonder Bedding Plant Acalypha

Brighter and More Attractive Than Coleus.

AUTUMN TINTS—A most wonderful plant, surpassing the finest Coleus or Begonia in the rich color of the leaves, which are beautifully marked, being oddly and capriciously variegated in blocks, splashes, streaks, or spots, or all, in uncertain proportions. Colors range through combinations of light to very dark greens, pale red to maroon, pale yellow to bronze. Its most important feature is its wonderful qualification for bedding, as it will stand bedding out like a Coleus; in fact, in the sunniest place it produces the highest coloring. 25c each; 3 for 70c, postpaid.

Australian Silk Tree.

Australian Silk Tree

A fine plant for house culture, of rapid growth, finely cut foliage. The young fernlike leaves are of a light brown color, the tips being covered with a soft down, closely resembling raw silk, hence the name "Silk Oak." In its native place it grows large and has bright, orange-colored flowers. 25c each; 3 for 70c, postpaid.

Artillery Plant

Graceful frondlike leaves. When in flower, produces a snappy sound when water is thrown on the leaves. A thin, smoky vapor will also arise when the leaves are sprinkled. Altogether a very attractive novelty, besides being an ornamental house plant. Each, 20c; 3 for 55c, postpaid.

BUCKBEE'S LACE FERN

Graceful Bright Leaves, of Delicate Form and Unusual Beauty. Buckbee's Lace Fern may be grown either as a pot plant or in window boxes and has the advantage of being more graceful, and having finer leaves than the most delicate fern. The individual fronds or leaves grow from 6 to 8 inches in width, and when cut and put in water, retain their shape and color for weeks.

The bright green foliage of very delicate texture falls gracefully, giving it a style and air that cannot be surpassed. No finer decorative plant has ever been introduced. As a house plant it is deservedly popular as it will thrive under almost all conditions.

Strong, young plants, 20c to 30c each, postpaid. Larger plants, \$1.00 to \$1.50 each, by express, not prepaid.

CLEMATIS, WHITE BEAUTY—Without question this is one of the most beautiful of our hardy flowering vines. The flowers are pure white, three-fourths of an inch in diameter, star-shaped, and are borne in great panicles or clusters of bloom, fairly covering the plant. These clusters are carried on long, slender stems, and stand out boldly from between the glossy-green leaves. The fragrance of the flowers is delicious, resembling the English Hawthorn blossoms. It begins to bloom in August, at a time when most other hardy climbers are out of bloom—an inestimable advantage. It is a strong, rapid grower, quickly reaching a height of from 15 to 20 feet and spreading out when trained to wires or strings. It is perfectly hardy in all sections of the country, and it is, in our opinion, the most valuable among hardy climbing vines. A grand porch climber. **Strong roots, 45c each; 3 for \$1.25. Larger roots, 65c each; 3 for \$1.85, postpaid.**

Therefore when planting varieties marked (P) it will be necessary to have every third row a Perfect Flowering or (S) variety to properly fertilize the bed; much finer fruit will be obtained by so doing.

For example—If your order calls for 200 Great Ruby (P) you should also have 100 Great Northern (S) to properly fertilize the bed. Plant the first two rows with Great Ruby (P) and the third row with Great Northern (S) and so on; or you can use any other (P) and (S) varieties in the same manner.

EVERBEARING OR FALL-BEARING STRAWBERRY

A dish of luscious strawberries in the Fall is a luxury which everyone who owns a garden could enjoy. Plant at least twenty-five plants, but if you can spare the room plant 100 or more. Keep all blooms picked off in the Spring and do not allow the plants to bear regular crops in June, thus conserving their strength for the Fall crop.

BARLEY.

FIELD BEANS

IMPROVED WHITE NAVY BEANS—The common White Field Beans. We have selected a stock of this variety which ripens uniformly. The plants are large, spreading, with pods $3\frac{1}{2}$ inches long, containing 6 beans. Postpaid, pkt. 8c; $\frac{1}{2}$ lb. 15c; lb. 25c; 3 lbs. 65c.

WHITE TEPARY—Grows and produces a crop with less moisture than any other plant known. A most valuable dry farming crop for the west. The Tepary can easily be distinguished from ordinary Beans by its more slender vines and thinner and smoother leaves. The pods are small, only about 3 inches long. The seed is smaller than that of the Navy, oval and of a pure white color. As a food, Tepary is equal to any Bean known to commerce. When soaked in water they swell to twice their original volume and more than double in weight. Drill in rows 2 to 3 feet apart and 4 inches apart in the rows. Sow 12 lbs. to an acre. Postpaid, pkt. 8c; $\frac{1}{2}$ lb. 15c; lb. 25c; 3 lbs. 60c.

BARLEY

SUCCESS BEARDLESS—This is the earliest Barley known. It is six-rowed and beardless. The absence of beards makes it much more agreeable to handle in threshing and also makes it a safer and better food for stock than bearded varieties. It can be grown on any soil. Makes good yields on poor, thin lands and stands up well and yields big crops of 50 to 75 bushels on rich land. Success Beardless Barley is a vigorous grower; has strong straw and heavy, well filled heads. Postpaid, pkt. 10c; lb. 25c; 3 lbs. 70c.

WISCONSIN PEDIGREE BEARDED—A great improvement over Oderbrucker and Manshury, which we have stopped growing. The greatest of all six-rowed bearded varieties. Wisconsin Pedigree Barley has yielded from 5 to 20 bushels more than common varieties, and has very stiff straw. The heads are unusually large and long and are completely filled out with very plump grain, which is very uniform in size, brighter and whiter than that of most other sorts and very attractive. Postpaid, pkt. 10c; lb. 25c; 3 lbs. 70c.

NEW WHITE HULLESS—This Barley is hullless and beardless. The kernels shell out without the hulls and are very pretty, plump, of oval shape and pure white. It is a very early variety, ripening before the bearded varieties. It can be sown, therefore, after all other grain is planted and it will yet ripen before oats and wheat. In the western states it is often sown as a catch crop. Postpaid, pkt. 10c; lb. 30c; 3 lbs. 80c.

SOY BEANS

Soys are used with great profit as soil renovators, and are especially valuable on sandy soils. It always pays to inoculate. We offer artificial soil inoculation for Soys on page 176.

EARLY BROWN or OHIO 9035—Will mature in 115 to 120 days; 2 to 3 feet high. A remarkably heavy yielder of grain and forage. More than 50 bushels of grain and $3\frac{1}{2}$ to 4 tons of straw per acre have been harvested. Postpaid, pkt. 10c; lb. 25c; 3 lbs. 60c.

EBONY or BLACK BEAUTY—Matures in 110 to 115 days, well suited for all parts of the cornbelt. Splendid for forage and reasonably good for grain; $2\frac{1}{2}$ to 3 feet high. Postpaid, pkt. 10c; lb. 25c; 3 lbs. 60c.

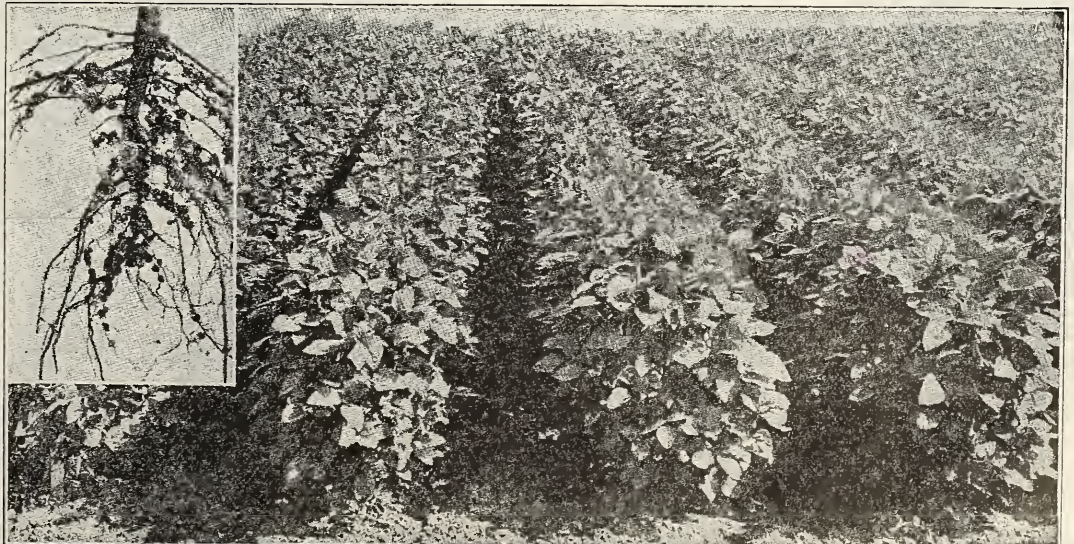

EVANS' EARLY—Originated by Mr. Evans, the noted Soy Bean Specialist of Michigan. The earliest and best variety for states of a short season. Northern-grown seed, postpaid, pkt. 10c; lb. 30c; 3 lbs. 75c.

ITO SAN or EARLY YELLOW—One of the earliest and best; 2 feet high; yields about two tons of cured hay or 25 to 30 bushels of grain per acre. Matures in 95 to 100 days. Postpaid, pkt. 10c; lb. 25c; 3 lbs. 60c.

MANCHU—A favorite everywhere, medium size, yellow with a darker scar. Matures in about 110 days. Postpaid, pkt. 10c; lb. 25c; 3 lbs. 65c.

FIELD BEANS

BUCKBEE'S ELECTRIC TREE—The earliest, heaviest cropping white field bean and the best for baking; 2 feet high, branching out in all directions, bearing its pods so high that they seldom touch the ground. This is, indeed, a wonderful cropper. The crop matures in 80 days from planting. Seed medium sized, oval, pure white; very uniform in size and shape. Postpaid, pkt. 10c; $\frac{1}{2}$ lb. 18c; lb. 30c; 3 lbs. 85c.

VELVET BEANS

A valuable plant for the South, used for pasture, green manuring and green forage. It is the rankest grower of any of the legumes; 2 or 3 seeds planted 4 feet apart in rows 5 feet apart will literally cover the ground 2 to 3 feet thick with a mass of foliage and vines 20 to 25 feet long, no matter how poor the soil. It leaves a mulch on the ground that is very beneficial to the soil. Sow 15 lbs. per acre.

100-DAY VELVET BEANS—The earliest and quickest-growing of all Velvet Beans, well adapted for districts further north than Velvet Beans ordinarily have been grown. They are to be preferred to Cowpeas, making two or three times as much growth and pods and will add a supply of vegetable matter to your soil that will show for years to come in your crop.

Postpaid, pkt. 10c; ½ lb. 15c; lb. 25c; 3 lbs. 65c.

BUCKWHEAT

This desirable and profitable crop, should be more generally known. It is usually sown in the Northern States in July, and will fill up the vacant plots at a time when all other planting is past. Can be sown after a crop of Winter wheat or rye and will make a second crop maturing in about two months. It does well on light soils, gives a good crop even on land low in nitrogen. It makes a splendid flower food for bees and is profitable on account of its large grain yield; turned under it is a good soil improver; where weeds are thick, Buckwheat will smother them and put the soil in good condition for the crop to follow. It is prized as a poultry feed, being regarded as a stimulant to egg production, and when ground is profitably fed to hogs and other stock. It also makes a fine quality of flour—the kind that goes into the famous "Buckwheat Cakes." Sow ½ to 1 bushel per acre.

BUCKBEE'S GIANT JAPANESE

Entirely distinct from all other varieties. Has all the valuable characteristics of the old Japanese Buckwheat, and in addition is earlier and will yield at least one-quarter more per acre. On this account it can be grown farther north. It resists drought and blight very well. The seed is rich dark brown in color and larger than Silver Hull. As much as 60 to 80 bushels to the acre have been harvested of this variety, making it very profitable to raise. More than a week earlier than Silver Hull. Choicest stock seed, postpaid, pkt. 10c; lb. 25c; 3 lbs. 60c.

IMPROVED SILVER HULLED

This valuable variety is a decided improvement on the old black or gray sort. It is early, remains longer in bloom than other sorts. A fine variety for honey bees. The grain is of a beautiful light gray color and has a thin husk. Millers prefer Silver Hull, there being less waste, and it makes whiter, better and more nutritious flour than other varieties. It is more productive than the Japanese and the grain meets with a ready sale, at high prices. Choicest stock seed, postpaid, pkt. 10c; lb. 25c; 3 lbs. 60c.

No. 25 or Primost Flax.

BUCKBEE'S "FULL OF LIFE" FLAX SEED

No. 25 or Primost Flax

This is a pure bred flax. It is selected from a variety which came to the Minnesota Experiment Station from the U. S. Department of Agriculture.

Its record in the field test at the Minnesota Experiment Station showed an average yield for 3 years of 193 bushels, or 3.4 bushels more than the average of the next best varieties. It is about 10 days earlier than common flax and is wilt-resistant to a considerable extent. This is no doubt the champion, best yielding variety of Flax. Our supply of this seed is limited. Send your orders early. Postpaid, pkt. 10c; lb. 30c; 3 lbs. 75c.

Quality Brush BROOM CORN

THIS IS A BIG MONEY MAKING CROP AND CAN BE GROWN SUCCESSFULLY IN ALL LOCATIONS.

Broom Corn is planted only for its seed heads or brush used for the making of brooms. The seed makes a good feed as corn, but the crop of it is not very large.

Broom Corn can be grown where corn grows and requires the same treatment. It should, however, be planted later, when the ground is quite warm. Only 70 to 80 days are needed to produce a crop. More than a ton of brush has been grown per acre and the market price has been from \$400.00 to \$500.00 per ton in the last year; it varies greatly, according to the outcome of the crop. To obtain the highest price for the brush, it must be cut when in bloom and still quite green.

Plant in rows 3 to 3½ feet apart and 6 inches apart in the rows; 5 to 10 pounds are sown per acre.

The demand exceeds the supply, which causes the present high prices for brooms. You will find a steady market for all the good Broom Corn you can grow.

BUCKBEE'S SUPERIOR EVERGREEN The Standard Tall Variety.

This is the most popular and most productive variety in the market. The original seed was secured in Tennessee, then bred and acclimated, thus making the brush of better quality. In growing it, all imperfect stalks are cut out and the brush is raised and cultivated especially for seed. Stalks 8 to 10 feet high with long, straight brush, well fibred and of bright green color. Postpaid, pkt. 10c; ½ lb. 15c; lb. 25c; 3 lbs. 60c.

CALIFORNIA GOLDEN

Carefully selected and improved so that the brush is straight and long. Of finest quality; light green color, turning to light yellow when allowed to get too ripe. Postpaid, pkt. 10c; ½ lb. 15c; lb. 25c; 3 lbs. 60c.

OKLAHOMA DWARF

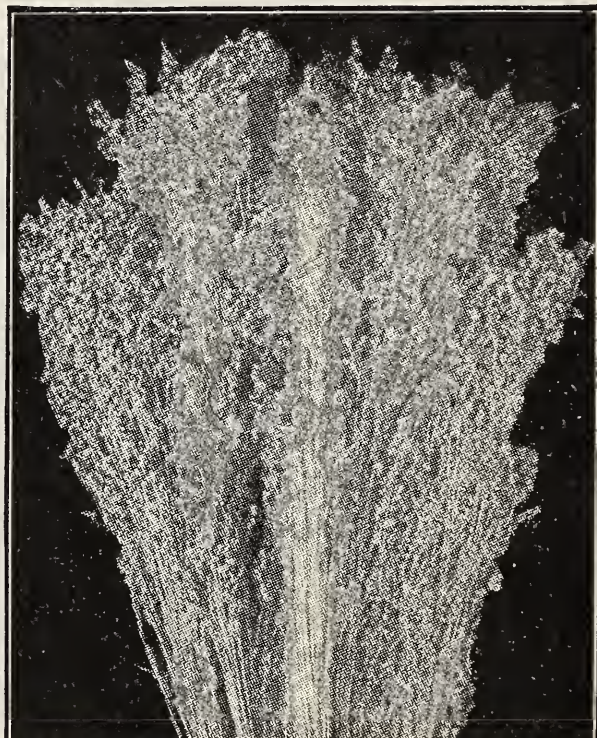

Grows about 5 feet high, with straight, smooth brush, principally used for making whisks and brushes. Very early. Postpaid, pkt. 10c; ½ lb. 15c; lb. 25c; 3 lbs. 60c.

PINTO BEANS

This is the Bean that made New Mexico famous and added much to the wealth of that state; more than a thousand carloads valued over \$4,000,000 were shipped out of that state in a year. The crop per acre on an average brought about \$90.00 to the grower. Large quantities of these Beans have also been grown in other southern and western states.

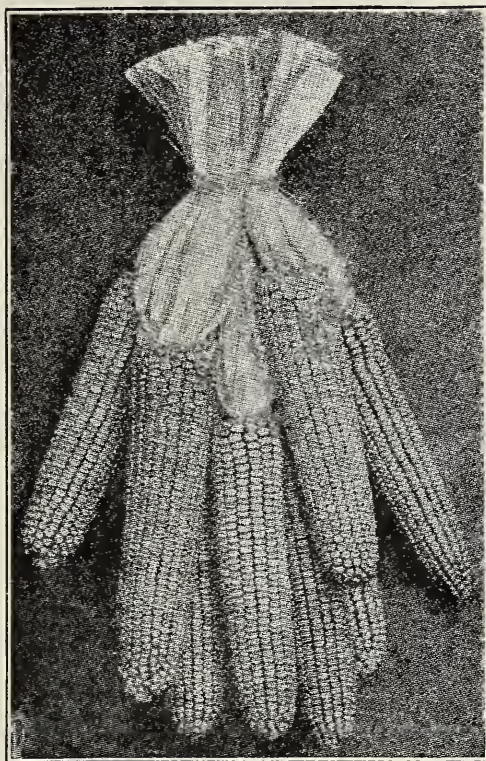

Pinto Beans are very hardy and as heat resisting as Teparies; they have done very well without irrigation on high altitudes with a light rainfall and wherever they can be grown, they produce larger crops than Teparies. They mature about 2 weeks later than Navies and have to be planted so much earlier. The dried Beans are larger than Navies and are brown striped in color; in flavor, they are much superior to the Navy or any other field bean.

Postpaid, pkt. 10c; ½ lb. 18c; lb. 30c; 3 lbs. 75c.

SHEET

The Greatest Oats in the Country.
The Earliest of All Large Grained Oats.

The Best Yielding Oats.
The Plumpest and Heaviest Oats.

Quaker Oats is a spreading variety, throwing out its heavily laden branches on all sides. It has thick-walled, stiff straw of medium height, that carries the load without lodging, withstanding winds and storms better than most other varieties. The grains of Quaker Oats are short, very plump and heavy, the heaviest of any oats we know of, generally weighing from 45 to 50 lbs. per measured bushel. They have a thin skin and heavy meat, and in addition the color is a fine white as bright and clean as a new silver dollar. Such oats grade higher on every market than common stock and usually bring a cent or two a bushel more for the crop, which will more than pay the extra cost of seed, not to say anything of the extra yield which may be secured. These oats are medium early. We have grown them now for many years, but never noticed a sign of rust, smut or blight on the straw. Choiceest Pedigreed Seed of our own growing. Postpaid, pkt. 10c; ½ lb. 18c; lb. 30c; 3 lbs. 75c.

BUCKBEE'S ILLINOIS

An early variety, has a well branched head and long but plump pure white grains with a thin hull. The straw is of medium height, very stiff and does not lodge easily, but stands up well on rich, well manured land. It is an ideal sort for any soil. Postpaid, pkt. 10c; lb. 25c; 3 lbs. 65c.

WHITE KHERSON (Iowa No. 103)

A new production from the Iowa Experiment Station. White Kherson has strong, stiff, short straw, branching heads with very numerous small but exceptionally heavy berries with thin hulls, and in addition this new Oats is pure white, and a very heavy yielder. Postpaid, pkt. 10c; lb. 25c; 3 lbs. 60c.

BUCKBEE'S WHITE BONANZA

A medium early Oats, maturing about a week ahead of the Swedish Select, and is very hardy and prolific. Has long stiff straw and grain of the clearest white color, usually plump and heavy with a reasonably thin hull. It is a sure cropper and shows little tendency to rust or lodge. Postpaid, pkt. 10c; lb. 25c; 3 lbs. 60c.

IOWAR

Iowa's greatest offering. Brought out by the Iowa Experiment Station, who claim it is better than Kherson. Stands up well very early and a heavy yielder. Postpaid, pkt. 10c; lb. 25c; 3 lbs. 60c.

REGENERATED SWEDISH OATS

Our stock is grown from the originator's seeds and is very plump, heavy and of bright color; pure, clean and entirely free from weeds and other grains. It is ahead of the English stock being grown in this country, and is therefore acclimated and will give much larger crops. The straw is coarse, very stiff and noted for its power to resist lodging. The heads are large, branching and filled with very large, thick grains of bright color. They are medium late. Postpaid, pkt. 10c; lb. 25c; 3 lbs. 60c.

EARLY BLACK PROLIFIC TARTARIAN

Tests made by many progressive farmers convince them that these Black Oats are more reliable croppers than White Oats. They are very early. The grain is short and plump and of the best quality. Early Black Prolific Oats are practically drought-proof and rust-proof. The straw is stiff, the heads are long and the grain yield is heavy. Postpaid, pkt. 10c; oz. 25c; 3 lbs. 70c.

WINTER OATS

Winter Oats are of the greatest value for the states south of the Missouri line. They are grown there for Fall and Spring pasture and for grain. They also generally stand the winter everywhere in our state and in the southern half of Iowa. Our Winter Oats grown in the North are incomparably superior to southern-grown stock. They are more hardy, earlier, less susceptible to rust, of more vigorous growth, stand up better and are more productive.

TEXAS RED RUST-PROOF.—A very heavy berry, short, strong, stiff straw and does not lodge easily. These oats can be sown in Fall and Spring. Postpaid, pkt. 10c; lb. 25c; 3 lbs. 65c.

WINTER TURF.—Sometimes called Virginia Gray. The grain is of a dark gray color, with a distinct stripe and weighs heavier than the ordinary Oat. These oats can also be sown in Spring and if sown very early, will outyield ordinary Spring Oats. Postpaid, pkt. 10c; lb. 30c; 3 lbs. 75c.

NEW APPLER.—This variety spreads and stools out enormously, especially when grazed, and if stock is taken off by March will yield a large crop of grain. This is a very popular Oat in the South, especially on the light sandy soils of the coast region. Postpaid, pkt. 10c; lb. 25c; 3 lbs. 70c.

BUCKBEE'S NORTHERN GROWN COW PEAS.

Cow Peas grow on almost all soils and thrive on land too poor for clover. They are drought-resistant, stand the heat of the southern summer and are largely grown in the South, but the early varieties listed here are also of greatest value for all northern states.

BRABHAM—Of upright growth, retains foliage exceptionally well. As early and very similar to New Era but is bound to supplant this variety on account of its wilt-resisting qualities. Postpaid, pkt. 10c; ½ lb. 18c; lb. 25c; 3 lbs. 65c.

BUCKBEE'S EXTRA EARLY MICHIGAN FAVORITE—Matures in about 50 days; 8 to 12 tons of excellent fodder or 20 to 30 bushels of seed per acre is often harvested. Much used as a fertilizing crop. Postpaid, pkt. 10c; ½ lb. 25c; lb. 30c; 3 lbs. 85c.

IMPROVED WHIPPOORWILL—Upright, a week later than New Era, a favorite in the South and Middle West. Very productive. Much used for pasture and fertilizer. Postpaid, pkt. 10c; ½ lb. 15c; lb. 25c; 3 lbs. 60c.

NEW ERA—Upright, remarkably prolific. Ripens in 60 days. Yields two crops in the South. Postpaid, pkt. 10c; ½ lb. 15c; lb. 25c; 3 lbs. 60c.

PROLIFIC BLACK EYE—One of the earliest; will mature seed in about 60 days. Of great value of a forage and soil improving crop. Postpaid, pkt. 10c; ½ lb. 15c; lb. 25c; 3 lbs. 60c.

BUCKBEE'S NORTHERN GROWN FIELD PEAS

For the northern states there is no crop of greater value than Field Peas. They can be grown under most any condition of soil or climate and yield a profitable crop no matter for what purpose it is grown for pasture, soilage, hay, grain or fertilizer.

Field Peas make their best growth when the weather is cool and the earlier they are seeded the better they will do. When sown in March or April in the Northern states they will be ready for cutting the latter part of June, coming before any good nutritious feed suitable for soiling or hay.

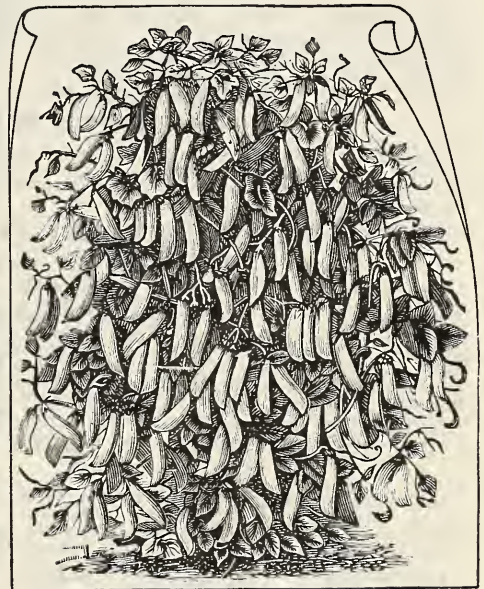

BUCKBEE'S NEW EARLY SNOWFLAKE—By far the best Field Pea. Immensely productive. Height of vine 3½ to 4 feet. Dry pea is of a beautiful pearly white color. Postpaid, pkt. 10c; lb. 30c; 3 lbs. 80c.

BANGALIA—An exceptionally heavy cropper for an extra early Pea. It is easily a week to ten days earlier than the famous June Pea and two to three weeks earlier than the Canada Pea. The vines are very heavy. The Peas are somewhat wrinkled, very heavy and a beautiful light green in color and decidedly distinct from the White Canadian.

Aside from its drought-resisting character and big cropping habit, it is a very early variety, which is a fine quality in a Field Pea. Postpaid, pkt. 10c; lb. 25c; 3 lbs. 70c.

IMPROVED WHITE CANADA FIELD—A well known and standard variety. Postpaid, lb. 25c; 3 lbs. 65c.

Snowflake Field Peas.

SPELTS OR EMMER

SPRING SPELTS—A valuable grain closely related to wheat; the kernels, however, are tightly enclosed in the hulls and adhere to it when threshed. It has quite stiff straws, stands up well on ground where oats and barley lodge. It neither rusts nor blights. Oats and spelts ripen about the same time and are often sown together for horse feed. Thresh like wheat. Sow 80 to 100 lbs. per acre. Postpaid, pkt. 10c; lb. 25c; 3 lbs. 60c.

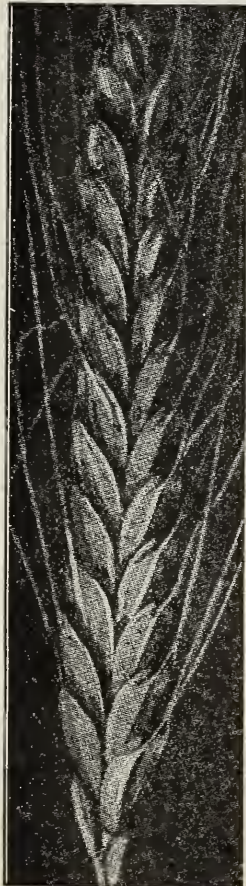

NEW WHITE BEARLESS WINTER SPELTS—The Winter Spelts has the same characteristics as Spring Spelts. As the name indicates, this variety is without beards, and also has much larger heads and is much more productive in suitable climates than the Spring variety. Ripens earlier than oats, yields much better and may furnish a considerable quantity of fall and winter pasturage. The preparation of the land for seeding and the subsequent management of Winter Spelts crops are practically the same as required for Winter Rye or Wheat. Sow with a drill at the rate of about 60 lbs. per acre; cover about 3 inches deep. Postpaid, pkt. 10c; lb. 30c; 3 lbs. 85c.

BUCKBEE'S MAMMOTH RYE

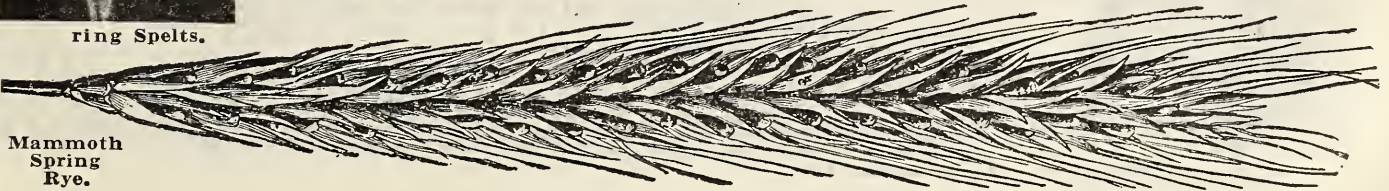

SPRING RYE—Spring Rye is entirely distinct from Winter Rye, and we call particular attention to the fact that we offer genuine Spring Rye. It can be sown in spring a little later than other spring grain and a crop harvested the same season; on that account it is much used as a catch crop, especially where winter grain has been killed out. Not less than two bushels are usually sown per acre. Postpaid, pkt. 10c; lb. 25c; 3 lbs. 65c.

GIANT WINTER RYE—A heavy cropper, with stiff straw, large heads and plump, heavy grains. Postpaid, pkt. 10c; lb. 25c; 3 lbs. 60c.

NEW ROSEN WINTER RYE—This famous rye, originated by the Michigan Experiment Station, has now proven its superiority over all other varieties in every rye-producing section. It has doubled the yield obtainable with any other kind. The average yield of common rye in this country is less than 15 bushels per acre, but that of Rosen Rye 40 to 45 bushels. Rosen Rye has very stiff straw and very large heads with four even rows filled with very large kernels. It is characteristic of the Rosen that the four rows are always evenly well filled on 99 per cent of the heads, while common rye seldom shows a well-filled head. We offer genuine, pure, clean stock. Postpaid, pkt. 10c; lb. 25c; 3 lbs. 65c.

EGYPTIAN WHEAT OR SHALLU

A valuable new grain, entirely different from Wheat. It belongs to the Sorghum family and should be planted like Cane or Kaffir Corn, for hay or grain. The plant grows from 5 to 7 feet tall, stools out from the root, a single grain often producing 3 to 6 stalks. The grain makes excellent feed for horses and cattle. When ground it makes fine flour for pancakes. Postpaid, pkt. 10c; ½ lb. 18c; lb. 30c; 3 lbs. 75c.

FETERITA

The earliest and most drought-resisting grain Sorghum. Introduced by the United States Department of Agriculture from Africa. It produces a stalk 7 to 8 feet high and a large head, well filled with bluish-white seeds. The grain is softer and larger than that of Milo and Kaffir and in feeding value is equal to either of them. Feterita is an excellent drouth resister, ripening in about 85 days. Postpaid, pkt. 10c; ½ lb. 15c; lb. 25c; 3 lbs. 65c.

GREAT BRAZILIAN FLOUR CORN

One of the greatest novelties ever introduced. This corn is inclined to stool, and one grain will usually produce more than one stalk. Each stalk bears 2 or 3 ears, 9 to 12 inches in length, and beautifully white. It produces an abundance of fodder and is the best variety for ensilage. The kernel contains more starch than any other corn and ground and bolted by the same process as wheat, gives a fine flour. Postpaid, pkt. 10c; ½ lb. 20c; lb. 35c; 3 lbs. 95c.

JERUSALEM CORN

Belongs to the non-saccharine Sorghums, and was brought a few years ago from the arid plains of Palestine. It is pronounced the surest grain crop for dry countries. Very valuable for feeding stock and proves a gold mine for chicken feed. The grain is pure white and nearly flat. Plant 5 to 10 pounds per acre. Postpaid, pkt. 10c; ½ lb. 20c; lb. 35c; 3 lbs. 95c.

BUCKBEE'S EARLY KAFFIR CORN

The standard grain Sorghum and the best for forage and silage. Plants attain the height of from 5 to 8 feet, growing upright. Stems have a stalky tendency and produce numerous wide leaves; they do not harden as do many other Sorghums, but keep green, brittle and juicy, making the best silage or forage, either green or dry, of any of the grain Sorghums, and are highly relished by all stock. Postpaid, pkt. 10c; ½ lb. 15c; lb. 25c; 3 lbs. 65c.

WONDERFUL MILO MAIZE

This Dwarf Milo is extensively grown for grain in sections where the season is short. It matures in 90 to 95 days. Admirably adapted to dry-land farming. The grains are the largest of all Sorghums. Postpaid, pkt. 10c; ½ lb. 15c; lb. 25c; 3 lbs. 65c.

BUCKBEE'S NEW HONEY SYRUP SUGAR CANE

The favorite Syrup producer. This is the earliest Cane, and our Seed is grown in the North and is entirely pure, not mixed with any other Sorghum. As a syrup producer it has no equal, being exceedingly juicy and sweet. It grows 10 to 12 feet high, is very prolific, sometimes producing 5 to 7 stalks from one seed. Matures about the middle of August to October, according to time of planting; will keep green and stand, if desired, until killed by frost. Postpaid, pkt. 10c; lb. 35c; 3 lbs. 95c.

BUCKBEE'S IMPROVED EARLY AMBER SUGAR CANE

Successfully grown, even in the extreme northern latitudes. Not only is it valuable for fodder and pasture purposes, but it makes a high-grade cane syrup or sorghum. Postpaid, pkt. 10c; lb. 25c; 3 lbs. 70c.

BUCKBEE'S IMPROVED EARLY ORANGE SUGAR CANE

An exceedingly valuable variety. Very large, of strong and vigorous habit. About 1 to 3 weeks later than Early Amber, but taller and heavier. Postpaid, pkt. 10c; lb. 25c; 3 lbs. 65c.

Australian Salt Bush

A valuable forage plant for soils containing alkali and for all regions subject to periodical drought; will grow freely on soils that will produce no other vegetation. It seems to take up from the soil the salty substance which is so detrimental to the growth of other plants, and after 3 or 4 crops of it have been grown the soil is capable of producing any other crop. The plant is a perennial in the South, but not hardy in the North, and has to be sown there every year. Sow in Spring or Summer; when

Giant Beggar Weed.

soil is warm and moist, after a rain; do not cover seed. When once started it will grow strong and vigorously during the driest season. The plants are of spreading habit, branching freely; they make a thick mat of stems and foliage 3 to 4 feet in diameter, yielding about 20 tons of green forage per acre, which makes about 5 tons of hay. This is very nutritious and eagerly eaten by all live stock. When dry it contains about 8 to 10 per cent of salty matter. One pound of seed will seed one acre. Postpaid, pkt. 10c; oz. 15c; ¼ lb. 35c; lb. 95c.

Thousand-Headed Kale

Similar to and now frequently used in place of rape, as it yields a heavier crop, which is estimated at about 10,000 lbs. per acre in one season. Thousand-Headed Kale attains a height of 3 to 4 feet; the stem is covered with rosettes of leaves. It grows well on almost any kind of soil, and is hardy. All farm animals are fond of it, but it is of especial value for feeding hogs and sheep. Sow same as rape; broadcasting requires 1½ lbs. per acre. Postpaid, pkt. 10c; ¼ lb. 30c; lb. 85c.

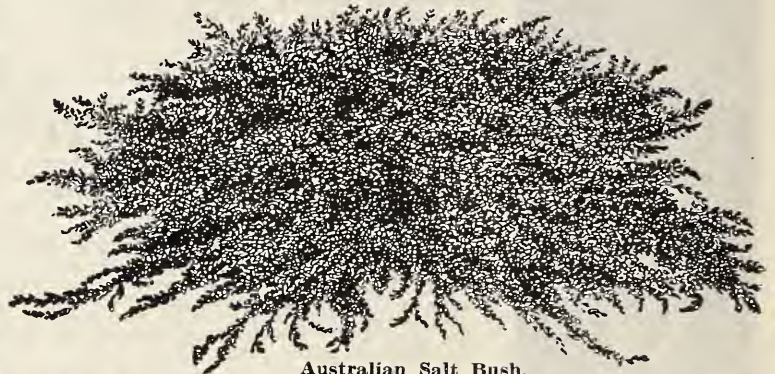

Giant Beggar Weed or Florida Clover

A Splendid Forage and Soil Renovating Crop for the South

An erect leguminous, annual plant, from 3 to 8 feet high, with abundant foliage; excellent as a pasture crop; makes hay of the finest quality. The feed is much relished by stock and is highly nutritious, comparing favorably with that of red clover and cowpeas. It is especially recommended for thin, sandy soil, and on land too poor to grow any other crop it has produced 3 to 5 tons of cured hay per acre. If cut when about 2 feet high, the plants again stool out from the bottom, yielding successful crops. It is an excellent crop to turn under for green manure. It can be easily eradicated. Sow when soil is warm in June, 3 or 4 lbs. in drills 3 feet apart, or broadcast 10 lbs. per acre; cover 1 to 2 inches. Will mature in 80 days. Postpaid, oz. 10c; ¼ lb. 25c; ½ lb. 45c; lb. 75c.

BUCKBEE'S "FULL OF LIFE" SPRING WHEAT

PEDIGREED NEW MARQUIS—Ten days earlier and yields 10 bushels more per acre than any other hard Spring Wheat known. This wheat has very stiff straw of medium height, which does not lodge easily, the heads are bald and quite heavy, have smooth yellow chaff; the kernels flinty, more round than those of other Spring Wheats, thicker and more plump, and of dark red color. Postpaid, pkt. 10c; lb. 25c; 3 lbs. 70c.

MACARONI, KUBANKA OR DURUM—This is the best of the Macaroni varieties for milling purposes. It is very early and very productive. The heads are bearded, the grain very large, hard, glossy and of yellowish color. Sow $1\frac{1}{2}$ to 2 bushels per acre. Postpaid, pkt. 10c; lb. 25c; 3 lbs. 65c.

WINTER WHEAT

Winter Wheat is the best-paying crop on the farm; wherever possible it should be grown instead of Spring Wheat, for if the right varieties are used it will give one-third larger yield and it is as sure a crop.

BUCKBEE'S RED TURKEY—This is a bearded variety and is the hardiest known; it can be planted in almost all parts of the Northwest and is also the best adapted sort for the states of Nebraska, Kansas, Oklahoma, etc. It is one of the earliest varieties of winter wheat and matures before rust and cinch bugs appear. The heads are long, well filled with large, flinty grains of reddish-amber color equal to No. 1 Hard Spring Wheat. Postpaid, pkt. 10c; lb. 25c; 3 lbs. 65c.

HARVEST QUEEN—A beardless variety, white chaff, golden yellow grain, a splendid yielder; while not as hardy as our Red Turkey, it has been grown for years with good success in Southern Minnesota. This and Harvest King are the hardiest varieties of Beardless Winter wheats known, giving excellent results in all parts of the corn belt. Postpaid, pkt. 10c; lb. 25c; 3 lbs. for 65c.

HARVEST KING—Another beardless or bald variety, red chaff, very large dark amber-colored grains, larger than most other bald varieties, of splendid milling qualities. The earliest beardless wheat, very hardy. Often sold as Red Cross wheat. One of the most productive kinds in the Corn Belt, quite hardy as far north as Winona, Minn. Postpaid, pkt. 10c; lb. 25c; 3 lbs. 65c.

BUCKBEE'S DWARF RAPE

BUCKBEE'S DWARF BONANZA—There is no other forage plant which can be grown so advantageously in the northern part of the United States and which furnishes such an abundance of succulent forage during Summer and Fall when the supply of grass and clover is often limited as Rape. It is indispensable for raising sheep and hogs and is much relished

by all stock. Buckbee's Dwarf Bonanza is undoubtedly the heaviest yielder of all varieties of Rape. Crops of nearly 50 tons of green fodder per acre have been reported, while of Dwarf Essex not more than 10 to 20 tons have been harvested. Rape is usually ready for use in about two months from sowing the seed; it is used as a soiling crop in many places, but its chief use is for pasture and especially for hogs and sheep. Its fattening properties are twice as good as clover. Rape must not be fed after it has been frozen. Postpaid, pkt. 10c; lb. 30c; 3 lbs. 85c.

DWARF ESSEX—A standard variety. Not quite so strong

and vigorous a grower as Dwarf Bonanza, but never fails to give the best of satisfaction. Fine imported seed. Postpaid, lb. 25c; 3 lbs. 65c.

SUNFLOWER

MAMMOTH RUSSIAN—This is the largest; "the Jumbo" of the Sunflowers. There is no variety which produces larger seeds or heads than this one. Single heads often measure 15 to 22 inches in diameter and contain an immense amount of seed. It is very productive. Postpaid, oz. 5c; $\frac{1}{2}$ lb. 18c; lb. 30c; 3 lbs. 85c.

YELLOW SWEET CLOVER

This is a biennial variety like the white; it does not grow quite so tall, only about 4 to 5 feet high, the stalks and branches are, however, more slender, making a fine hay. Postpaid, pkt. 10c; lb. 30c; 3 lbs. 85c.

MILLET BUCKBEE'S CALIFORNIA BEAUTY MILLET

The Best Hog and Stock Millet

The most remarkable leafy, bushy, vigorous growing Millet in the world. Yields as high as fifteen tons of hay or more to the acre. It will make a magnificent crop of hay if sown immediately after your Oats or Barley, Rye or Wheat is cut, as it will ripen in from sixty to ninety days. It is positively the Millet wonder—very leafy, prolific and exceptionally fine for hay and feed. Sow one-half bushel per acre. Postpaid, pkt. 10c; lb. 25c; 3 lbs. 65c.

LIBERTY OR GOLDEN MILLET

Grows very rank, 4 to 5 feet high, and is one of the best varieties for hay, being sweet, palatable and milk producing. On good rich soil it yields 5 tons and more of hay per acre. The hay seems coarse, but is very tender, and cows, horses and all other farm stock are exceedingly fond of it. Should be cut when in full bloom. Sow 35 to 40 lbs. per acre. Postpaid, pkt. 8c; lb. 25c; 3 lbs. 60c.

HUNGARIAN MILLET

A luxuriant, vigorous growing and very leafy Millet which is relished by all farm stock; the hay is not so coarse as that of the Liberty Millet, but the yield is nevertheless quite large, averaging 3 to 4 tons an acre. It is earlier than Liberty Millet and is often used as a second crop to follow Barley and early Potatoes, etc. Postpaid, pkt. 8c; lb. 25c; 3 lbs. 60c.

NEW WHITE WONDER MILLET

The most striking feature of White Wonder Millet is the size of the heads, which will run from eight up to eighteen inches, and a single head often has as many as 15,000 seeds. The yield is extremely heavy, being fully half again as heavy as that of other Millets. Some growers claim that it will outyield other Millets three to one. Another desirable feature is its earliness. The foliage is very heavy, the leaves broad, and therefore it produces an immense amount of excellent fodder which cures very readily. Postpaid, pkt. 10c; lb. 25c; 3 lbs. 65c.

HOG OR BROOM-CORN MILLET

It is a very early variety ripening in 50 to 60 days from time of sowing. The seed ripens while the fodder is yet green, hence it can be cut and used for both hay and seed with best success; it yields from 60 to 70 bushels of seed per acre besides the fodder hay. This Millet does not grow very tall and is therefore not much planted for hay, but its enormous quantity of seed makes good feed for swine and other stock. It also makes fine feed for poultry and young chicks. Postpaid, pkt. 8c; lb. 25c; 3 lbs. 60c.

Hog Millet.

Kursk—Siberian Millet.

California Beauty Millet.

KURSK—SIBERIAN MILLET

Resembles Liberty Millet in manner of growth and productiveness but is about 2 weeks earlier and the seed is orange-red. It stools quite heavily, is very leafy and bushy and a heavy yielder of both hay and seed, producing 50 to 70 bushels of seed and 4 to 5 tons of hay per acre.

It will ripen in 60 to 70 days from sowing and makes a good crop of hay if sown immediately after the early grain is harvested. This Millet is especially adapted for the Northwestern States; being very early and very hardy it will prosper under conditions when other varieties fail. Postpaid, pkt. 8c; lbs. 25c; 3 lbs. 65c.

JAPANESE MILLET

Also Called Billion Dollar Grass.

Entirely distinct from any other Millet, grows 6 to 8 feet high and produces an enormous crop, often yielding 15 to 20 tons of green fodder or 6 to 8 tons of cured hay per acre. The feeding value of this Millet is much superior to that of corn fodder and the Millet is much more relished by all kinds of stock. Japanese Millet is mostly used for feeding green, but on account of the large yield and good quality of forage, it is also most excellent for silo use and frequently a good crop of this Millet can be raised under conditions which would not admit the growing of corn for ensilage. An ideal ensilage mixture may be composed of two parts

of Japanese millet to one part of Soja Beans, mixed when filling the silo; this mixture forms a complete balanced ration for milch cows, without the addition of grain.

The seed of this millet makes good food for poultry and hogs, as it contains almost as much fat and extract matter as shelled corn and a little more protein.

Sow the seed at the rate of 12 to 15 lbs. per acre. Postpaid, pkt. 8c; lb. 25c; 3 lbs. 65c.

PEARL MILLET OR PENCILARIA

This quick-growing forage plant has long been known under the name East India or "Cat-tail" Millet. Sown in drills 4 feet apart and cultivated like corn, the plants attain a height of 8 to 10 feet, with slender, long-bladed leaves. These stalks can be cured for Winter use and the seed makes an excellent poultry food. But the best use of the plant is to cut the stalk for green forage when about 3 feet high and allow the plants to make a second growth for Fall feeding or ensilage. On richly manured land these plants grow with tropical luxuriance and no other crop will yield as much forage. Pearl Millet is of exceptional value for sections subject to protracted drouth where natural grasses dry up, as it will keep on growing and furnish a good crop in the driest season. Eight pounds of seed are required per acre, if sown broadcast, and 5 to 6 pounds if sown in drills. Postpaid, pkt. 10c; lb. 35c; 3 lbs. 85c.

BUCKBEE'S "FULL OF LIFE" GRASS SEEDS

Are of the HIGHEST GRADE obtainable, both as respects purity and high germination; they are pure and clean, free from noxious weeds and foreign seeds and are plump, heavy and well ripened, so as to insure a good stand and a big crop

Bromus Inermis.

Bermuda Grass or Southern Blue Grass

A most valuable grass for our Southern states, both for pasture and lawns. It requires heat and moisture to start it. As it cannot endure frost, it is of no value North of Virginia. Sow at the rate of 6 pounds to the acre. Postpaid, pkt. 10c; lb. 80c; 3 lbs. \$2.25.

Bromus Inermis

Bromus Inermis reaches a height of from 4 to 5 feet, producing an abundance of leaves, and yields on good soil about 4 tons of cured hay per acre, which has about the same feeding value as Timothy. Much sown now for pasture with White Sweet Clover, using 10 lbs. each per acre. Sow 15 to 20 lbs. per acre. Postpaid, pkt. 10c; lb. 30c; 3 lbs. 85c.

Canada Blue Grass

A very hardy perennial grass with creeping root stocks. It is especially valuable for dairy pastures. It is distinguished from the Kentucky Blue Grass by its flattened, wiry stems and by its decidedly bluer color. Sow 20 to 25 lbs. per acre. Postpaid, pkt. 10c; lb. 55c; 3 lbs. \$1.55.

English or Perennial Rye Grass

Invaluable for permanent pastures. It produces an abundance of remarkably fine foliage, tillers out close to the ground and soon forms a compact sward. After being cut it grows up in a very short time and remains bright and green throughout the season; it consequently is well adapted for lawn mixtures. It is also a good variety for hay if cut when in blossom. Postpaid, pkt. 10c; lb. 30c; 3 lbs. 85c.

Italian Rye Grass

A remarkably rapid grower; stands extremes of temperature, remaining green until late in the Fall and retaining its freshness in the hottest Summer. For temporary meadows, on good soils, it is a most valuable grass. Not perennial, but lasts two or three years. Sow 35 to 40 lbs. per acre. Postpaid, pkt. 10c; lb. 30c; 3 lbs. 80c.

Johnson Grass

When carefully handled one of the most satisfactory hay crops for the Southern farmer, yielding even during hot and dry seasons three to four cuttings of one and a half to two tons each per acre on good soil. To keep it within bounds the seed should never be allowed to ripen. Postpaid, pkt. 10c; lb. 30c; 3 lbs. 80c.

Kentucky Blue Grass

One of the most widely distributed and valuable native grasses. It is a true perennial, lasting indefinitely and improving every year. It forms a close turf, starts very early in the Spring and lasts until frost. It remains small the first year, but becomes fully established the second year. It is especially valuable as a pasture grass, and is also one of the very best grasses for the lawn. Postpaid, pkt. 10c; lb. 60c; 3 lbs. \$1.65.

Meadow Fescue or English Blue Grass

Of all grasses Meadow Fescue is the surest crop. It comes up quickly and in three or four weeks after sowing it will be about 4 inches high and cover the ground perfectly. It lives longer than most other kinds of grasses, and although it produces a good crop of hay or pasture the first year, it does not reach the highest stage of growth until 2 or 3 years, and for this reason it is best adapted for permanent pastures and meadows. Postpaid, pkt. 10c; lb. 40c; 3 lbs. \$1.10.

Orchard Grass

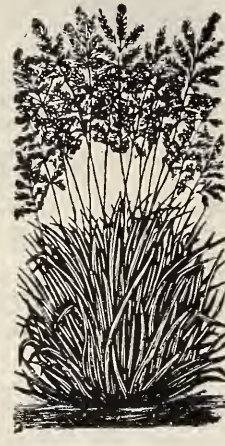

A valuable grass for pasture or hay land, and on account of its earliness especially valuable for a permanent pasture. It furnishes green grass very early in the Spring and until late in the Fall. When closely cropped it grows up very quickly and is ready for grazing again in ten to twelve days. It is succulent and nutritious, furnishing excellent pasture or hay. Postpaid, pkt. 10c; lb. 40c; 3 lbs. \$1.10.

Italian Rye Grass.

Orchard Grass.

Kentucky Blue.

Red Top—Solid Seed

A very hardy native grass and probably the most perennial variety we have. Red Top accommodates itself to a variety of soils, even to quite dry situations, but succeeds best on moist land, where it attains a height of 2 to 2½ feet. After being once established, it thickens and improves year by year, taking possession of the land and gradually supplanting other grasses, but it is easily eradicated in case it is desired to put the land in cultivated crops. Postpaid, pkt. 10c; lb. 55c; 3 lbs. \$1.50.

Tall Meadow Oat Grass

A hardy grass of rapid growth, luxuriant and reaching a height of 4½ feet. Makes excellent hay on sandy loams, but is particularly suited to rich soils and clay formations. It has a wonderful capacity for enduring severe heat, drought and cold. It can usually be cut twice a year; in the South it does much better than Timothy. Postpaid, pkt. 10c; lb. 55c; 3 lbs. \$1.60.

Timothy

Timothy is the most popular and most important of all hay grasses and is adapted to a wider range of conditions than any other variety of grass. It is the one grass that is always sure to grow, and without doubt it is the hardest of all our grasses; no other kind will stand the extremes of heat and cold better than this one; no other variety equals it in average yields, excels it in feeding value. Buckbee's "FULL OF LIFE" Brand will stand the test of all Pure Seed Laws and has a purity higher than 98 per cent and a vitality of more than 95 per cent. It is pure, bright seed, very little hulled. Postpaid, pkt. 10c; lb. 30c; 3 lbs. 80c.

Teosinte

Here is a truly wonderful forage plant worthy of general cultivation. Give it a rich, warm, balmy soil and it will yield from 20 to 30 tons of green fodder per acre. It is simply marvelous. Down in Georgia, in Florida and Louisiana its yields are all the way from 25 to 50 tons of green fodder per acre. It grows to a height of 18 feet in these states, while a single kernel will produce from 60 to 100 stalks of the most nourishing green fodder imaginable. On our Rockford Seed Farms, where the soil is sandy and warm, it always yields a much greater amount of green feed than corn. About two pounds of seed are required per acre. Postpaid, oz. 15c; ¼ lb. 30c; lb. 85c.

BUCKBEE'S PEDIGREED FULL OF LIFE SUDAN GRASS

Sudan Grass belongs to the Sorghum family and in general appearance is very much like Johnson Grass, but differs from it in that it is entirely free from the persistent underground root system which makes a Johnson Grass sod so difficult to eradicate. Sudan Grass being an annual and having fibrous roots similar to Millet or Oats, is as easily controlled and eradicated at the close of the growing season as those varieties, and will never become a weed.

It is a tall growing annual grass which when planted in rows and cultivated on fairly rich soil attains a height of 8 to 10 feet, and sown broadcast or drilled in thickly it will grow 3 to 5 feet high. The stems are erect, unbranched and very fine, the largest stalks not more than 1/4 inch thick and are covered with abundance of broad linear leaves. Where the plants are scattered they stool abundantly, as many as 100 stalks coming from a single root.

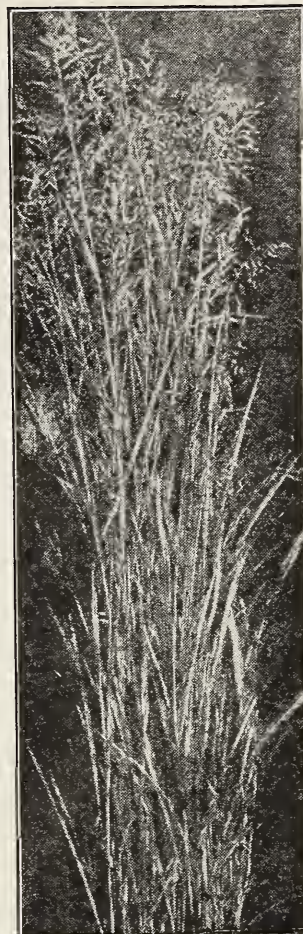

Early cutting is especially advisable when more cuttings per season are expected. After cutting it resumes its growth promptly, and in about 40 to 45 days another cutting is ready. In Texas it has been cut four times, but farther North only two or three cuttings may be expected.

Makes a very nutritious and palatable hay which is relished by cattle, horses and other farm stock. In feeding value the hay is second only to Alfalfa and far better than Millet.

Sudan Grass crosses quite easily with other cultivated Sorghums and Johnson Grass; we therefore had our seed grown in the North, where no Johnson Grass is grown, and our fields have been kept far apart from any other Sorghums. Buckbee's "FULL OF LIFE" Sudan Grass Seed is the finest and purest in the market.

Buckbee's Sand Vetch.

BUCKBEE'S GREAT SAND VETCH

(VICIA VILLOSA)

The Sand Vetch, also called Winter Vetch or Hairy Vetch, is an annual plant, similar in growth to a Pea Vine, but more slender, more branching and leafy; it will grow from 6 to 10 feet tall.

Sand Vetch is of great value for pasture and hay, and the fodder, either green or dried, is much relished by all stock; it is very rich, nutritious, containing even more protein than Alfalfa. It is cut for hay when pods are forming; the average yield of hay is from 3 1/2 to 4 tons per acre.

Sand Vetch is, however, mostly grown and is of the greatest value as a fertilizer; it is the best legume for enriching soils of low fertility.

Sown early in Spring alone or with a nurse crop of barley or oats, it furnishes good Summer and Fall pasture. Seeded in the Fall, it will come on early in Spring and will yield a bountiful crop of hay or splendid pasture till June; or can be plowed under about May 10th in the North, when it will be a mass of green stalks and leaves—about all that can be turned under with a plow.

Sow 35 to 40 pounds of Sand Vetches if sown alone; or 20 pounds Vetches with 1 bushel of Oats or Barley in Spring, or 1 bushel of Winter Rye in Fall. Cover Vetch about 1 inch deep. Postpaid, pkt. 10c; lb. 35c; 3 lbs. 85c.

Spring Vetches

An annual, sown in Spring only; does not do as well in the North as Sand Vetches. Sow alone 50 pounds per acre, or 40 pounds Vetches and 1 bushel of Oats. Postpaid, pkt. 10c; lb. 25c; 3 lbs. 65c.

GRASS AND CLOVER SEED MIXTURE (Sow One to Two Bushels per Acre.)

All authorities agree that for PASTURE and HAY best results are obtained from the use of grass seed IN MIXTURE. The reasons are obvious: First—A NUMBER OF SPECIES will insure a much DENSER GROWTH than the same number of seeds of one or two species, and prove less exhausting to the soil, since they live to a great extent on different constituents. Second—Seasons that affect some grasses adversely are FAVORABLE to other sorts. So that with mixtures failure is PRACTICALLY IMPOSSIBLE. The seed used in these mixtures is of the finest quality obtainable.

Restores and Maintains Soil Fertility

THE ORIGINAL SOIL INOCULATOR

Alfalfa, clover, soy beans, vetches, peas, beans, cow peas, peanuts and other legumes should always be inoculated with Nitragin. The lack of necessary bacteria in the soil is often the cause of poor legume crop—a weak start—or a total failure.

The reasons for inoculation are that plants so treated take nitragin from the air to supply the plant, hastens the growth, increases the crop, improves its quality and enriches the soil.

PRICES FOR FIELD NITRAGIN

1 bu. size inoculates 15 lbs. seed. By express 40; by mail 45c.

EVERY GARDEN NEEDS NITRAGIN

Garden size is for Peas, Sweet Peas, and Beans only, including Lima (3 in 1). Price, by express 20c; by mail 22c.

Plants and Bulbs

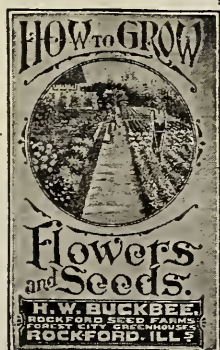

We always recommend having plants sent by express, at purchaser's expense, when there is an express office near as we can usually send somewhat larger plants, and do not have to wash the soil off the roots (as in the case when sent by mail). We always try to add enough extra plants of our own selection to help pay charges. Kindly write your list of plants all together on this page (not mixed up with the seeds) so as to prevent any mistake upon the part of our clerks in copying the order. We do not ship plants to Canada, Mexico and Foreign Countries. Be sure to read paragraph marked "Plant Shipments" on Page 1 of Catalog.

 If plants are not wanted at once please state about what date you wish them forwarded_____192__

BUCKBEE'S NEW PAEONY
LAKE GENEVA PINK

**BUCKBEE'S
RAINBOW
FLOWERS
OR HARDY
IRIS**

**THE MOST WONDERFUL COLOR-
INGS OF ANY PLANT GROWN
EXCEPT THE ORCHID**

These Iris are all sun lovers and delight in a sunny situation. They are all deliciously fragrant, large and handsome, more or less beautifully mottled and veined. Their beauty at first sight rivals that of the Orchid, but, on closer examination, have no hesitation in saying they yield points of interest not to be found in the whole of the Orchid family. Those who have not used these Iris for surrounding lakes and ponds, or cultivated them in the flower borders, shrubberies, woodland walks, and wild gardens should do so. If planted around ponds or lakes they should be placed well above the water level.

- Admiration**—An extremely large flower for an Iris. Standards or upright petals are a beautiful old rose color; falls white tipped with rosy lilac. This flower must be seen to be appreciated, and should be in every garden. 25c each; 3 for 70c, postpaid.
- Canary Bird**—Pale canary yellow. While not as showy in striking color combinations as some sorts, it is really one of the finest being nearly the same color throughout. Grown alone or with others it is hard to beat. 25c each; 3 for 70c, postpaid.
- Dorothea**—One of the most beautiful of its class. The flowers are a pure white with a broad and irregular border of clear blue, and are borne on strong stems which are often more than 2 feet in height. 25c each; 3 for 70c, postpaid.
- Ivanhoe**—A combination of colors which is hard to beat. The uprights are primrose yellow, while the falls are lilac and primrose. Many petals come in lemon yellow with purple edge. 25c each; 3 for 70c, postpaid.
- Celeste**—Fine satiny lavender blue and one of the most beautiful of the hardy Iris. The upper petals appear delicate grayish blue while the falls are a bright blue giving the entire flower a lavender effect. 25c each; 3 for 70c, postpaid.
- Red Cloud**—This is the very darkest colored of all the Iris, and claimed by many to be the finest. The upright or standing petals are purplish lilac, while the drooping petals are deep velvet black, making a very striking flower. 30c each; 3 for 85c, postpaid.
- Excelsior Mixed all colors**—A splendid assortment of over 20 of the best varieties. Many are so scarce that we cannot list them separately. 3 for 70c; 6 for \$1.30; 12 for \$2.50, postpaid.

BUCKBEE'S HARDY PHLOX

No class of hardy Perennials is of more importance than the Phlox which succeed under almost any conditions and flower from the end of June until late in the Fall.

- Sensation**—Cherry red, suffused salmon.
- Mermaid**—Light salmon-pink with dark red eye.
- Dream**—Pure snow white with crimson eye, immense florets and trusses.
- Ideal**—Pure snow white; gigantic trusses and flowers. The finest white Phlox.
- Harmony**—A beautiful shade of lavender.
- Dawn**—Dark rosy pink.
- Glitters**—Bright crimson.
- Brilliance**—Carmine rose.
- Distinction**—Deep salmon-pink with an orange glow.
- Marvel**—Lavender Cerise.

Prices, any of the above 25c each; \$2.50 doz. postpaid.
